S-Y10E5-ALAGT	3831113539388	Evolution Line (Titanium)	EV - Evolution		Designed to take the Yamaha YXZ1000R "Side-by-Side" machine to greater levels of performance and enjoyment. Constructed from high-grade lightweight titanium, reducing weight from the stock system by over 50%, and finished with a hand-crafted carbon-fibre end-cap. The power and torque are increased for enhanced performance. The sound is improved to deliver a louder, deeper, fuller, and distinctive Akrapovič tone, with a sporty, racing sound as the revs rise. Designed with durability in mind due to the tough conditions the system will face. Performance exhaust systems also feature a new coating for the silencer outer sleeve giving better scratch resistance and easier cleaning. For perfect performance, throttle response and durability special developed mapping from Dynojet has to be used. Please visit http://www.powercommander.com/powercommander . FOR CLOSED COURSE COMPETITION USE ONLY. NOT INTENDED FOR STREET USE.	Atv	Yamaha	YXZ1000R	2016	2025	€	2 374,94

S-H2MET12-CIQTa	3831113589314	Evolution Line (Titanium)	EV - Evolution		FOR CLOSED COURSE COMPETITION USE ONLY. NOT INTENDED FOR STREET USE.The flagship of the Akrapovič exhaust system range, used and tested by our top factory teams in motorcycle racing. It's simply the finest exhaust system available. Each model is unique and dedicated to maximizing the engine's performance, while reducing overall weight for optimized overall handling of the motorcycle. It is made entirely of titanium.Our exhaust systems meet FIM noise limits, feature a more durable welded bracket and titanium end cap. The system comes with spark arresters to comply with North American off-road regulations.	Off-Road	Honda	CRF250R / 250RX	2018	2021	€ 1 756,40

S-H2MET13-FDHLTA	3831126405175	Evolution Line (Titanium)	EV - Evolution		<p>Tailor-made to fit the limited space available within the motorcycle, this system combines performance and durability for extreme conditions and the rigors of off-road racing. Constructed from lightweight, high-grade, premium titanium alloys, with different thickness in the sections to ensure perfect protection and to reduce overall weight. A new profiled surface influences the sound to meet the FIM noise limits for competition, and it adds strength and durability to the muffler while delivering a deep, full sound that embraces the balanced pulse of the single-cylinder engine. The muffler is the largest possible for the space available. This allows increased sound silencing, which mitigates the impact on the natural environment while also facilitating improved flow for the exhaust gases to make their way from the combustion chamber with as few restrictions as possible. The added strength created by the design aids durability and provides enhanced resilience in the most demanding conditions. It offers a heightened response through the entire rev range and an optimum feeling when the throttle is opened, giving the rider great appreciation of control. Power and torque levels have been increased with an extra 0.5 kW (0.7 HP) at 4,750 rpm and 1.1 Nm at 4,770 rpm being recorded on the in-house dyno in back-to-back tests with a standard stock exhaust system. The Evolution Line (Titanium) exhaust has a special technique for imprinting the logo on the surface for greater durability and a titanium header with an integrated resonance chamber for optimum performance and sound, which is covered with a newly designed titanium heat shield. It is a simple plug-and-play operation to install, with no remapping needed. Exhaust custom file also on Honda CRF 250RX 2022, but remapping is not needed.</p>	Off-Road	Honda	CRF250R / 250RX	2022	2025	€ 1 712,18

S-K4MET9-FDHLTA	3831126432263	Evolution Line (Titanium)	EV - Evolution		Constructed from lightweight titanium, this product was created through close collaboration with the Akrapovič Racing Department. This complete exhaust is 29.8% (1.3 kg) lighter than standard stock and features headers with an integrated resonance chamber and a debossed Akrapovič logo. New technology has been developed directly from Akrapovič's involvement in motorsports, with a special technique for imprinting the logo on the muffler outer sleeve, which is now bigger and in a white and red colour combination. This technology provides a higher temperature threshold, with greater durability and longer life for a product that will be used in the toughest conditions. There are power and torque increases of 1.9 Kw (2.6 hp) at 7 500 rpm and 2.5 Nm at 7 600 rpm when compared to a standard stock exhaust and tested on the Akrapovič dyno. This product is for use on closed-course competition circuits only. The exhaust meets the current FIM noise limits and delivers a deep racing sound. No remapping is needed and, with a simple plug-and-play installation, the Evolution Line (Titanium) fits both the Kawasaki KX450 and KX450X models. For riders required to meet the new 109 dB FIM noise limitation, installing the optional V-TUV385 noise insert is mandatory. FOR CLOSED COURSE COMPETITION USE ONLY. NOT INTENDED FOR STREET USE.	Off-Road	Kawasaki	KX 450 / 450X	2024	2025	€ 1 749,15

Exhaust systems meet FIM noise limits, feature a more durable welded bracket and titanium end cap.	Off-Road	Yamaha	YZ250F / YZ250FX	2019	2023	€ 1 388,70
S-Y2MET17-FDHLTA	3831126427313	Evolution Line (Titanium)	EV - Evolution		This product is completely constructed from lightweight, high-grade titanium alloys. Different thicknesses in various sections ensure perfect protection and reduce overall weight – for a saving of 19.7% (0.8 kg) over the standard stock exhaust – and allow the added strength created by the design to provide enhanced resilience under the most demanding conditions. Designed to fit perfectly within the limited space on the motorcycle, it has been tailored to be as large as possible within the space available. This allows increased sound silencing to mitigate the impact on the natural environment, while also facilitating improved flow for the exhaust gases from the combustion chamber with as few restrictions as possible. Power and torque levels are increased by an extra 0.5 kW (0.7 hp) at 12,500 rpm and 0.5 Nm at 12,000 rpm, respectively, when tested on the in-house dyno in back-to-back tests against a standard stock exhaust system. Offering an increased response through the entire rev range, the Evolution Line (Titanium) has a new profiled surface, which influences the deep, full sound, and an integrated resonance chamber for optimum performance befitting the sound of an Akrapovič exhaust, all designed to meet FIM noise limits for competition. Finished with a specially imprinted logo on the surface, there is no sticker or engraving, but a different technique to add the logo. Developed for use on closed-course competition circuits only, it is a simple plug-and-play operation to install, with no remapping needed. For riders required to meet the new 109 dB FIM noise limitation, installing the optional V-TUV386 noise insert is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Off-Road	Yamaha	WR250F	2024	2025	€ 1 749,15

S-Y4MET16-FDHLTA	3831126418656	Evolution Line (Titanium)	EV - Evolution		Close cooperation between Akrapovič Racing R&D and R&D departments has resulted in an exhaust almost identical to the specifications for the one the Monster Energy Yamaha Factory MXGP Team will be racing with in the 2023 Motocross World Championship season. The tailor-made design fits within the limited space on the motorcycle and is the largest that the space will permit. This allows increased sound silencing to mitigate the impact on the natural environment while also facilitating improved flow for the exhaust gases to make their way from the combustion chamber with as few restrictions as possible. Constructed completely from lightweight, high-grade titanium alloys, this system offers a weight saving of 20.4% (0.9 kg) over the stock exhaust. Different thicknesses in the sections ensure perfect protection and reduce overall weight, allowing the added strength created by the design to provide enhanced resilience in the most demanding conditions. It offers an increased response through the entire rev range, with the power and torque levels increased by an extra 1.8 kW (2.4 hp) at 10,600 rpm on the in-house dyno and 1.5 Nm at 10,500 rpm in back-to-back tests as recorded against a standard stock exhaust system. A new profiled surface, which influences the deep, full sound, and an integrated resonance chamber for optimum performance and befitting the sound of an Akrapovič exhaust, are all designed to ensure this system meets FIM noise limits for competition. A special technique was used for imprinting the logo on the surface: there is no sticker or engraving, but a new way of adding the logo. Developed for use on closed-course competition circuits only, it is a simple plug-and-play operation	Off-Road	Yamaha	WR450F	2024	2025	€ 1 749,15

CB-B12T1D	3831126408046	Lower Protection Bar Set (Titanium)	OP - Optional part	ABE Type Approval	Filment notice: The Lower Protection Bar Set fits also on BMW R 1250 GS Adventure model.This is the first product of its kind in the Akrapović range. It is constructed from sandblasted, lightweight titanium, fully utilizing the company's expertise in the field of titanium technology. It is designed from scratch and offers an approximately 40% weight savings over comparable steel versions, high strength, and corrosion resistance. These bars are precision TIG welded, equipped with laser-cut and finely machined 8 mm flanges to provide a perfect fit and strength. They fit perfectly with the bike's existing components and offer the possibility of attaching extra bags and fog lights or spotlights to the bar. They weigh just 3.88 kg and have no restriction on the lean angle. Fully evaluated through numerous tests and deformation analyses, the highly stable construction is partly fixed to the chassis to distribute any impact through the bars. The product is finished with an engraved logo labelled Titanium to emphasize this product's important characteristic.	Road	BMW	R 1250 GS / ADVENTURE	2019	2023	€	1 900,35
CB-B12T1U	3831126408039	Upper Protection Bar Set (Titanium)	OP - Optional part	ABE Type Approval	Filment notice: The Upper Protection Bar Set does not fit on BMW R 1250 GS Adventure model.Constructed from sandblasted, lightweight titanium, this is the first product of its kind in the Akrapović range, and it fully uses the company's expertise in titanium technology. It is designed from scratch and offers an approximately 40% weight savings over comparable steel versions, high strength, and corrosion resistance. These bars are precision TIG welded, equipped with laser-cut and finely machined 8 mm flanges to provide a perfect fit and strength. They fit perfectly with the bike's existing components and offer the possibility of attaching extra bags and fog lights or spotlights to the bar. The product weighs just 2.38 kg. Fully evaluated through numerous tests and deformation analyses, the highly stable construction is partly fixed to the chassis to distribute any impact through the bars. The bars are finished with an engraved logo prominently labelled Titanium to emphasize this product's important characteristic.	Road	BMW	R 1250 GS / ADVENTURE	2019	2023	€	1 346,85
CB-B13T1	3831126440954	Protection Bar Set (Titanium)	OP - Optional part	ABE Type Approval	This product is constructed from sandblasted 25 mm titanium tubes for lower weight and improved corrosion resistance. It is approximately 40% lighter than comparable stainless-steel versions, but it still offers the same high-strength mechanical properties. It weighs 3.02 kg, making it one of the lightest protection bar sets on the market for the BMW R 1300 GS / R 1300 GS Adventure. Developed to protect the motorbike's engine, the construction is partly fixed to the chassis to distribute any impact. It is designed to integrate with the bike's components and has been fully evaluated through numerous tests and deformation analyses. Precisely engineered with the Akrapović attention to detail, this protection bar set has no restriction on the lean angle and it meets ABE type approval. Carbon-fibre protection elements 2.5 mm thick provide structural strength and give the end user the option to change these parts if they are damaged. It is precision TIG welded and equipped with laser-cut and finely machined 10 mm flanges to provide a perfect fit and strength. The set is finished with an engraved Akrapović logo, with the word Titanium prominently displayed to emphasize the use of this material. When fitted, the protection bar set offers the option to attach extra bags and fog lights or spotlights from BMW and other manufacturers to the bars. We recommend that the Protection Bar Set (Titanium) be installed by a qualified mechanic. This product fits BMW R 1300 GS Adventure and is also compatible with BMW Option 719.	Road	BMW	R 1300 GS / ADVENTURE	2023	2025	€	1 715,85
E-A6R1	3831126409159	Optional Header (SS)	OP - Optional part		Aimed at owners looking for increased performance and weight reduction, these high-grade stainless-steel headers have a larger tube diameter than standard and, unlike the standard version, there is no catalytic converter. Developed for use on closed-course competition circuits only, this racetrack-oriented part reduces weight by 2.9 kg (56.8%) over the stock headers. When tested on the Akrapović dyno in combination with a Slip-On Line (Titanium) and compared to an Aprilia Tuareg 660 with a standard stock system, it produced an additional 4.2 kW (5.7 hp) of power at 9,500 rpm and a torque gain 4.9 Nm at 4,800 rpm, while offering a deep racing sound. No remapping is needed for this plug-and-play upgrade. When installed it renders the ECE type-approval of Slip-On Line (Titanium) invalid. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Aprilia	Tuareg 660	2022	2024	€	719,55

E-B13E1	3831126435820	Optional Header (Titanium)	OP - Optional part		Developed as an upgrade to complete a full system when paired with the Akrapović Slip-On Line (Titanium) exhaust, this header is constructed from high-grade titanium with a carbon-fibre heatshield. Intended exclusively for closed-course competition circuits only, it enhances performance and reduces weight. Tubes with a bigger diameter than the standard stock system and removal of the catalytic converter allow for enhanced gas flow. The pre-muffler offers a unique sound experience, producing a deep racing tone from the lower engine. This upgrade results in a 54.84% (3.4 kg) weight reduction compared to standard stock. When combined with the Slip-On Line (Titanium), it boosts power by 3.1 kW (4.2 hp) at 7,800 rpm and torque by 5.9 Nm at 3,000 rpm, as tested on the Akrapović dyno against a BMW R 1300 GS equipped with a standard stock system. Installation is plug-and-play, but remapping is mandatory.The optional header is also compatible with the Akrapović standard (first fit) / BMW Motorrad accessory Akrapović silencer. With installation of the Optional Header (Titanium), ECE type approval for the Slip-On Line (Titanium) is no longer valid.When installing the Optional Header on Euro5+ motorbikes (2 lambda sensors), the engine check light will appear after identifying a deviation in the stock catalytic converter's parameters.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	BMW	R 1300 GS / ADVENTUR E	2023	2025	€ 1 961,85

E-D8E2	3831126412142	Optional Header (Titanium)	OP - Optional part		Constructed from lightweight high-grade titanium, providing a weight reduction of 1.3 kg (53.4%) over the stock version, these headers have been designed with a bigger tube diameter than standard to provide power and torque gains in the mid and high rev range. When combined with the Slip-On Line (SS) exhaust, the addition of the headers results in increases of 2.3 kW (3.1 hp) at 4,640 rpm and 5.6 Nm at 4,400 rpm when tested on the Akrapovič dyno in comparison to a Scrambler using a standard setup. Developed for use on closed-course competition circuits only, this race-track-oriented part produces an even deeper and sportier sound when combined with a Slip-On Line (SS) exhaust. The plug-and-play installation means no remapping is necessary, and the headers fit the Urban Motard, Nightshift, Icon, Icon Dark, and Desert Sled versions of the Ducati Scrambler. The product is developed and tested on EU vehicle specification. Non-EU fitment may vary by marketplace and different vehicle specification. On non-EU Ducati Scramblers the previous Akrapovič Slip-On Line S-D8S04-CUBTBL/1 and optional headers E-D12E5 would fit. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Ducati	Scrambler Urban Motard/Nightshift/Icon/Icon Dark/Desert Sled	2021	2022	€ 848,70
E-H10E2	3831113586979	Optional header (Titanium)	OP - Optional part		This offers the option to upgrade the Slip-On Line muffler to a full, complete system. It is made from perfectly welded lightweight titanium tubes. It delivers improved sound when used in conjunction with the Slip-On Line, delivering a powerful racing sound that complements the bike's performance and racing pedigree. Power and torque are improved, especially from the mid-range upwards. Optional headers fit also with Akrapovič standard (first fit) silencer. For perfect performance, throttle response and durability, ECU remapping is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. E-H3S01	3831126405625	Optional Header (SS)	OP - Optional part		This optional header provides increased tuning potential when used with the Slip-On Line (Titanium) exhaust. It is constructed using high-grade stainless steel, has a thread for the lambda sensor for those planning to tune the engine electronics, and has no catalytic converter. Power is increased by 1.5 hp at 7,650 rpm, when tested on a Honda CRF300L dyno against a Honda CRF300L with a standard stock exhaust. This adds a distinctive deep and sporty sound. It features easy plug-and-play installation, and no remapping is required. This product is meant for racetrack and closed course use only. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Honda	CRF300L / Rally	2021	2024	€ 348,90
E-H6R8/1	3831126436131	Optional Header (SS)	OP - Optional part		This product is designed for use with the Slip-On Line (SS) exhaust to create a complete system constructed from race-proven, high-grade stainless steel, with a weight reduction of 10.9% (1.0 kg) when compared to the standard stock headers. The header has been optimized for enhanced performance, delivering power gains across the complete rev range. When combined with the Slip-On Line (SS), power and torque increases of 5.2 kW (7.1 hp) at 14,000 rpm and 2.7 Nm at 6,000 rpm, respectively, were registered when compared to a Honda CBR600RR equipped with a standard stock system and tested on the Akrapovič dyno. It provides a deep, sporty sound, and throughout the development process engineers focused on throttle response and rideability. The product has been designed for use on closed-course competition circuits only, and ECU remapping is recommended for optimal performance, throttle response, and durability. With the installation of the Optional Header (SS), EC/ECE type approval for the Slip-On Line (SS) is no longer valid. When installing the Optional Header on Euro4+ motorcycles (2 lambda sensors), the engine check light might appear after identifying a deviation in the stock catalytic converter's parameters. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Honda	CBR600RR	2013	2025	€ 1 220,16
E-H7R3	3831126426699	Optional Header (SS)	OP - Optional part		The Optional Header (SS) is targeted at owners looking for increased performance and weight reduction from motorcycles already equipped with an Akrapovič Slip-On Line (Carbon) exhaust. The Optional Header (SS) is constructed from high-grade stainless steel and provides a 53.5% (1.8 kg) weight saving in comparison to the standard stock header. Developed with larger diameter tubes to allow improved gas flow with less restriction, the catalytic converter of the stock header is removed to add to the flow. When fitted with the Slip-On Line (Carbon), power is increased by 1.6 kW (2.2 hp) at 9,500 rpm, with a torque increase of 3.5 Nm at 6,700 rpm when compared to a Honda CB750 Homet equipped with the standard stock exhaust system and tested on the Akrapovič in-house dyno. Producing a deep, racing sound fully encompassing the twin-cylinder engine, the Optional Header (SS) is an easy plug-and-play installation, with remapping recommended, but not mandatory. It is a racetrack-oriented part and as such is intended for use on closed-course competition circuits only. Fitting of the optional header will invalidate the EC/ECE certificate for the Slip-On Line (Carbon). THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Honda	CB750 Homet	2023	2024	€ 590,40
E-H7R4	3831126426705	Optional Header (SS)	OP - Optional part		The Optional Header (SS) is targeted at owners looking for increased performance and weight reduction from motorcycles already equipped with an Akrapovič Slip-On Line (Titanium) exhaust. The Optional Header (SS) is constructed from high-grade stainless steel and provides a 53.5% (1.8 kg) weight saving in comparison to the standard stock header. Developed with larger diameter tubes to allow improved gas flow with less restriction, the catalytic converter of the stock header is removed to add to the flow. When fitted with the Slip-On Line (Titanium), power is increased by 1.6 kW (2.2 hp) at 9,500 rpm, with a torque increase of 3.5 Nm at 6,700 rpm when compared to a Honda XL750 Transalp equipped with the standard stock exhaust system and tested on the Akrapovič in-house dyno. Producing a deep, racing sound fully encompassing the twin-cylinder engine, the Optional Header (SS) is an easy plug-and-play installation, with remapping recommended, but not mandatory. It is a racetrack-oriented part and as such is intended for use on closed-course competition circuits only. Fitting of the optional header will invalidate the EC/ECE certificate for the Slip-On Line (Titanium). THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. E-K9R2	3831113542081	Optional Header (SS)	OP - Optional part		The performance of the Slip-On Line exhausts can be further enhanced with the addition of the optional stainless-steel header. When this beautifully finished header is added to any Slip-On Line exhaust for the Z900, it turns the muffler into a complete racing system and increases power to even greater levels of enjoyment. The addition of the header will also improve the sound of the exhaust, giving it a crisper racing tone. Optional headers do not fit on Z900 A2 model. The product is developed and tested on EU vehicle specification. Non-EU fitment and performance may vary by marketplace and different vehicle specification. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Kawasaki	Z900	2017	2019	€ 880,70
E-K9R3	3831113554268	Optional Header (SS)	OP - Optional part		Built from perfectly welded, high-grade stainless-steel tubes, these headers convert the Slip-On Line muffler to upgrade it to a full system. They give the bike a true Akrapović sporty and deep sound, and increase power and torque levels throughout the entire rev range. Exhaust system is compatible with Kawasaki central stand. For perfect performance, throttle response, and durability, special mapping developed by Akrapović R&D in collaboration with our partner Rapid Bike by Dimsport is recommended. Please visit https://www.dimsport.us/en/rapid-bike/akrapovic/ , where you can download the mapping. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. L-A10E11/TD	3831126402341	Track Day Link Pipe (Titanium)	OP - Optional part		Designed for use on closed-course competition circuits, this lightweight titanium link pipe with resonator lowers the static noise level at 5,500 rpm to 100 dB when installed with the muffler and headers from the Evolution Line (Carbon) exhaust system. This track day-oriented product, which complements the Evolution Line (Carbon) without compromising power and torque gains, requires mandatory remapping when installed. Weighing 3.0 kg less – 37.2% lighter than standard stock when combined with the Evolution Line (Carbon) system muffler and headers – and offering a great sporty sound, this is an option for all serious track-day aficionados and racers alike. Static noise level of the Evolution Line (Carbon) with Track Day Link Pipe (Titanium): 100.4 dB at 5,500 rpm. Static noise level of the Evolution Line (Carbon): 103.2 dB at 5,500 rpm. Static noise level of the Evolution Line (Carbon) without noise insert: 105.5 dB at 5,500 rpm. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. L-D9SO1	3831126410230	Optional Link Pipe/Collector (SS)	OP - Optional part		Constructed from high-grade stainless steel, this newly developed link pipe replaces the stock pre-muffler, where the stock catalytic converter is located, leading to a more direct gas flow, aimed at increasing performance. Providing a huge weight reduction of 79.2% (3.8 kg) over the original link pipe, this option also increases power by 3.2 kW (4.4 hp) at 8,600 rpm and improves torque by 5.8 Nm at 4,600 rpm when fitted to a Slip-On Line (Titanium) on a Ducati DesertX and compared with the standard stock system on the Akrapovič in-house dyno. Serving up an enhanced sportier racing sound, this track oriented optional part has no EC/EEC type-approval and has been developed for use on closed-course competition circuits only. It is a simple plug-and-play installation, and remapping of the ECU is recommended. When installed, the EC/EEC type approval of the Slip-On Line (Titanium) becomes invalid. Optional Link Pipe/Collector (SS) was tested and developed together with Slip-On Line (Titanium) system. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Ducati	DesertX	2022	2024	€	325,95
L-D9SO1	3831126410230	Optional Link Pipe/Collector (SS)	OP - Optional part		Built from high-grade stainless steel, the newly developed optional link pipe is aimed at riders looking for better performance and weight reduction. Its design removes the stock pre-muffler – where the stock catalytic converter is located – allowing less restricted gas flow to aid performance in the mid and high rev range. When combined with a Slip-On Line (Titanium), the pairing enhances power by 2.8 kW (3.8 hp) at 8,600 rpm and torque rises by 3.3 Nm at 7,100 rpm (when tested on the Akrapovič dyno in comparison to a Monster using a standard stock exhaust), while setting up a deep, racing sound. Weight is reduced by 3.8 kg, which is a saving of 80% against the stock version. Developed for use on closed-course tracks and racetracks only, remapping of the ECU is recommended to get the optimum performance from this race-derived accessory. Installation of the optional link pipe (SS) makes EC/EEC type approval of the Slip-On Line (Titanium) invalid. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. L-HD12SO1	3831126408169	Optional Link Pipe (SS)	OP - Optional part		This product was developed to be used with the Slip-On Line (Titanium) for the Harley-Davidson Pan America 1250 and is intended for use on racetracks and closed courses only. Fabricated from high-grade stainless steel, the fitting of the optional link pipe removes the stock pre-muffler, benefiting from a weight reduction of an impressive 76.5% (1.9 kg) over the stock version. When installed with the Slip-On Line (Titanium) exhaust, performance is increased by 2.7 kW (3.7 hp) at 9,000 rpm and torque is boosted by 6.8 Nm at 2,900 rpm when tested on the Akrapovič in-house dyno against a bike with a standard stock exhaust. It serves up a deep racing tone, perfectly in keeping with the V-twin engine. No remapping of the ECU is required during installation. EC/EEC type approval of the Slip-On Line (Titanium) exhaust is not valid if the optional link pipe is attached. The product is developed and tested on EU vehicle specification and does not fit on the non-EU spec models. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. L-K10S07T	3831113534796	Optional Link Pipe (Titanium)	OP - Optional part		<p>Made from lightweight titanium, the optional link-pipe is designed to be used with both the Slip-On Line (Carbon) and Slip-On Line (Titanium) exhausts. It delivers an increase in power and torque, and creates an improved linear curve across the entire rev range, coupled with weight savings. When installed on the Slip-On Line (Carbon), the sound becomes louder to boost the senses, and when added to the Slip-On Line (Titanium) the unique sound is further increased, displaying the exhaust's true racing spirit. When fitting the link pipe to the Slip-On Line exhaust, the bike's ECU must be remapped. The optional noise insert should be used when the Slip-On Line (Titanium) and optional link-pipe are used in conjunction with each other. For perfect performance, throttle response, and durability, special mapping developed by Akrapović R&D in collaboration with our partner Rapid Bike by Dimsport has to be used. L-K6R13	3831126426453	Track Day Link Pipe (SS)	OP - Optional part		<p>This product is designed to be installed in combination with the Racing Line (Carbon) (S-K6R11-RC/1). It has been developed for use on race tracks with stricter noise limits (static noise level with noise insert: 96.9 dB at 7,000 rpm and static noise level without noise insert: 101.8 dB at 7,000 rpm). Constructed from high-grade stainless steel, the Track Day Link Pipe offers power and torque gains across the entire rev range above 5,000 rpm. When installed with the Racing Line (Carbon), power increased by 6.4 kW (8.7 hp) at 13,400 rpm, and torque went up by 5.9 Nm at 6,000 rpm when compared to a Kawasaki Ninja ZX-6R equipped with a standard stock system and tested on the Akrapović dyno. A deep and sporty sound is produced, and the fitment is plug-and-play, with no mandatory remapping, although this is recommended. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>	Road	Kawasaki	Ninja ZX-6R	2023	2024	€	405,90
L-K6S08/2	3831126426200	Optional Link Pipe (SS)	OP - Optional part		<p>This high-grade stainless-steel link pipe has been developed to optimize gas flow through the removal of the standard stock pre-muffler to enhance performance. A second lambda plug is incorporated into the link pipe. It reduces weight over the standard stock pipe by 79.2% (4.6 kg). It offers impressive power and torque gains in the mid and high rpm range, with increases of 2.4 kW (3.3 hp) at 6,250 rpm and 3.2 Nm at 6,250 rpm, respectively, when fitted to the Slip-On Line (Carbon) and compared to a Kawasaki Ninja ZX-6R equipped with a standard stock system and tested on the Akrapović dyno. It delivers a deep racing sound and is a plug-and-play installation with no remapping needed. FITMENT NOTICE: This product has been developed and tested for EU vehicle specifications. Non-EU fitment and performance may vary by marketplace and different vehicle specifications. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>	Road	Kawasaki	Ninja ZX-6R	2009	2025	€	276,75

L-Y10S019	3831126404253	Optional Link Pipe/Collector (Titanium)	OP - Optional part		Designed as an optional accompaniment for further exhaust-tuning capabilities for the Slip-On Line (Titanium) exhaust system, this fully titanium link pipe removes the stock pre-muffler. Installed with the Slip-On Line (Titanium), it provides the bike with power and torque gains of 1.4 kW (3.2 hp) at 10,700 rpm and 4.8 Nm at 5,700 rpm when measured on the Akrapović dyno against a Yamaha MT-10 with a standard stock exhaust system. Along with a deep racing sound, this item delivers a huge weight savings of 88.3% (7.3 kg) over the stock part. It has been developed for use on closed-course competition circuits, meaning that installation of this track-oriented system will invalidate the ECE/EEC type-approval certificate of the Slip-On Line (Titanium). ECU remapping is mandatory during installation to obtain optimal functionality.Exhaust can also be mounted on MT-10 SP and MT-10 Tourer Edition models.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	MT-10/FZ-10	2022	2024	€ 905,11
L-Y10S06	3831095009619	Optional Link Pipe (SS)	OP - Optional part		The Y-connecting tube replaces the stock Y-connecting tube where the catalytic converter is located. The catalytic converter cannot be mounted in the Akrapović Y-connecting tube. The link pipes and the Y-connecting tube are attached with sleeve joints secured with metal tensioning springs, as is the joint between the Y-connecting tube and the collector. P-HSD8E2	3831113523875	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Akrapović carbon fibre heat shield to replace stock heat shield.	Road	Ducati	Hyperstrada	2013	2018	€	104,40
P-HSD9SO3	3831126408992	Heat Shield (Carbon)	OP - Optional part	W/O Approval	The optional heatshield adds a unique touch to the overall look of the Akrapović Slip-On Line (Titanium) exhaust. Constructed from handmade, forged, carbon fibre – a material and process rarely seen in the motorcycle sector – this beautifully designed product replaces the standard aluminium version, which can still be fitted with the Slip-On Line (Titanium) if desired. It also creates a perfect visual conclusion to the individually designed exhaust system.	Road	Ducati	Monster	2021	2025	€	165,80
P-HSH10R3	3831095060214	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Akrapović carbon fibre heat shield to replace stock heat shield. Cannot be used in combination with the optional link pipe L-H10S05L/1.	Road	Honda	CB1000 R	2008	2016	€	181,33
P-HSH10R5	3831126434953	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Evolution / Racing Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield. This optional extra adds a further touch of prestige to the Honda CBR1000RR-R Fireblade.	Road	Honda	CBR1000RR-R Fireblade / SP	2024	2025	€	129,35
P-HSH125R1	3831113568807	Heat Shield (Carbon)	OP - Optional part	W/O Approval	A hand-crafted carbon fibre heat shield is available as an option to replace the stock version. It will add to the overall appearance of the exhaust and the bike.	Road	Honda	Monkey	2019	2025	€	197,64
P-HSH125SO1	3831126403386	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heatshield. This optional extra adds a further touch of personalization to the MSX 125 / Grom.	Road	Honda	MSX125 / Grom	2021	2025	€	116,03
P-HSH7SO2	3831126427412	Heat Shield (Carbon)	OP - Optional part	W/O Approval	To add to the collection, a new Optional Heat Shield (Carbon) has been released to fit the Akrapović Slip-On (Carbon) exhaust. Made to the same exacting standards as the exhaust, this hand-made heat shield provides a racing look and ensures the rider and his equipment are protected from heat. It is a simple plug-and-play installation.	Road	Honda	CB750 Hornet	2023	2025	€	116,03
P-HSH7SO3	3831126428846	Heat Shield (Carbon)	OP - Optional part	W/O Approval	To add to the collection, a new Optional Heat Shield (Carbon) has been released to fit the Akrapović Slip-On (Carbon) exhaust. Made to the same exacting standards as the exhaust, this hand-made heat shield provides a racing look and ensures the rider and his equipment are protected from heat. It is a simple plug-and-play installation.	Road	Honda	XL750 Transalp	2023	2025	€	116,03
P-HSIN12E1	3831113583053	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Akrapović carbon fibre heat shield is designed to replace the stock heat shield. It can be used on Akrapović or stock headers.	Road	Indian	FTR 1200 / S	2019	2020	€	182,42
P-HSK10R4	3831095094325	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Akrapović carbon fibre heat shield to replace stock heat shield.	Road	Kawasaki	Versys 1000	2012	2018	€	166,31
P-HSK10R5	3831113514927	Heat Shield Set (Carbon)	OP - Optional part	W/O Approval	Akrapović carbon fibre heat shield replaces stock heat shield.	Road	Kawasaki	Z1000	2014	2020	€	278,80
P-HSK10SO4	3831113584340	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon fibre heat shield. This optional extra adds a further touch of prestige to the Ninja 1000SX.	Road	Kawasaki	Ninja 1000SX	2020	2025	€	130,55
P-HSK10SO4	3831113584340	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon fibre heat shield. This optional extra adds a further touch of prestige to the Ninja 1000SX.	Road	Kawasaki	Ninja 1100SX	2025	2025	€	130,55
P-HSK3SO1	3831113549240	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Akrapović carbon fibre heat shield to replace stock heat shield.	Road	Kawasaki	Versys-X 250/300	2017	2020	€	130,55
P-HSK4SO5	3831126416201	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield.	Road	Kawasaki	Ninja 400	2019	2025	€	104,55
P-HSK4SO5	3831126416201	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield.	Road	Kawasaki	Ninja 500 / Z500	2024	2025	€	104,55
P-HSK4SO5	3831126416201	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield.	Road	Kawasaki	Z400	2019	2025	€	104,55
P-HSK9SO1	3831113542098	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon fibre heat shield. This optional extra adds a further touch of prestige to the Z900. The carbon fibre heat shield can be used when mounting every Slip-On system for the Kawasaki Z900 A2 (when the optional header is not used).	Road	Kawasaki	Z900	2017	2024	€	144,40
P-HSK9SO1	3831113542098	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon fibre heat shield. This optional extra adds a further touch of prestige to the Z900. The carbon fibre heat shield can be used when mounting every Slip-On system for the Kawasaki Z900 A2 (when the optional header is not used).	Road	Kawasaki	Z900 (A2)	2018	2024	€	144,40
P-HSS10SO3	3831126401986	Heat Shield (Carbon)	SO - Slip-On	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield. This product fits on GX models without original Suzuki centre stand.	Road	Suzuki	GSX-S1000 / 1000GT / 950	2021	2025	€	217,71
P-HSS10SO3	3831126401986	Heat Shield (Carbon)	SO - Slip-On	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield. This product fits on GX models without original Suzuki centre stand.	Road	Suzuki	GSX-S1000GX	2024	2025	€	217,71
P-HSS10SO3	3831126401986	Heat Shield (Carbon)	SO - Slip-On	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield. This product fits on GX models without original Suzuki centre stand.	Road	Suzuki	Katana	2021	2025	€	217,71

P-HSS10S04	3831126432461	Heat Shield (Carbon)	SO - Slip-On	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield. This heat shield fits only on vehicle with stock central standing installed.	Road	Suzuki	GSX-S1000GX	2024	2025	€	136,22
P-HST12S03	3831113578431	Heat Shield (SS)	SO - Slip-On	W/O Approval	Mandatory heat shield for Bonneville T120. To be used with slip-on system S-T12S04-HCQT.	Road	Triumph	Bonneville T120	2016	2020	€	96,95
P-HST12S04	3831113578448	Heat Shield (SS)	SO - Slip-On	W/O Approval	Mandatory heat shield for Bonneville T100. To be used with slip-on system S-T12S04-HCQT.	Road	Triumph	Bonneville T100	2017	2020	€	96,95
P-HST6R1	3831126410384	Heat Shield (SS)	OP - Optional part	W/O Approval	Finish off the look of the Racing Line exhaust with this perfectly constructed black coated stainless steel heatshield with Akrapović logo engraving. This optional extra adds a further touch of prestige to the Triumph Trident 660.	Road	Triumph	Daytona 660	2024	2025	€	92,25
P-HST6R1	3831126410384	Heat Shield (SS)	OP - Optional part	W/O Approval	Finish off the look of the Racing Line exhaust with this perfectly constructed black coated stainless steel heatshield with Akrapović logo engraving. This optional extra adds a further touch of prestige to the Triumph Trident 660.	Road	Triumph	Tiger Sport 660	2024	2025	€	92,25
P-HST6R1	3831126410384	Heat Shield (SS)	OP - Optional part	W/O Approval	Finish off the look of the Racing Line exhaust with this perfectly constructed black coated stainless steel heatshield with Akrapović logo engraving. This optional extra adds a further touch of prestige to the Triumph Trident 660.	Road	Triumph	Trident 660	2021	2025	€	92,25
P-HSY10S06	3831126404260	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heatshield. This optional extra adds a further touch of personalization to the MT 10. A fully carbon-fibre heat shield replaces the stock aluminium version in this first use of forged carbon fibre in an Akrapović product for the motorcycle sector. Reducing weight on the standard part by more than 54%, this simple-to-install upgrade offers a new dimension to the Slip-On Line (Titanium) exhaust system when mounted. It is simple to fit, and it creates a distinctive and integrated look for the bike and the entire system.	Road	Yamaha	MT-10/FZ-10	2022	2024	€	157,42
P-HSY3S01	3831113572873	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Akrapović carbon fibre heat shield to replace stock heat shield. It can be used with Slip-On Line (SS) - S-Y2S011-AHCSS and Slip-On Line (Carbon) - S-Y2S016-HAPC. S-Y2S012-HAPC.	Road	Yamaha	R3	2015	2021	€	139,09
P-HSY3S01	3831113572873	Heat Shield (Carbon)	OP - Optional part	W/O Approval	Akrapović carbon fibre heat shield to replace stock heat shield. It can be used with Slip-On Line (SS) - S-Y2S011-AHCSS and Slip-On Line (Carbon) - S-Y2S016-HAPC. S-Y2S012-HAPC.	Road	Yamaha	YZF-R25	2014	2021	€	139,09
P-KAT-006/3	3831095053865	Catalytic converter	OP - Optional part		Akrapović uses performance-oriented catalytic converters that give you all the sound and performance upgrades you're used to with Akrapović exhaust systems. The catalytic converter is a honeycomb metal structure that incorporates precious metals (palladium, rhodium, and platinum) into its surface. These metals convert the poisonous carbon monoxide and unburned hydrocarbons found in exhaust gases into non-toxic carbon dioxide and water vapor. Catalytic converter fits on following exhaust systems S-B12R2-HRC, S-B12R2-HRT, S-B12RFT2TL-HRC and S-B12RFT2TL-HRT.	Road	BMW	K 1200 R	2005	2008	€	158,60

P-KAT-081	3831113587327	Catalytic converter	OP - Optional part		Akrapovič uses performance-oriented catalytic converters that give you all the sound and performance upgrades you're used to with Akrapovič exhaust systems. The catalytic converter is a honeycomb metal structure that incorporates precious metals (palladium, rhodium, and platinum) into its surface. These metals convert the poisonous carbon monoxide and unburned hydrocarbons found in exhaust gases into non-toxic carbon dioxide and water vapor.	Road	Kawasaki	Ninja ZX-25R	2020	2022	€	625,89

S-A10E9-RC	3831113596817	Evolution Line (Carbon)	EV - Evolution		The combination of race-proven, lightweight materials, exceptional production quality, perfect design, amazing sound, and top performance makes this exhaust a must-have for discerning riders that demand the best. It is constructed with a carbon-fibre muffler outer sleeve and end cap, with a fully titanium link pipe and inner muffler structure, matched to high-grade titanium alloy for the headers and collectors, resulting in a full system that is 44% lighter than stock. Developed for use on closed-course competition circuits, this racing track-oriented system requires mandatory remapping and removal of the passenger footrest. It delivers increases of power and torque of 4.0 kW (5.4 hp) at 13,000 rpm and 3.8 Nm at 7,700 rpm when measured in back-to-back comparisons against an Aprilia RSV4 with a standard stock system on the in-house dyno. This race-developed system delivers a distinctive deep, sporty sound, perfectly endorsing the Akrapovič character. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Aprilia	RSV4	2021	2024	€ 3 137,89
S-A10E9-RC	3831113596817	Evolution Line (Carbon)	EV - Evolution		The combination of race-proven, lightweight materials, exceptional production quality, perfect design, amazing sound, and top performance makes this exhaust a must-have for discerning riders that demand the best. S-A10SO13-RC	3831113596824	Slip-On Line (Carbon)	SO - Slip-On		Race-proven materials and sporty design have led to an exhaust that is the perfect introduction to the exhaust tuning process. The carbon-fibre muffler outer sleeve and end cap are stylishly shaped for a visual impact, and the use of lightweight titanium for the link pipe and inner structure means this system weighs in at 3.5 kg lighter than stock, for an impressive savings of 62.4%. This exhaust has been developed for use on closed-course competition circuits, and it delivers track performance to match that demand. Power is increased by 3.6 kW (4.9 hp) at 13,000 rpm and torque up by 4.5 Nm at 7,600 rpm when compared in back-to-back tests on the Akrapovič dyno with an Aprilia RSV4 with a standard stock exhaust. To match the performance and style, the Slip-On Line (Carbon) system serves up a deep and vivid sound, full of Akrapovič character, to totally encapsulate the Aprilia engine. To obtain optimum performance, throttle response, and durability, remapping is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Aprilia	RSV4	2021	2024	€ 1 101,19
S-A10SO13-RC	3831113596824	Slip-On Line (Carbon)	SO - Slip-On		Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. Sporty and lightweight Slip-On Line exhaust systems are a perfect match for this great Aprilia. Installation is a snap. The visual change comes with stylishly shaped carbon fibre muffler and end cap. In addition to design effects and improved power delivery, Slip-Ons also enhance the Aprilia sound. Let your bike stand out with more power, beautiful design, and the unique Akrapovič sound of Slip-Ons. For perfect performance, throttle response and durability remapping is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Aprilia	TUONO V4	2021	2024	€ 1 101,19

S-A6R4-HAPC	3831113596329	Racing Line (Carbon)	RC - Racing	EC Type Approval, ECE Type Approval	Designed to optimize power and torque from the 660 cc parallel-twin powerplant, this system meets EC/ECE type approval, making it fully Euro 5 compliant. With the catalytic converter located in the front part of the pre-muffler, to ensure the system fully complies with the regulation, the system has a plug-and-play installation with no remapping needed. Constructed from high-quality carbon fibre, lightweight titanium, and high-grade stainless steel, the system has been created using race-proven materials. Designed to emphasize the racing look of the machine, the system is 0.4 kg lighter than standard stock. Testing on the Akrapovič in-house dyno, in back-to-back runs of bikes equipped with a Racing Line (Carbon) exhaust and standard stock exhaust system, recorded an increase of 2.4 hp at 11,200 rpm and a gain of 3.6 Nm of torque at 4,550 rpm, which gives the rider a pronounced throttle response. Its deep, full, and sporty sound, with its throbbing parallel-twin pulsations, offers the feeling of riding a bigger capacity bike, making the Akrapovič Racing Line (Carbon) for the Aprilia RS 660 the ideal exhaust for this middleweight sports bike. S-A6S01-HGJT	3831126409142	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Utilizing the latest muffler design shape as featured in the Adventure range of exhausts, this system is constructed from high-grade lightweight titanium for the muffler outer sleeve with a stainless-steel link pipe and muffler inner structure, creating a weight reduction of 1.9 kg (36.5%) over the stock system. The exhaust also features a hand-made carbon-fibre end cap and carbon-fibre heatshield, which offers added protection to the rider's gear. These provide a perfect look to the exhaust, which is then finished off with an attractive monochrome Akrapovič sticker. Power gains of 0.9 kW (1.2 hp) and torque gains of 2.1 Nm, both at 4,800 rpm, have been achieved when tested on the Akrapovič dyno and compared to an Aprilia Tuareg 660 with a standard stock system, delivering increased performance, perfect throttle response, and rideability. With a deep, sporty, and vivid sound, this exhaust is EC/ECE type-approved and needs no remapping – it is just an easy plug-and-play installation. This exhaust can be further upgraded with an Optional Header (SS) for those in search of higher performance and the unique sound experience of an Akrapovič exhaust. Installation of the Optional Header (SS) makes the EC/ECE type-approval of the Slip-On Line (Titanium) invalid.	Road	Aprilia	Tuareg 660	2022	2024	€ 953,55

S-B10SO16-HZC	3831113597869	Slip-On Line (Carbon)	SO - Slip-On	EC Type Approval, ECE Type Approval	This updated design uses race-proven materials in the construction of the system, with a high-grade lightweight titanium link pipe, titanium inner muffler structure, and new style of end cap all matched to a carbon-fibre outer muffler sleeve, which has created an exhaust that is over 23% lighter than the standard stock version. A full and intense sound is emitted when the machine is idling, offering a deep, full tone with a distinctive Akrapovič character when on the move. The Akrapovič Slip-On Line (Carbon) exhaust upgrade is achievable through a combination of two choices of optional headers – titanium and stainless steel – which are available with an optional noise insert for those who want to combine the system with the headers. This ECE-approved and Euro5-compliant product has a simple plug-and-play installation process with no remapping necessary. Installing the available optional headers invalidates the ECE type-approval certificate. The ECE type-approved certificate is not valid for M 1000 R model. S-B10SO7-HZDFT	3831113544214	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	The Akrapovič Slip-On Line exhaust system for the BMW S 1000 XR represents the first step in tuning and gives a great balance between price and performance. The Slip-On Line changes the nature of the bike by adding more power, removing weight, delivering improved performance and giving the machine an unmistakable Akrapovič sound. The newly-designed exhaust muffler is shaped to fit seamlessly with the bike's lines, making the result a beautifully crafted, eye-catching system. The outer sleeve is made of titanium, which is complemented by a carbon-fibre heat-shield and end cap, all developed out of Akrapovič's involvement with race-proven technology. Exhaust system is compatible with BMW side cases.	Road	BMW	S 1000 XR / M 1000 XR	2015	2019	€ 1 393,91
S-B10SO8-CUBT	3831113545365	Slip-On Line (Titanium)	SO - Slip-On		Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. Change the nature of your bike by adding more power, improved performance, and the unique Akrapovič sound. Everything packed in stylishly designed Slip-On exhaust systems. The GP-styled Slip-On Line system is a high-performance system for race-oriented riders. Made from titanium, a race-proven material. The exhaust system modification results in a boost in performance and noticeable weight reduction. The product is developed and tested on EU vehicle specification. Non-EU fitment and performance may vary by marketplace and different vehicle specification. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. S-B12SO25-HISSBBL	3831126429836	Slip-On Line (SS)	SO - Slip-On	EC Type Approval, ECE Type Approval	With its neo-retro styling, this exhaust features black-coated double conical mufflers constructed from high-grade stainless steel with a lightweight titanium link pipe. The design and lines of the exhaust have been specially developed to integrate with the bike, and the system is finished with a sandblasted stainless-steel heatshield to protect the rider's equipment and a laser-engraved Akrapović logo on the muffler for a classy and refined look. During the development phase, the engineers focused on throttle response and rideability, with performance enhanced by a 0.9 kW (1.2 hp) increase in power and a torque gain of 1.6 Nm, both at 6,200 rpm, when compared to a BMW R 12 nineT equipped with a standard stock system and tested on the in-house dyno. Weight is reduced by 10.6% over the stock exhaust, and the Slip-On Line (SS) delivers a deep and sporty sound, which meets type approval for an ECE certificate. This exhaust is a plug-and-play installation that requires no remapping. The exhaust system also fits on the BMW R 12 standard version.	Road	BMW	R 12 nineT / R 12	2024	2025	€ 994,50

S-B13SO4-HJGT	3831126428969	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Developed exclusively for the BMW R 1300 GS from years of experience working with the BMW GS range and its boxer engines. A double flow muffler constructed from lightweight titanium and a handmade carbon-fibre end cap gives a weight saving of 9.3% over standard stock. Created for improved performance and enhanced sound silencing, which mitigates the impact on the environment, whilst delivering a deep, full sound. A special profiled surface on the muffler adds strength and durability and is finished with an engraved logo. Power and torque increases of 1.4kW (1.9hp) at 7.600rpm and 4.5Nm at 2.300rpm. These figures were obtained in back-to-back runs on the Akrapović dyno against a BMW R 1300 GS using a standard stock exhaust. EC/ECE-type approval, simple plug and play installation with no remapping required. Once installed the system is all fully compatible with BMW Motorrad's side cases.	Road	BMW	R 1300 GS / ADVENTUR E	2024	2025	€ 1 076,40

S-CF4SO1-APC	3831126435233	Slip-On Line (Carbon)	SO - Slip-On		This product is designed with an attractive racing look featuring a short muffler constructed with a handmade carbon-fibre outer sleeve and end cap. Race-proven materials, including a high-grade stainless-steel link pipe and muffler inner structure, result in a weight saving of 64.9% (2.6 kg) over the standard stock exhaust. The engineers' aim during development was to achieve the best possible throttle response while also focusing on aesthetics, sound, and weight reduction. Designed for use on closed-course competition circuits, the Slip-On Line (Carbon) delivers a deep racing tone and has plug-and-play installation, with no remapping required. An optional aluminium muffler bracket is also available, which eliminates the use of the stock passenger footpegs. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	CFMOTO	450SR / 450NK	2024	2025	€ 532,35
S-CF8SO1-HAPLC	3831126434144	Slip-On Line (Carbon)	SO - Slip-On	EC Type Approval, ECE Type Approval	This product has a compact racing-inspired look that seamlessly integrates with the bike's lines and colour scheme. It is constructed from race-proven materials, including a carbon-fibre muffler outer sleeve and muffler clamp, a titanium end cap, and a stainless-steel link pipe. This creates a weight saving of 30.6% (0.9 kg) compared to the standard stock system and produces a deep sporty tone that highlights the 799 cc two-cylinder engine. The development process focused on throttle response and rideability. It delivers performance gains, particularly in the mid and top rpm ranges, with increases of 1.3kW (1.7 hp) in power and 2.5 Nm of torque at 4,900 rpm, as tested on Akrapovič's in-house dyno and when compared to a CFMOTO 800NK equipped with a standard stock exhaust system. It is ECE/ECE type approved and can be easily installed without the need for remapping.	Road	CFMOTO	800NK	2023	2025	€ 783,90

S-D6SO2-HAPLT	3831126432478	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	This product is designed to integrate perfectly with the lines of the bike. It is constructed from high-grade sandblasted titanium for the muffler outer sleeves, stainless-steel link pipes, and carbon-fibre end caps with imprints. The twin muffler configuration – one exiting on either side of the seat – is finished with honeycomb exhaust protection within the end caps, as seen on many Akrapovič-supported racing motorcycles, including Grand Prix machinery. The engineers focused on throttle response and rideability throughout the development process, while also providing enhanced performance. When tested on the Akrapovič dyno against a Ducati Hypermotard 698 Mono equipped with a standard stock exhaust system, the exhaust provided power and torque increases of 2.9 kW (3.9 hp) at 10,000 rpm and 1.9 Nm at 6,800 rpm, respectively. A deep and rich sound perfectly balances the bike's single-cylinder engine. Race-proven material creates a weight reduction of 0.2 kg (4.3%) in comparison to the standard stock exhaust system. This product is fully EC/ECE type approved and Euro5+ compliant, with simple plug-and-play installation. This product does not fit in combination with Ducati optional aluminium number plate holder (Part no. 97352111AA). The pictures of the motorbike show the Slip-On Line (Titanium) in combination with the optional header (not available yet).	Road	Ducati	Hypermotard 698 Mono / RVE	2024	2025	€ 1 164,15

S-D8SO4-CUBTBL/1	3831113582636	Slip-On Line (Titanium)	SO - Slip-On		Featuring a full titanium link pipe and no pre-muffler, this beautifully shaped exhaust is perfectly matched to the character of the engine and delivers a sharper sound. With a strong power gain through the entire rpm range, improved torque, and reduced weight, this exhaust is sure to take the Monster 797 to the next performance level. The unique exhaust system, with its Grand Prix-inspired conical pipes, imparts a powerful classic appearance, and the outer sleeves are coated black for a sporty, uncompromising look. Specially designed removable noise-reduction inserts have been created to give the bike a dual character and offer a choice between two different soundtracks for the machine. With the inserts in place, the exhaust system is suitable for everyday use, but when removed the sound levels rise, making it perfect for special occasions. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Ducati	Monster 797/797+/859	2017	2020	€ 1 065,94

S-D8SO6-ISSBL	3831126412128	Slip-On Line (SS)	SO - Slip-On		Featuring a completely new design, this system has a double conical muffler and link pipe that perfectly integrate with the bike's style. Constructed from high-grade stainless steel with black-coated mufflers, the exhaust is finished with a laser-engraved Akrapovič logo. Weighing just 3.0 kg, 55.8% lighter than the standard stock system, it has been developed for use on closed-course competition circuits only. Its racetrack-oriented design increases power by 1.6 kW (2.2 hp) at 8,600 rpm and torque by 3.0 Nm at 4,500 rpm when tested on the Akrapovič dyno and compared to a Scrambler with a standard stock exhaust, and it serves up a deep, sporty, and vivid sound. A simple plug and play installation with no remapping required, the system fits on the Urban Motard, Nightshift, Icon, Icon Dark, and Desert Sled versions of the Ducati Scrambler. The exhaust can be further enhanced with the addition of optional headers, and an optional carbon-fibre heatshield is also available. For those clients installing the exhaust system on Desert Sled model, it is mandatory to buy the original Ducati mount kit 96481551A. The product is developed and tested on EU vehicle specification. Non-EU fitment may vary by marketplace and different vehicle specification. On non-EU Ducati Scramblers the previous Akrapovič Slip-On Line S-D8SO4-CUBTBL/1 and optional headers E-D12E5 would fit. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Ducati	Scrambler Urban Motard/Nightshift/Icon/Icon Dark/Desert Sled	2021	2022	€ 1 035,45
S-D9SO10-HIFFT	3831113549028	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. The Grand Prix-inspired twin conical mufflers are made entirely from titanium, a race-proven material. Beautifully finished with a carbon-fibre heatshield, the exhaust offers an increase in performance and a deeper, more rewarding sound, while meeting EC-ECE type approval. Exhaust system can be fitted with Ducati side cases and central stand.	Road	Ducati	Multistrada 1200 Enduro	2017	2018	€ 995,78
S-D9SO10-HIFFT	3831113549028	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. S-D9SO15-HCBT	3831126403799	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Constructed using high-grade titanium, the type-approved Slip-On Line exhaust will provide a solid power gain across the rev range. The use of race-inspired materials will also reduce weight, leading to improved handling and manoeuvrability. Using specially designed mufflers, with their origins in the racing world with Grand Prix-inspired twin conical pipes this exhaust really means business.Filment notice: This product fits also on Ducati Hypermotard 950 RVE model.	Road	Ducati	Hypermotard 950 / 950 SP	2019	2024	€ 1 079,61
S-D9SO17-HCQT	3831126410223	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	This product features two short mufflers, designed to emphasize the bike's twin-engine configuration. The outer sleeves and collector are constructed from lightweight titanium, which are sandblasted for an optimal finish and visual appeal. The remaining parts are fabricated from high-grade stainless steel. This Euro 5 EC/ECE type-approved exhaust is a simple plug-and-play installation with no remapping involved. Serving up a deep and dynamic sound to highlight the bike's engine, the power is increased by 1.8 kW (2.2 hp) at 8,800 rpm, with torque rising by 3.5 Nm at 3,100 rpm (when tested on the Akrapovič dyno in comparison to a Monster using a standard stock exhaust).An optional handmade, forged, carbon-fibre heatshield is available to provide an exclusive finishing touch to the exhaust. Designed to replace the stock aluminium version – which can still be fitted with the Akrapovič Slip-On Line (Titanium) – this heatshield is a very rare product in the motorcycle world. An optional link pipe made from stainless steel is also available, designed to raise power and torque levels, reduce weight, and increase gas flow. The Akrapovič Slip-On Line (Titanium) Exhaust System and Heat Shield (Carbon) for the Ducati Monster and Monster + has been awarded the highly prestigious 2022 Red Dot Award for Product Design Installation of the optional link pipe (SS) makes EC/ECE type approval of the Slip-On Line (Titanium) invalid. S-D9SO18-HIFFT	3831126412852	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. The Grand Prix-inspired twin conical mufflers are made entirely from titanium, a race-proven material. Beautifully finished with a carbon-fibre heatshield, the exhaust offers an increase in performance and a deeper, more rewarding sound, while meeting EC-ECE type approval.Exhaust system can be fitted with Ducati side cases and central stand.	Road	Ducati	Multistrada 950 / 950 S / V2 / V2 S	2021	2024	€ 990,78
S-D9SO19-HJAT	3831126416454	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	The muffler outer sleeve is made from high-grade titanium, with a stainless-steel link pipe and muffler inner structure. Finished with a carbon-fibre end cap and heatshield, this exhaust reduces weight by 33.4% (1.1 kg). The new design offers great durability and personalization for the motorcycle. With a heatshield that has been totally designed from scratch, the package provides passenger and gear protection, while delivering a unique appearance. Power gains of 1.8 kW (2.4 hp) at 9,400 rpm and torque increases of 1.8 Nm at 8,100 rpm – when compared to a Ducati DesertX equipped with the standard stock system and tested on the Akrapovič in-house dyno – combine with a perfect throttle response. A deep, vivid, and sporty sound is emitted from the exhaust, which has an EC/ECE type-approval certificate and is a simple plug and play installation with no remapping needed.A further upgrade can be obtained with the addition of the optional link pipe, designed for increased performance and a sportier sound experience.Installation of the optional link pipe (SS) makes EC/ECE type approval of the Slip-On Line (Titanium) invalid. S-H10SO16-WT	3831113542364	Slip-On Line (Titanium)	SO - Slip-On		This Slip-On Line exhaust is manufactured to withstand the harshest of conditions and has been developed from Akrapovič's winning involvement in cross-country rallies. Offered alongside the EC/EE type-approved system for the Africa Twin, this superbly designed and finished exhaust has an even deeper sound that creates a stunning sound as the throttle opens and the revs rise. Manufactured with a unique combination of a hexagonal shape and a more classic rear endcap, this double-flow muffler is finished in durable titanium and supplied with a robust carbon-fibre clamp to cope with the extreme conditions it is designed to face. Delivering performance increases throughout the entire rev range this exhaust makes the most of the Honda's thumping twin-cylinder engine. An even greater power increase can also be achieved with the addition of the optional stainless-steel headers to take the performance to higher levels.﻿Exhaust system is compatible with Honda side cases and central stand.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. S-H125SO1-HAPC	3831113521123	Slip-On Line (Carbon)	SO - Slip-On	EC Type Approval, ECE Type Approval	The Akrapovič Slip-On exhaust system is designed for riders who do not want to make major modifications to their stock exhaust system. However, the Slip-On exhaust delivers great looks as well as increased performance for the bike.	Road	Honda	MSX125 / Grom	2013	2015	€ 554,39

S-H125SO4-ASZTBL	3831126403379	Slip-On Line (Titanium)	SO - Slip-On		Featuring a new design, perfectly sculpted to follow the lines of the bike and offer a racing look, the Slip-On Line's innovative conical muffler is black and has a laser-engraved logo for increased visual effect. Produced using race-proven materials, the end cap and the outer sleeve are lightweight titanium, and high-grade stainless steel is utilized for the link pipe, giving the exhaust a weight savings of over 36% compared to the standard stock version. A clear enhancement in performance is achieved through the exhaust, with perfect throttle response across the rev range and power gains of 5.8% at 8,500 rpm, with torque increased by 4.3% at 5,350 rpm when tested on the Akrapovič dyno against a Honda MSX 125 with a standard stock exhaust. All of this is allied with the distinctive deep Akrapovič sound. It features easy plug-and-play installation, and no remapping is required. This exhaust is meant for racetrack and closed course use only. An optional stainless-steel header and carbon-fibre heatshield are also available. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Honda	MSX125 / Grom	2021	2025	€ 709,32
S-H125SO5-FFT	3831126408411	Slip-On Line (Titanium)	SO - Slip-On		This beautifully shaped exhaust perfectly matches the Monkey's unique character. The twin conical mufflers are constructed from stainless steel, featuring muffler sleeves in titanium, a race-proven material. The exhaust system offers power gains through the entire rpm range and reduced weight, and it delivers a deep and powerful sound, but classic appearance can be further enhanced by adding the specially designed carbon-fibre heat shield. An optional header in stainless steel is available for an upgrade to a full system. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. S-H2SO6-APC	3831113545570	Slip-On Line (Carbon)	SO - Slip-On		Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. Change the nature of your bike by adding more power, improved performance, and the unique Akrapovič sound. Everything packed in stylishly designed Slip-On exhaust systems. The result of taking design very seriously is a beautifully crafted exhaust system with a carbon fibre muffler outer sleeve and end cap. Race-proven materials. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Honda	CBR250RR	2017	2025	€ 543,63
S-H3SO10-BNTA	3831126405618	Slip-On Line (Titanium)	SO - Slip-On		Featuring a new design, perfectly sculpted to follow the lines of the bike and offer a racing look. Produced using race-proven materials, the end cap and the outer sleeve are lightweight titanium, and high-grade stainless steel is utilized for the link pipe, giving the exhaust a weight savings of over 49% compared to the standard stock version. A clear enhancement in performance is achieved through the exhaust, with perfect throttle response across the rev range and power gains of 1,3 hp at 5,100 rpm, with torque increased by 1.8 Nm at 5,100 rpm when tested on the Akrapovič dyno against a Honda CRF300L with a standard stock exhaust. All of this is allied with the distinctive deep Akrapovič sound. It features easy plug-and-play installation, and no remapping is required. This exhaust is meant for racetrack and closed course use only. An optional stainless-steel header is also available. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Honda	CRF300L / Rally	2021	2024	€ 761,38
S-H3SO3-RC	3831113518710	Slip-On Line (Carbon)	SO - Slip-On		The Akrapovic Slip-On exhaust system is designed for riders who do not want to make major modifications to their stock exhaust system. However, the Slip-On exhaust delivers great looks as well as increased performance for the bike. The system fits also on Honda CBR 250R 2014-2015 that is sold in Japan. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Honda	CBR300R	2014	2016	€ 658,56

S-H5S05-HRC	3831126430498	Slip-On Line (Carbon)	SO - Slip-On	EC Type Approval, ECE Type Approval	This stylishly designed exhaust has been exclusively modelled to integrate perfectly with the lines of the bike. Comprised of a carbon-fibre muffler outer sleeve and end cap, with a high-grade stainless-steel link pipe and inner muffler structure, the system saves 48.8% (2 kg) in weight when compared with the standard stock exhaust system. With a vivid and deep soundtrack that embodies the feeling of the twin engine, the performance and torque are also increased by 0.6 kW (0.8 hp) at 7,450 rpm and 0.8 Nm at 4,600 rpm, respectively, when tested on the Akrapovič dyno and compared to a Honda CB500 Hornet equipped with a standard stock system. This exhaust has a simple plug-and-play installation with no remapping required and is fully compliant with Euro5+ EC/ECE approval. **Additional fitment notice: This product has been developed and tested on a motorcycle with EU specifications. Non-EU fitment and performance may vary by marketplace and different vehicle specifications.	Road	Honda	CB400/500X	2016	2025	€ 721,23

S-H6E5-ACT	3831126434717	Evolution Line (Titanium)	EV - Evolution		This is a full system constructed from high-grade lightweight titanium and finished with a carbon-fibre end cap. The headers have been optimized to increase performance. This track-oriented exhaust system mainly focuses on weight reduction and increased performance, allied to a racing sound. The use of race-proven materials results in a weight reduction of 52.6% (4.7 kg) over the standard stock exhaust system. It delivers power and torque increases of 5.2 kW (7.1 hp) at 14,000 rpm and 2.7 Nm at 6,000 rpm, respectively, when compared to a Honda CBR600RR equipped with a standard stock system and tested on the Akrapovič dyno, with power gains noticeable in the mid and high rev ranges. During development, the engineers focused on throttle response and rideability for a system that has been designed for use on closed-course competition circuits only. ECU remapping is recommended for optimal performance, throttle response, and durability. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Honda	CBR600RR	2013	2018	€ 2 299,05

S-H6SO17-HACT	3831126431877	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	This product is created and designed using race-proven materials, with a high-grade lightweight titanium muffler, stainless-steel link pipe, and carbon-fibre end cap. It provides performance gains predominately in the mid and high rev ranges, with a power increase of 1.0 kW (1.4 hp) at 7,600 rpm and a torque increase of 1.0 Nm at 7,500 rpm, when compared to a Honda CBR600RR equipped with a standard stock exhaust system and tested on the Akrapovič dyno. Lightweight materials provide a weight reduction of 35.9% (1.6 kg) against the standard stock exhaust. The development stages intensely focused on throttle response and rideability, and the sound pattern serves up a deep and sporty tone. The EC/ECE type-approval certificate (Euro5+) with no remapping required means it is a simple plug-and-play installation. The exhaust is compatible with Honda original soft panniers. A further upgrade of the Slip-On Line (Titanium) system is available through the optional Header (SS). Designed for closed-course competition circuits, installation of the Optional Header (SS) means that the EC/ECE type approval for the Slip-On Line (Titanium) is no longer valid. The Akrapovič Slip-On system gives your motorcycle that unmistakable deep resonant Akrapovič sound and also dramatically changes its visual appearance. Each product features Akrapovič's finest carbon fibre end caps. Exhaust system is compatible with Honda side cases and central stand.	Road	Honda	NC700/ NC750X	2012	2020	€ 822,83
S-H7SO5-HRC	3831126424510	Slip-On Line (Carbon)	SO - Slip-On	EC Type Approval, ECE Type Approval	This product is built with a hand-crafted carbon-fibre muffler outer sleeve and a quality stainless-steel inner structure and link pipe, all leading to a high-grade titanium end cap with a new design featuring imprints for a sporty look. Weight is reduced by 45.6% (1.8 kg) in comparison to the standard exhaust. There are power and torque gains, especially in the mid- to high-range revs, with increases of 0.5 kW (0.7 hp) at 5,250 rpm and 0.6 Nm at 5,300 rpm, respectively, when compared to a Honda CB750 Homet equipped with a standard stock system and tested on the Akrapovič in-house dyno. This is a fully EC/ECE type-approved Euro 5 system, with no remapping needed – just a plug-and-play installation. It serves up a deep, sporty, and vivid Akrapovič sound and is fully compatible with Honda original soft panniers.	Road	Honda	CB750 Homet	2023	2024	€ 930,15

S-H7SO6-HRTBL	3831126425197	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Constructed from race-proven materials, this exhaust has a black-coated titanium outer sleeve on the muffler and features a newly designed end cap, also made of lightweight titanium, like the bracket. It is finished with a stainless-steel link pipe and muffler inner structure. Weighing 39.8% (1.6 kg) less than the standard stock exhaust, it offers performance gains in the mid and high rev ranges. During development, the engineers focused on throttle response and rideability, resulting in increased power figures of 0.7 kW (0.9 hp) and a torque enhancement of 1.3 Nm, both at 5,700 rpm when compared to a standard stock system and tested on the Akrapovič in-house dyno. This Euro 5 exhaust has been designed to meet EC/ECE type approval while providing better performance and a deep, sporty sound. It is a simple plug and play installation with no remapping needed, fully compatible with the original Honda side panniers.	Road	Honda	XL750 Transalp	2023	2024	€ 924,30
S-H8SO2-HRT	3831095098842	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval	Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. Change the nature of your bike by adding more power, improved performance, and the unique Akrapovič sound. Everything packed in stylishly designed Slip-On exhaust systems. The result of taking design very seriously is a beautifully crafted exhaust system. The muffler outer sleeve is made of titanium, while the end cap is made of carbon fibre. Race-proven materials.	Road	Honda	VFR800X Crossrunner	2011	2014	€ 919,14
S-H8SO3-HRT	3831113521376	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	The Akrapovič Slip-On exhaust system is designed for riders who do not want to make major modifications to their stock exhaust system. However, the Slip-On exhaust delivers great looks as well as increased performance for the bike. Akrapovič exhaust is also compatible with Honda aftermarket side cases.	Road	Honda	VFR800F	2014	2016	€ 860,52

S-HD12SO1-HAFT	3831126408152	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Created to fit seamlessly within the lines of the bike and utilizing a design used on Akrapovič products for the Adventure bike sector, this highly durable exhaust has a sandblasted high-grade titanium muffler outer sleeve with a stainless-steel link pipe. The handmade carbon-fibre end cap and heat shield perfectly follow the profile of the muffler. With a weight saving of 11.6% (0.5 kg) over stock, this system offers a deep and full V-twin sound. Performance is enhanced with a power increase of 1.3 kW (1.7 hp) at 2,300 rpm and a rise in the torque level of 5.6 Nm at 2,700 rpm when tested on the Akrapovič in-house dyno against a Pan America 1250 with a standard stock exhaust. This EC/ECE type-approved exhaust also complies with the latest Euro 5 standards and needs no remapping to the ECU in its simple plug-and-play installation. The Slip-On Line (Titanium) is compatible with the Harley-Davidson Pan America 1250 Special version and with the original Harley-Davidson side cases, saddlebags, and centre stand. An optional link pipe made from stainless steel is also available, designed to raise power and torque levels, reduce weight, and increase gas flow.	Road	Harley-Davidson	Pan America 1250	2021	2024	€ 1 093,95
S-K10B01-HZC		do wyczerpania zapasów	SLIP-ON LINE	EC TYPE APPROVAL	Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. S-K10E10-RC	3831113594301	Evolution Line (Carbon)	EV - Evolution		This is a complete system constructed from high-grade, race-proven lightweight titanium alloys. It provides an impressive increase in power across the entire rev range while also improving torque delivery. The weight is decreased by over 6 kg. The system is finished with a hand-crafted carbon-fibre hexagonal muffler – inspired by Jonathan Rea's (Kawasaki Racing Team) World Superbike-winning machine. The power level has been increased with an extra 8.2 kW (11 HP), recorded on Akrapovič's in-house dyno with back-to-back tests of the Kawasaki with an Evolution Line (Titanium) exhaust and a Ninja ZX-10RR with a standard stock exhaust system. The exhaust delivers a unique, deep, sporty sound that enhances the system's sporty heritage. An optional aluminium muffler bracket is available to further complement the entire system. The bike's ECU must be remapped when the Evolution Line system is installed. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Kawasaki	Ninja ZX-10R	2021	2025	€ 2 856,17

The EC-ECE type-approved exhaust delivers an increase in both power and torque across the rev range when compared to the standard exhaust system. The use of titanium for the pipes and muffler inner parts creates an additional reduction in weight. An optional link pipe is available to improve performance and an optional carbon-fibre muffler bracket to enhance the appearance. When used with the link pipe, the ECU must be remapped. The ECE/ECE type-approval certificate is not valid for Euro5+ motorcycles.	Road	Kawasaki	Ninja ZX-10RR	2021	2025	€	1 167,09
S-K10SO28-ASZTBL	3831113594288	Slip-On Line (Titanium)	SO - Slip-On		Constructed from lightweight high-grade titanium, this exhaust is aimed directly at markets where EC-ECE type approval is not valid. It offers an increase in power and torque with a weight savings. Designed with a short conical muffler, the Slip-On Line (Titanium) produces a unique sharper racing sound. An optional header set and an optional link-pipe are also available, designed to take the exhaust tuning process to the next step. When used with the header set or the link pipe, the ECU must be remapped. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Kawasaki	Ninja ZX-10R	2021	2025	€	936,37
S-K10SO28-ASZTBL	3831113594288	Slip-On Line (Titanium)	SO - Slip-On		Constructed from lightweight high-grade titanium, this exhaust is aimed directly at markets where EC-ECE type approval is not valid. It offers an increase in power and torque with a weight savings. Designed with a short conical muffler, the Slip-On Line (Titanium) produces a unique sharper racing sound. An optional header set and an optional link-pipe are also available, designed to take the exhaust tuning process to the next step. When used with the header set or the link pipe, the ECU must be remapped. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. S-K10SO30-HGIT	3831126405892	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Constructed from race-inspired materials and consisting of a high-grade lightweight titanium muffler outer sleeve, a stylish handmade carbon-fibre heat shield, and an end cap with twin exhaust ports, this product is completed with a stainless-steel link pipe. Featuring a catalytic converter to comply with Euro 5 regulations, this Slip-On Line (Titanium) weighs in at 2.2 kg lighter than the standard stock system, for a weight savings of 28.9%. It is fully compatible with the Kawasaki OEM side cases. A simple plug and play installation, with no need for remapping, the system provides a perfect throttle response, with power increased by 1.4 kW (1.9 hp) at 10,100 rpm and a torque elevation of 1.8 Nm at 5,500 rpm when tested on the in-house dyno against a Ninja H2 SX with a standard stock exhaust. All of this is allied with a deep, distinctive Akrapovič sound.	Road	Kawasaki	Ninja H2 SX	2021	2025	€	1 327,95
S-K10SO31-HGITBL	3831126422226	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	This is the first Akrapovič aftermarket exhaust born from the latest concepts first revealed at the 2019 EICMA motorcycle show. Created for better durability under all conditions, the new muffler is an evolution and future direction in exhaust design, heralding a new era in an ever-expanding market. The progression of the legendary hexagonal shape by Akrapovič, which revolutionized exhaust-system design in 2005, sees the design adapting to modern trends and fresh ideas while following the legacy associated with this iconic muffler. The lines of the system fit perfectly within the bike's profile and the muffler appears smaller to the eye – seemingly counter to strict type-approval rules because mufflers are becoming larger – fully demonstrating the progression in the design. The system is EC/ECE-type approved. A black-coated muffler with an engraved logo, a titanium outer sleeve, and carbon-fibre parts all add to the appeal. With power optimized for the machine, perfect workmanship, a high-quality finish, and more than 40% savings in weight, it is as much a piece of art as it is a performance part. ﻿ Catalytic converter is included within the system. S-K4SO8-HRC	3831126424992	Slip-On Line (Carbon)	SO - Slip-On	EC Type Approval, ECE Type Approval	This beautifully designed exhaust has a more compact shape to fit with the bike's naked and sporty appearance. It is constructed using hand-crafted carbon fibre parts and finished with a titanium end-cap in the same perfectly finished race-proven material. Power and torque increases throughout the range and a weight savings over the standard stock system all add to improved performance. It serves up an enriched tone for added aural enjoyment and is EC/ECE type approved. Easy-to-follow plug-and-play instructions with no remapping makes this a simple upgrade to improve the ZX-4R Exhaust system fits also on ZX-4RR version.	Road	Kawasaki	Ninja ZX-4R	2023	2025	€ 918,45
S-K4SO9-HRT	3831126429874	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Development with an emphasis on aesthetics, sound, and weight reduction led to this newly designed titanium muffler with an imprinted surface to add strength and durability. It offers a deep sound and a weight saving of 42.2% (1.8 kg) over the standard stock system. A carbon-fibre end cap and heat shield complete the look, with a stainless-steel link pipe and the inner structure of the muffler completing the system. During the development phase, Akrapovič engineers focused on throttle response, and performance has been boosted by an increase in power of 0.8 kW (1.1 hp) at 7,900 rpm and a torque rise of 1.0 Nm at 8,000 rpm when compared with a standard stock exhaust and tested on the Akrapovič dyno. It meets EC/ECE type-approval certificate - Euro5+, the new regulation from 2024 onward. The previous regulation, Euro5, was valid until 31 December 2023. The plug-and-play installation means no remapping is required.	Road	Kawasaki	Ninja 7 / Z7 Hybrid	2024	2024	€ 766,35
S-K5SO1-HRT	3831126433178	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	This is a newly designed titanium muffler with an imprinted finish for additional strength and durability. A weight saving of 32% (1.3 kg) over the standard stock system, a deep sound, throttle response, and aesthetics are all aspects the engineers focused on in the development process. It is constructed with a high-grade titanium muffler outer sleeve and finished with a carbon-fibre end cap and high-grade stainless-steel link pipe, muffler inner structure, and heat shield. A power increase of 0.3 kW (0.4 hp) at 8,750 rpm and a torque rise of 0.3 Nm at 5,000 rpm have been recorded when compared with a standard stock exhaust and tested on the Akrapovič dyno. Plug-and-play installation means no remapping is necessary. It meets EC/ECE type-approval certificate - Euro5+, the new regulation from 2024 onward. The previous regulation, Euro5, was valid until 31 December 2023. For a further upgrade of the Slip-On Line (Titanium), a carbon-fibre heat shield is available as an optional extra, as is a header for riders looking for more power gains and racing tones. Installation of the header will invalidate the EC/ECE type approval for the Slip-On Line (Titanium).	Road	Kawasaki	Ninja 500 / Z500	2024	2024	€ 707,85
S-K6R10-HEGEHT	3831113553209	Racing Line (Titanium)	RC - Racing	EC Type Approval, ECE Type Approval	This is a full system consisting of a high-grade lightweight titanium muffler and stainless-steel headers, and finished with a beautifully handmade carbon-fibre endcap. It offers increased performance across the rev-range and a weight decrease over the stock system, which will aid handling, and is also EC/ECE type approved. It has a deeper, sportier sound that adds to desirability. With easy-to-follow installation instructions, the Racing Line is a simple plug-and-play system that needs no remapping. EC type-approval is valid only when catalytic converter is installed.	Road	Kawasaki	Versys 650	2017	2020	€ 1 352,93
S-K6R11-RC/1	3831126426194	Racing Line (Carbon)	RC - Racing		This product is constructed with hand-laid carbon fibre for the muffler outer sleeve and end cap, with a high-grade stainless-steel inner structure, noise insert, link pipe, and headers, resulting in a race track use-oriented exhaust that is 68.6% (8.3 kg) lighter than the standard stock version. Maximum performance is obtained due to a different exhaust configuration, creating performance gains throughout the entire rev range above 5,000 rpm. Power and torque increases of 5.7 kW (7.7 hp) at 13,200 rpm and 7.7 Nm at 6,000 rpm have been recorded, respectively, when compared to a Kawasaki Ninja ZX-6R equipped with a standard stock exhaust and tested on the Akrapovič dyno. The racing look is due to removal of the pre-muffler; the exhaust has two lambda sensors to counter this. The exhaust tone has a unique deep racing sound, and the system is a plug-and-play installation that requires no mandatory remapping, but this is recommended to get the full experience. Options include a carbon-fibre muffler bracket and the Track Day Link Pipe (SS) to use on race tracks with stricter noise limits. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. The product is developed and tested on EU vehicle specification. Non-EU fitment and performance may vary by marketplace and different vehicle specification.	Road	Kawasaki	Ninja ZX-6R	2023	2025	€ 1 866,15
S-K6R12-HEGEHT	3831113580632	Racing Line (Titanium)	RC - Racing	EC Type Approval, ECE Type Approval	This is a full system consisting of a high-grade lightweight titanium muffler and stainless-steel headers, and finished with a beautifully handmade carbon-fibre endcap. It offers increased performance across the rev-range and a weight decrease over the stock system, which will aid handling, and is also EC/ECE type approved. It has a deeper, sportier sound that adds to desirability. With easy-to-follow installation instructions, the Racing Line is a simple plug-and-play system that needs no remapping. EC type-approval is valid only when catalytic converter is installed.	Road	Kawasaki	Ninja 650	2017	2020	€ 1 352,93

S-K6SO7-HZC/3	3831126433604	Slip-On Line (Carbon)	SO - Slip-On	EC Type Approval, ECE Type Approval	The first step on the exhaust tuning ladder, this system uses race-proven materials, increases performance, and meets Euro5 EC/ECE type-approval. Handmade carbon-fibre muffler outer sleeve, end cap, and heat shield – supplied to cover the exhaust valve in the link pipe – with a high-grade stainless-steel inner structure and link pipe. Weight is reduced by 2.5 kg against the standard stock system, and power is enhanced by 1.4 kW (1.9 hp) at 9,000 rpm, with a torque increase of 1.7 Nm at 7,500 rpm when tested on the Akrapović dyno and compared to a Kawasaki Ninja ZX-6R equipped with a standard stock system. The exhaust is a simple plug-and-play system with no remapping, and it produces a deep and vivid sound. Options include a carbon-fibre muffler bracket and a link pipe for further performance upgrade and for use on closed circuits and race tracks. Additional fitment notice: This product has been developed and tested for EU vehicle specifications. Non-EU fitment and performance may vary by marketplace and different vehicle specifications. Fitting of the optional link pipe will invalidate the EC/ECE certificate for the Slip-On Line (Carbon). FITMENT NOTICE: this exhaust is an appropriate replacement part for model year 2024 or newer Kawasaki stock exhaust with E1 KHI K 729 approval marking.	Road	Kawasaki	Ninja ZX-6R	2009	2025	€ 1 216,80
S-K6SO7-ZC	3831113566087	Slip-On Line (Carbon)	SO - Slip-On		Designed for closed-course competition circuits only, this exhaust is assembled using race-proven materials. The exquisite carbon-fibre muffler outer sleeve, end cap, and heatshield and the high-grade stainless-steel inner structure and link pipe produce a weight saving of 2.9 kg over the standard stock system. During the development phase, Akrapović engineers focused on throttle response, rideability, and enhanced performance. Power gains have been achieved in the mid and high rev range, with a rise in power of 5.9 kW (8.0 hp) at 13,700 rpm and a torque increase of 5.0 Nm at 6,400 rpm when compared to a Kawasaki Ninja ZX-6R equipped with a standard stock exhaust and tested on the Akrapović dyno. The exhaust produces a vivid racing tone and is a plug-and-play fitment, with no remapping needed. Options include a carbon-fibre muffler bracket and a link pipe for further performance upgrade. Additional fitment notice: This product has been developed and tested for EU vehicle specifications. Non-EU fitment and performance may vary by marketplace and different vehicle specifications. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Kawasaki	Ninja ZX-6R	2009	2025	€ 929,27

S-K6S07-ZC	383111356087	Slip-On Line (Carbon)	SO - Slip-On		Designed for closed-course competition circuits only, this exhaust is assembled using race-proven materials. The exquisite carbon-fibre muffler outer sleeve, end cap, and heatshield and the high-grade stainless-steel inner structure and link pipe produce a weight saving of 2.9 kg over the standard stock system. During the development phase, Akrapovič engineers focused on throttle response, rideability, and enhanced performance. Power gains have been achieved in the mid and high rev range, with a rise in power of 5.9 kW (8.0 hp) at 13,700 rpm and a torque increase of 5.0 Nm at 6,400 rpm when compared to a Kawasaki Ninja ZX-6R equipped with a standard stock exhaust and tested on the Akrapovič dyno. The exhaust produces a vivid racing tone and is a plug-and-play filament, with no remapping needed. Options include a carbon-fibre muffler bracket and a link pipe for further performance upgrade. Additional fitment notice: This product has been developed and tested for EU vehicle specifications. Non-EU fitment and performance may vary by marketplace and different vehicle specifications. S-K6S08-HCQT	3831126407124	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Constructed using a high-grade sandblasted and lightweight titanium muffler outer sleeve with a black-coated stainless-steel end cap, combined with a stainless-steel link pipe and pre-muffler, this system is finished with a stylish Akrapovič monochrome sticker on the muffler. Replacing the exhaust system has a strong impact on the overall appearance of the motorcycle, as well as on its weight and performance. It weighs in at 1.7 kg lighter (a weight saving of 29.2%) compared to the standard stock system, producing an increase in power of 1.1 kW (1.5 hp) at 5,300 rpm and a torque rise of +1.9 Nm at 5,300 rpm when compared to the Akrapovič Slip-On Line against a Z650RS with a standard stock exhaust. Providing an impeccable throttle response allied to a deep Akrapovič sound, this plug-and-play installation system requires no remapping to the ECU and meets Euro 5 standards. When fitting the Slip-On Line (Titanium), the existing stock exhaust system requires cutting, and so the easy-to-follow instruction manual must be consulted thoroughly before and during installation. The product is developed and tested on EU vehicle specification and does not fit on the non-EU spec models. Product fits on stock exhaust with single lambda sensor. S-S10E3-APLT	3831113549929	Evolution Line (Titanium)	EV - Evolution		This is a top-of-the-range full system beautifully crafted from high-grade ultra-lightweight titanium. It is the lightest Akrapovič complete exhaust system, weighing just 4.4 kg – which is over 57% lighter than the stock system. The muffler and headers are constructed entirely from titanium. Its distinctive shape was developed especially for the Suzuki GSX-R1000 based on Akrapovič's vast racing experience. Increased power and torque through the whole rpm range, especially in the mid range and top end, add over 10 hp at 9,000 rpm and more than 9 Nm at 7,600 rpm, making this the best Akrapovič exhaust upgrade for performance. The deep, true racing sound is perfectly tuned to match the increased performance. It offers easy-to-fit installation. For perfect performance, throttle response, and durability, special mapping developed by Akrapovič R&D in collaboration with our partner Rapid Bike by Dimsport has to be used. Please visit https://www.dimsport.us/en/rapid-bike/akrapovic/ , where you can download the mapping. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. S-S10SO11-HASZ	3831113548304	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Designed to increase power and torque while lowering weight over the stock system, The Slip-On Line (Titanium) exhaust is manufactured from race-bred materials and is constructed using a titanium outer sleeve for a real racing look. The muffler assembly has been optimised to produce the best performance to meet EC/ECE-type approval without compromising the improved and sporty sound. The carbon-fibre heatshield and end cap give the exhaust extra visual appeal. Simple plug-and-play installation, without any need for other parts or remapping.	Road	Suzuki	GSX-S1000 / 1000GT / 950	2015	2020	€ 943,49
S-S10SO12-HRC	3831113549776	Slip-On Line (Carbon)	SO - Slip-On	EC Type Approval, ECE Type Approval	This is a hexagonal muffler design constructed from lightweight titanium with a carbon-fibre outer sleeve, endcap, and heatshield. The distinctive Akrapovič sound has a deeper tone. The entry level in exhaust tuning offers improved torque and power throughout the whole rev range. The muffler is smaller than stock to offer a more striking and sporty appearance, and it weighs approximately 40% less than the standard exhaust. It is EC- and ECE-compliant, there is no need for remapping, and it has a simple plug-and-play installation. There are optional headers for improved torque and power in the mid range and high end of the power curve. If used with optional headers, remapping is needed. The EC/ECE type-approval certificate is not valid for Euro5/Euro5+ models.	Road	Suzuki	GSX-R1000	2017	2025	€ 1 003,80

S-S10SO13-CUBT	3831113549943	Slip-On Line (Titanium)	SO - Slip-On		Constructed from high-grade ultra-lightweight titanium, this system provides an over 70% weight savings compared to the stock muffler. It is small and sporty, with a Grand Prix-inspired design, delivering increases in power and torque throughout the rpm curve. The stunning sound gives a real sense of racing and total exhilaration. The simple plug-and-play installation means there is no need for remapping. It is designed for track use and markets where ECE/CE type approval is not required. There are optional headers for improved torque and power in mid and high rev range. If used with optional headers, remapping is needed. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Suzuki	GSX-R1000	2017	2025	€ 849,77
S-S10SO14-HAFT	3831113553599	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. Change the nature of your bike by adding more power, improved performance, and the unique Akrapović sound. Everything packed in stylishly designed Slip-On exhaust systems. The result of taking design very seriously is a beautifully crafted exhaust system. The muffler outer sleeve is made of titanium, while the end cap is made of carbon fibre. Exhaust system is compatible with Suzuki side cases and central stand.	Road	Suzuki	V-STROM 1000	2014	2019	€ 1 025,62

S-S8R1-EEC	3831126422011	Racing Line (Carbon)	RC - Racing		This is a completely new exhaust designed from scratch and constructed using lightweight race-proven materials. A carbon-fibre muffler outer sleeve, heatshield, and clamp, a titanium end cap, stainless-steel header, resonator, and link pipe, and a black-coated aluminium muffler bracket create a weight saving of 39.6% (3.2 kg) over the stock exhaust. Alternate routing of the exhaust places it on the right side of the machine (the standard version goes under the bike), resulting in a more racing style, and the carbon-fibre heatshield provides protection from heat and an attractive final touch. It offers power and torque increases of 4.7 kW (6.4 hp) at 9,200 rpm and 4.7 Nm at 7,650 rpm, respectively, when tested on the Akrapović dyno and compared to a Suzuki GSX-8S equipped with the standard stock system. The exhaust has a resonator in the link pipe, giving the rider a unique sound experience, with a racing and vivid tone, while not compromising performance. The plug-and-play installation means no remapping is needed. This exhaust system is compatible with the original Suzuki soft side cases set. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Suzuki	GSX-8S / 8R	2022	2024	€ 1 462,50
S-S8R1-HHAKESS	3831126435240	Racing Line (SS)	RC - Racing	EC Type Approval, ECE Type Approval	Inspired by the concept shown at EICMA in 2024, this exhaust has been designed to seamlessly integrate with the bike's lines. Constructed in one piece from high-grade stainless steel and shaped through the use of high-end technology, with the catalytic converter welded inside the muffler. It is finished with a handmade carbon-fibre cover, which incorporates the outlet with a honeycomb exhaust protection and an Akrapović logo in red and white. If features plug-and-play installation with no remapping required. Focus was placed on optimal throttle response and performance during development, which has resulted in a power increase of 1.8 kW (2.5 hp) at 9,500 rpm and a torque boost of 1.4 Nm at 5,500 rpm when compared to a Suzuki GSX-8S with a standard stock exhaust system and tested on the Akrapović in-house dyno. Weight is reduced by 29.1% (2.2 kg) compared to the standard stock exhaust system. Delivering a deep and sporty sound, this full system is EC/ECE type approved and Euro 5+ compliant. It has been designed so that it can also be mounted in combination with the original Suzuki soft sided case set.	Road	Suzuki	GSX-8S / 8R	2022	2025	€ 1 398,15
S-S8R2-EEC	3831126441760	Racing Line (Carbon)	RC - Racing		This is a completely new exhaust designed from scratch and constructed using lightweight race-proven materials. A carbon-fibre muffler outer sleeve, heatshield, and clamp, a titanium end cap, stainless-steel header, resonator, and link pipe, and a black-coated aluminium muffler bracket create a weight saving of 39.6% (3.2 kg) over the stock exhaust. Alternate routing of the exhaust places it on the right side of the machine (the standard version goes under the bike), resulting in a more racing style, and the carbon-fibre heatshield provides protection from heat and an attractive final touch. It offers power and torque increases of 4.7 kW (6.4 hp) at 9,200 rpm and 4.7 Nm at 7,650 rpm, respectively, when tested on the Akrapović dyno and compared to a Suzuki GSX-8S equipped with the standard stock system. The exhaust has a resonator in the link pipe, giving the rider a unique sound experience, with a racing and vivid tone, while not compromising performance. This exhaust system is compatible with the original Suzuki soft side cases set. When installing the Racing Line (Carbon) exhaust system on Euro5+ models the check engine light will appear, thus remapping the ECU is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Suzuki	GSX-8S / 8R	2025	2025	€ 1 474,20
S-S8SO1-HAFT	3831126422943	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. Change the nature of your bike by adding more power, improved performance, and the unique Akrapović sound. Everything packed in stylishly designed Slip-On exhaust systems. This slip-on system is lighter than stock, which is achieved with various materials and construction, with the black-coated titanium outer sleeve with a monochrome logo sticker. Featuring a newly design carbon fibre end cap and heatshield. It has a simple plug-and-play installation, and is fully EC- and ECE-compliant. The exhaust system is compatible with original Suzuki cases.	Road	Suzuki	V-STROM 800DE	2022	2025	€ 1 275,30
S-T12SO2-HCQTBL	3831113573474	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance. Change the nature of your bike by adding more power, improved performance, and the unique Akrapović sound. Everything packed in stylishly designed Slip-On exhaust systems. The result of taking design very seriously is a beautifully crafted exhaust system with a titanium muffler outer sleeve. Race-proven materials. EC/ECE type-approval is not valid on Thruxton RS model. S-T12SO5-HAPXLT	3831126418236	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	This product is inspired by the same design culture as the exhausts used on race-winning superbikes. The lightweight titanium muffler outer sleeve and end cap are sandblasted and coated for increased durability and an attractive appearance. It weighs over 20% (0.7 kg) less than the stock exhaust due to the use of race-inspired materials, and it has a full and deep Akrapović sound, tuned to the bike's characteristic engine. The exhaust is EC/ECE type approved and Euro 5 compliant. The simple plug and play installation means no remapping is required.	Road	Triumph	Speed Triple 1200 RS / RR	2021	2024	€ 1 164,15
S-T12SO6-HUA	3831126422134	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Utilising race-proven materials, this exhaust features a high-grade titanium muffler outer sleeve, a stainless-steel inner structure and link pipe, and a carbon-fibre end cap, and it includes a carbon-fibre heatshield, which provides an appealing finish and protects the passenger's gear. Throughout its development, the engineers placed importance on throttle response and rideability, as well as designing it with durability in mind. Weighing 37.7% (1.4 kg) lighter than the stock version and with power and torque gains of 0.8 kW (1.1 hp) at 8,300 rpm and 0.9 Nm at 8,150 rpm, when compared to a Triumph Tiger 1200 equipped with a standard stock system, the exhaust serves up a deep and sporty sound. It comes with an EC/ECE type-approval certificate, and the plug-and-play installation means no remapping is needed. This exhaust fits on GT and Rally versions of the Triumph Tiger 1200, and it is compatible with Triumph original side panniers.	Road	Triumph	Tiger 1200 GT / RALLY	2022	2024	€ 1 117,35
S-T4SO1-HDT	3831126436049	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	The neo-retro styling utilizes a muffler design first introduced thirty years ago and featuring many updates since then. This Slip-On Line (Titanium) perfectly integrates with the lines of the bike. It is constructed with a high-grade sandblasted titanium muffler outer sleeve, and the link pipe, end cap with imprints, heatshield, and muffler inner structure are all made from stainless steel. It is finished with a monochrome logo sticker and a heatshield to prevent burning or damage to the rider's gear. During the development stage, emphasis was placed on throttle response and performance. It delivers increases in power and torque of 0.7 kW (0.9 hp) at 8,000 rpm and 1.0 Nm at 8,000 rpm, respectively, when compared to a Triumph equipped with a standard stock exhaust system and tested on the Akrapović in-house dyno. Lightweight materials create a weight reduction of 39.5% (1.3 kg) against the standard stock system. This product has a deep and full sound. It is EC/ECE type approved and Euro5 compliant, and the straightforward plug-and-play installation means no remapping is needed.	Road	Triumph	Scrambler 400 X	2023	2024	€ 684,45

S-T6R2-CQTBL	3831126436094	Racing Line (Titanium)	RC - Racing		Full system consisting of a black-coated, high-grade titanium muffler outer sleeve, with other parts fabricated from stainless steel. Innovative technology has created an exceptional design for the bushes and flanges to meet the oval shaped header inlets: the header tubes have been tapered from oval to cylindrical form using hydroforming machinery. With a huge 3.3 kg (41%) weight saving over the stock system and impressive power gains of 2.6 kW (3.5 hp) at 10,000 rpm and torque increase of +2.5 Nm at 10,000 rpm when measured on the Akrapović dyno against a Trident 660 with a standard stock exhaust system, all combined with a flawless throttle response. A deep, full, and vivid sound is achieved through a specially tuned resonator in the link pipe to create a unique sound experience. Plug-and-play installation with no remapping needed for a system that has been developed to be used on racing tracks and closed courses. Optional black-coated stainless-steel heat shield available. Installation of this product does not fit with the Triumph paddock stand bobbins and does not fit with the Triumph belly pan, both of which are original accessories. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Triumph	Daytona 660	2024	2025	€ 1 456,65

S-Y10E3-APT	3831113526951	Evolution Line Kit (Titanium)	EV - Evolution		Developed by Akrapovič engineers to give Yamaha YZF-R1 racers and teams the ultimate in performance from their machines. The Evolution Line Kit takes the bike to another level and is aimed at taking the YZF-R1 all the way in the exhaust tuning process. This beautifully designed system is constructed from lightweight titanium—saving 5.8 kgs (58%) over the stock system—and is finished with a hi-tech carbon fibre heat shield, which perfectly matches the sporty nature and lines of the bike. The Evolution Line Kit is designed to provide increased engine performance and higher torque to the machine, and also features a unique Akrapovič racing sound to make it sound and perform in perfect harmony. Developed for use with R1s fitted with a Yamaha Racing Kit, the Evolution Line Kit will transform the performance, handling, and behavior of the R1, making it a thoroughbred race machine. Due to the bespoke nature of parts like the radiator in the Yamaha Racing Kit, using the Akrapovič Evolution Line Kit offers more freedom to modify the R1 with racing components. The Evolution Line Kit cannot be mounted with the Yamaha YZF-R1 stock fairings. For perfect performance, throttle response and durability special developed mapping from Dynojet has to be used. Please visit http://www.powercommander.com/powercommander . THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	R1	2015	2019	€ 3 201,71

S-Y10E6-APLT	3831113571333	Evolution Line (Titanium)	EV - Evolution		This is a top-of-the-range full system beautifully crafted from high-grade ultra-lightweight titanium. It is the lightest Akrapovič complete exhaust system, weighing just 5.2 kg – which is over 50% lighter than the stock system. The muffler and headers are constructed entirely from titanium. Its distinctive shape was developed especially for the Yamaha YZF-R1 based on Akrapovič's vast racing experience. Increased power and torque through the whole rpm range, especially in the mid range and top end, making this the best Akrapovič exhaust upgrade for performance. The deep, true racing sound is perfectly tuned to match the increased performance. It offers easy-to-fit installation. The system can also be mounted on YZF-R1M model. For perfect performance, throttle response and durability, ECU remapping is recommended. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	R1	2015	2025	€ 2 856,17
S-Y10R11-ZC		do wyczerpania zapasów	RACING LINE		The Racing Line represents a full step in the exhaust system tuning process and offers a great balance between price and optimum performance. Racing performance exhaust systems are designed for riders that demand maximum performance from their motorcycle. The systems are lighter compared to the stock exhaust system and feature exceptional production quality and increased engine performance combined with pure racing sound output. A combination of racing materials like carbon fibre for the muffler outer sleeve and for the end cap give these exhaust systems a racing touch.	Road	Yamaha	YZF-R1	2009	2014	€ 2 401,45
S-Y10R15-APLT	3831113571357	Racing Line (Titanium)	RC - Racing		This full racing system is constructed with a titanium muffler and stainless-steel headers for a second full-system option. The new shape is modelled on the design being raced in many championships. The increased power and torque through the whole rpm range, especially in mid range and top end. It weighs over 40% less than the standard exhaust and offers easy-to-fit installation. The deep racing sound perfectly matches the bike's sporting abilities. The system can also be mounted on YZF-R1M model. For perfect performance, throttle response and durability, ECU remapping is recommended. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	R1	2015	2025	€ 2 172,88

S-Y10SO19-RT/TD	3831113583282	Slip-On Line (Titanium) Track Day	SO - Slip-On		The Track Day Slip-On Line for the Yamaha YZF-R1 was specially developed for use on racetracks where lower noise levels are required. It is made from race-proven materials: titanium for the outer sleeve and carbon fibre for the end cap and the muffler bracket and clamp. The slip-on must be combined with either the L-Y10SO11/TD link pipe for mounting on stock headers or the L-Y10E5/TD link pipe for mounting on the header set from the S-Y10E3-APT Evolution Line kit, Evolution Line S-Y10E6-APT or Racing Line S-Y10R15-APLT (the collector and headers with associated fitting material (flanges, springs, inner sleeves and lambda plugs - please refer to schematics of the mentioned systems). Information about noise levels are found under product description of mandatory link pipes. The mandatory P-MBY10E2 fitting kit, including the muffler bracket and clamp, must be ordered. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	R1	2015	2025	€ 929,27
S-Y10SO20-HAPLT	3831126404246	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Designed with a striking resemblance to the Akrapovič exhaust for the Yamaha R1 Superbike, this new version of the EC/EEC type-approved Slip-On Line (Titanium) system is constructed from high-grade lightweight titanium for the link pipe, end cap, and muffler outer sleeve, which is sandblasted for an enhanced appearance. The package also includes a forged carbon-fibre heat shield, which is Akrapovič's first use of this technology in the motorcycle sector. Producing a deep, full, and vivid sound, the Slip-On Line (Titanium) offers ideal throttle response from its simple plug-and-play installation, which requires no remapping. Exhaust can also be mounted on MT-10 SP and MT-10 Tourer Edition models.	Road	Yamaha	MT-10/FZ-10	2022	2024	€ 1 004,56

S-Y3SO6-IVOSS	3831126412104	Slip-On Line (SS)	SO - Slip-On		Inspired by the Akrapovič exhaust used by the Monster Energy Yamaha MotoGP team for the Yamaha YZR-M1, this fresh design has a completely different look from other Akrapovič systems in the range for this particular model. It features a honeycomb titanium end cap design, as seen on the YZR-M1, to create a sporty look, bringing the feel of top-class racing to all riders. Constructed from high-grade stainless steel and finished with a striking sandblasted muffler, this exhaust weighs in 2 kg lighter than the standard part, which is an impressive 68.9% below stock. It provides a perfect throttle response, allied with a deep racing tone – perfectly in line with its Grand Prix origins – to deliver a sound as good as its looks. Developed for use on closed-course competition circuits only, this racetrack-focused exhaust is a simple plug-and-play part, with no remapping needed. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	MT-03	2022	2025	€	415,35

S-Y7R1-HAFT	3831113517591	Racing Line (Titanium)	RC - Racing	EC Type Approval, ECE Type Approval	The Racing Line represents a full step in the exhaust system tuning process and offers a great balance between price and optimum performance. Racing performance exhaust systems are designed for riders that demand maximum performance from their motorcycle. The systems are lighter compared to the stock exhaust system and feature exceptional production quality and increased engine performance combined with pure racing sound output. A combination of racing materials like titanium for the muffler outer sleeve give these exhaust systems a racing touch. The exhaust system is compliant with EURO3 regulations. EC type-approval is valid only when catalytic converter is installed.	Road	Yamaha	MT-07/FZ-07	2014	2016	€	1 181,45
S-Y7R11-HAPT	3831126404239	Racing Line (Titanium)	RC - Racing	EC Type Approval, ECE Type Approval	This is an EC/ECE type-approved complete exhaust system constructed with a high-grade, lightweight titanium outer sleeve and end-cap for the muffler, with a stainless steel link pipe and headers, weighing in at 0.7 kg lighter than the standard stock exhaust. A catalytic converter is included in the package, complying with the current Euro5 approvals. There are performance increases of 1.5 kW (2.0 hp) at 9,200 rpm and an added +1.1 Nm at 5,000 rpm when tested on the Akrapovič dyno against a standard stock exhaust. The deep, vivid sound complements the bike's sporting credentials. Designed to match the bike's lines, the pre-muffler is located under the main body and is hidden by the fairing, leaving the muffler to exit on the right side of the machine. The system is finished with a hand-crafted carbon-fibre heatshield. An optional black-coated aluminium muffler bracket is available for the R7 without the passenger foot-pegs. Catalytic converter is included within the system. The EC/ECE type-approval certificate is not valid for Euro5 + model.	Road	Yamaha	R7	2021	2025	€	1 916,26
S-Y7R12-APT	3831126405281	Racing Line (Titanium)	RC - Racing		This complete exhaust system is constructed with a high-grade, lightweight titanium outer sleeve and end-cap for muffler, with a stainless-steel link pipe and headers. It weighs in at 3.0 kg lighter than the standard stock exhaust. A noise insert is included in the package because the open version of the system has no catalytic converter and was developed for use on racetracks or closed courses only. Designed to integrate with the lines of the bike, the resonator is located under the body, hidden by the lower fairings, and the muffler exits on the right side of the bike. It is finished with an eye-catching heatshield, inspired by those on the Yamaha R6 and R1. Impressive performance increases of 4.3 kW (5.9 hp) at 9,700 rpm and an added +2.9 Nm at 5,500 rpm have been achieved when tested on the Akrapovič dyno against a standard stock exhaust. The racing sound matches the bike's sporting credentials. A black-coated aluminium muffler bracket for the R7 without the passenger foot-pegs is available as an option. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	R7	2021	2025	€	1 275,48

S-Y7R2-AFC/1	3831126440794	Racing Line (Carbon)	RC - Racing		This exhaust has a lightweight carbon-fibre muffler outer sleeve, combined with stainless steel link pipes and headers and finished with a carbon-fibre end cap, to produce a system that is 3.0 kg (41,7%) lighter than stock. The new design features a shorter muffler for an enhanced sporty look, which exits on the side of the bike for visual impact. Power is increased by 1.9 kW (2.6 hp) at 9,100 rpm when compared in back-to-back tests on a MT-07 with a Racing Line (Carbon) exhaust and a standard stock exhaust system. The sporty racing sound is perfectly tuned to the engine. It is designed for use on tracks and closed-course competition circuits. The exhaust system is compatible with Yamaha hard cases. When installing the Racing Line exhaust system on Euro5+ motorbikes (2 lambda sensors), the engine check light will appear after identifying a deviation in the stock catalytic converter's parameters. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	MT-07/FZ-07	2025	2025	€ 1 016,73
S-Y7R5-HEGEH	3831113540971	Racing Line (Titanium) MT-07	RC - Racing	EC Type Approval, ECE Type Approval	The Racing Line is a complete system with a new muffler shape made from lightweight high-grade titanium. It has headers constructed from stainless steel and a handmade carbon-fibre endcap. It has increased top-end power and mid-range torque levels, with improved engine response for enhanced rideability and a huge weight saving of over 23% on stock. A deeper, sportier sound enhances the overall enjoyment. It is EC/ECE type-approved. No remapping is required and it is easy to fit. EC type-approval is valid only when catalytic converter is installed.	Road	Yamaha	MT-07/FZ-07	2014	2020	€ 1 253,13

S-Y9R16-HDT/2	3831126428983	Racing Line (Titanium)	RC - Racing	EC Type Approval, ECE Type Approval	This neo-retro exhaust shape utilizes a heritage design first used by Akrapovič 30 years ago, now updated for today's market with the use of modern technology, state-of-the-art solutions, and innovative materials. The complete system is EC/ECE-type approved, with a catalytic converter incorporated into the layout to make it a Euro 5 product. The muffler outer sleeve is constructed from high-grade titanium, with stainless steel for every other component, and the pre-muffler and muffler are sandblasted for a perfect finish. A black coated muffler bracket and two heat shields, designed to protect the riding gear, are included in the package. The muffler exits on right side of the bike (standard is underneath), emphasizing the racing and retro look of the machine. The system delivers a deep, full, and vivid sound allied to a perfect throttle response, and it adds 1.4 kW (1.9 hp) of power at 9,100 rpm and increases torque by 1.4 Nm at 9,800 rpm when measured on the Akrapovič dyno against a Yamaha XSR900 with a standard stock exhaust system. It has plug-and-play installation, with no remapping needed. This system is not compatible with the Yamaha original saddlebags.	Road	Yamaha	XSR 900 / GP	2022	2025	€ 1 918,80
S-Y9R18-APC	3831126436216	Racing Line (Carbon)	RC - Racing		This exhaust has a lightweight carbon-fibre muffler outer sleeve, combined with stainless steel link pipes and headers and finished with a titanium end cap, to produce a system that is 2.6 kg (36,5%) lighter than stock. The new design features a shorter muffler for an enhanced sporty look, which exits on the side of the bike for visual impact. Power is increased by 3.3 kW (4.5 hp) at 9,600 rpm when compared in back-to-back tests on a MT-09 with a Racing Line (Carbon) exhaust and a standard stock exhaust system. The sporty racing sound is perfectly tuned to the engine. It is designed for use on tracks and closed-course competition circuits. The exhaust system is compatible with Yamaha hard cases and centre stand accessories. When installing the Racing Line (Carbon) exhaust system the check engine light will appear, thus remapping the ECU is mandatory. The mandatory P-HF1596 fitting kit, including the muffler clamp, bracket and mounting material, must be ordered separately. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	MT-09/FZ-09	2021	2023	€ 1 034,28

S-Y9R20-APC	3831126441524	Racing Line (Carbon)			This exhaust has a lightweight carbon-fibre muffler outer sleeve and heatshield, combined with stainless steel link pipes and headers and finished with a titanium end cap, to produce a system that is 2.2 kg (31%) lighter than stock. The new design features a shorter muffler for an enhanced sporty look, which exits on the side of the bike for visual impact. Power is increased by 3.3 kW (4.5 hp) at 9,600 rpm when compared in back-to-back tests on a Tracer 9 with a Racing Line (Carbon) exhaust and a standard stock exhaust system. The sporty racing sound is perfectly tuned to the engine. It is designed for use on tracks and closed-course competition circuits. The plug-and-play fitting means no remapping is needed. The exhaust system is compatible with Yamaha hard cases and centre stand accessories. When installing the Racing Line (Carbon) exhaust system the check engine light will appear, thus remapping the ECU is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.		Yamaha	Tracer 9 / GT / GT+	2025	2025	€ 1 027,26
S-Y9R2-AFC	3831113515016	Racing Line (Carbon)	RC - Racing		The Racing Line represents a full step in the exhaust system tuning process and offers a great balance between price and optimum performance. Racing performance exhaust systems are designed for riders that demand maximum performance from their motorcycle. The systems are lighter compared to the stock exhaust system and feature exceptional production quality and increased engine performance combined with pure racing sound output. A combination of racing materials like carbon fibre for the muffler outer sleeve give these exhaust systems a racing touch. Racing Line system can't be mounted if motorcycle's central stand is used. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Road	Yamaha	MT-09/FZ-09	2014	2016	€ 1 110,77
S-Y9R2-AFC	3831113515016	Racing Line (Carbon)	RC - Racing		The Racing Line represents a full step in the exhaust system tuning process and offers a great balance between price and optimum performance. Racing performance exhaust systems are designed for riders that demand maximum performance from their motorcycle. The systems are lighter compared to the stock exhaust system and feature exceptional production quality and increased engine performance combined with pure racing sound output. A combination of racing materials like carbon fibre for the muffler outer sleeve give these exhaust systems a racing touch. Exhaust can also be mounted on MT-09 SP model. For perfect performance, throttle response and durability, ECU remapping is recommended. Racing Line system can't be mounted if motorcycle's central stand is used. V-TUV227	3831113547703	Optional Noise Damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-D12S09-HAPT - Slip-On Line (Titanium) and it is recommended if used with E-D12E6 - Optional Header (Titanium)	Road	Ducati	Multistrada 1200	2015	2017	€	60,33
V-TUV227	3831113547703	Optional Noise Damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-D12S09-HAPT - Slip-On Line (Titanium) and it is recommended if used with E-D12E6 - Optional Header (Titanium)	Road	Ducati	Multistrada 1200 S	2015	2017	€	60,33
V-TUV227	3831113547703	Optional Noise Damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-D12S09-HAPT - Slip-On Line (Titanium) and it is recommended if used with E-D12E6 - Optional Header (Titanium)	Road	Ducati	Multistrada 1260 / 1260 S	2018	2020	€	60,33
V-TUV227	3831113547703	Optional Noise Damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-Y10S016-HAPT (Slip-On Line Titanium). It was developed to use in combination with optional link pipe L-Y10S011T. Notice: Optional noise damper is primarily developed for reducing noise. It is possible that it may negatively affect the performance of the bike.	Road	Yamaha	R1	2015	2019	€	60,33
V-TUV227	3831113547703	Optional Noise Damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-Y6S012-HAPT (Slip-On Line Titanium)	Road	Yamaha	R6	2017	2025	€	60,33
V-TUV231/1	3831113574983	Optional Noise Damper	RC - Racing	WIO Approval	The optional noise damper fits on S-Y10S018-HAPLT (Slip-On Line Titanium). It was developed to use in combination with optional link pipe L-Y10S017. Notice: Optional noise damper is primarily developed for reducing noise. It is possible that it may negatively affect the performance of the bike.	Road	Yamaha	R1	2015	2025	€	62,14
V-TUV309	3831113594295	Optional Noise damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-K10S028-ASZTBL - Slip-On Line (Titanium) for Kawasaki ZX-10RR 2021 and also on S-K10S029-ASZTBL - Slip-On Line (Titanium) for Kawasaki Z H2 2020-2021.	Road	Kawasaki	Ninja ZX-10R	2021	2025	€	60,33
V-TUV309	3831113594295	Optional Noise damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-K10S028-ASZTBL - Slip-On Line (Titanium) for Kawasaki ZX-10RR 2021 and also on S-K10S029-ASZTBL - Slip-On Line (Titanium) for Kawasaki Z H2 2020-2021.	Road	Kawasaki	Ninja ZX-10RR	2021	2025	€	60,33
V-TUV309	3831113594295	Optional Noise damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-K10S028-ASZTBL - Slip-On Line (Titanium) for Kawasaki ZX-10RR 2021 and also on S-K10S029-ASZTBL - Slip-On Line (Titanium) for Kawasaki Z H2 2020-2021.	Road	Kawasaki	Z H2	2020	2025	€	60,33
V-TUV315	3831113594196	Optional Noise Damper	SO - Slip-On	WIO Approval	The optional noise damper fits on S-S13R1-APLT (Racing Line Titanium). The product is developed and tested on EU vehicle specification. Non-EU fitment and performance may vary by marketplace and different vehicle specification.	Road	Suzuki	GSX-1300R Hayabusa	2021	2025	€	62,14
V-TUV316	3831113595339	Optional noise damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-K10E10-RC (Evolution Line) and S-K10R10-RC (Racing Line). Static noise level with Track Day link pipe and optional noise damper: 95 dB@5500 rpm	Road	Kawasaki	Ninja ZX-10R	2021	2025	€	62,14
V-TUV316	3831113595339	Optional noise damper	OP - Optional part	WIO Approval	The optional noise damper fits on S-K10E10-RC (Evolution Line) and S-K10R10-RC (Racing Line). V-TUV326	3831113599566	Optional Noise Damper	OP - Optional part	WIO Approval	The optional noise damper fits on Slip-On Line (Carbon) S-B10S016-H2C.	Road	BMW	S 1000 R / M 1000 R	2021	2025	€	62,14
SCOOTER												
E-H7R1	3831113556750	Optional Header (SS)	OP - Optional part		Optional available headers from the finest stainless steel offer an upgrade to a full system when used with the Akrapovič Slip-On exhaust system. Let your bike stand out with more power, beautiful design, and the unique Akrapovič sound. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	ScOOTer	Honda	X-ADV750	2017	2024	€	402,27
P-HF1485	3831126419103	Reassembly Set (SS)	OP - Optional part	WIO Approval	This kit is constructed from stainless-steel tubing with a graphite gasket and two stainless-steel clamps. It has been specifically developed to allow customers to remove the Slip-On Line (SS) exhaust and re-install the stock system onto the cut header at a later date if required.	ScOOTer	Yamaha	XMAX 125	2021	2025	€	39,79
P-HSH3S01	3831126405229	Heat Shield (Carbon)	OP - Optional part	WIO Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon-fibre heat shield.	ScOOTer	Honda	ADV350	2022	2024	€	157,35
P-HSH3S01	3831126405229	Heat Shield (Carbon)	OP - Optional part	WIO Approval	Finish off the look of the Slip-On Line exhaust with this perfectly constructed hand-crafted carbon fibre heat shield.	ScOOTer	Honda	NSS350 Forza	2021	2023	€	157,35
P-HSIT125S01	3831126407742	Heat Shield (Carbon)	OP - Optional part	WIO Approval	This hand-made carbon-fibre heatshield has been exclusively designed for the EC/ECE type-approved Slip-On Line (Titanium) exhaust system. This easily installed optional product gives a racing look to the exhaust by covering the front rosette that houses the catalytic converter, providing a smooth and sporty appearance to the design and the look of the entire package.	ScOOTer	Italjet	Dragster 125 / 200	2021	2025	€	114,24
P-HSIT125S01	3831126407742	Heat Shield (Carbon)	OP - Optional part	WIO Approval	This hand-made carbon-fibre heatshield has been exclusively designed for the EC/ECE type-approved Slip-On Line (Titanium) exhaust system. This easily installed optional product gives a racing look to the exhaust by covering the front rosette that houses the catalytic converter, providing a smooth and sporty appearance to the design and the look of the entire package. S-T125SO1-HRTBL	3831126404185	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	Beautifully designed fully EC/ECE type-approved exhaust with a titanium muffler outer sleeve that is painted black and finished with an engraved Akrapović logo. A stainless-steel link pipe and a handmade carbon-fibre end cap complete the construction to provide a sporty look in keeping with the futuristic lines of this "urban superbike". Impeccable throttle response and a 35.6% (1.8 kg) weight savings over the stock system add to the performance of the exhaust. It delivers a power gain of +0.7 kW (1 hp) at 10,200 rpm and a torque increase of +0.7 Nm at 10,200 rpm when measured on the Akrapović dyno against a Dragster 200cc with a standard stock exhaust system. This is an exhaust that performs as good as it looks and sounds. It is easy to install, and there is no need for any remapping. An optional carbon-fibre heatshield is also available to add the finishing touch. The catalytic converter is included in the product and the ECE/EE type-approval is valid only when the catalytic converter is installed.	Scooter	Italjet	Dragster 125 / 200	2021	2024	€ 1 029,83

S-IT125SO2-APT	3831126404208	Slip-On Line (Titanium)	SO - Slip-On		Using a design usually found in the superbike world, this exhaust has a lightweight titanium muffler outer sleeve and an end cap that provides a real racing appearance to the lines of the 'urban superbike' - as this scooter is known. A stainless-steel link pipe finishes the system, which offers a huge weight savings of 67.1% (3.9 kg) over the stock exhaust. Performance is increased by an increase of 1.0 kW (1.3 hp) of power at 9,900 rpm and a torque gain of +1.0 Nm at 9,400 rpm when measured on the Akrapovič dyno against a Dragster 200cc with a standard stock exhaust system. Part of the stunning racing design is the distinctive feature of a hidden muffler bracket, which is welded to the inner side of the exhaust for an even cleaner and more integrated appearance within the bike's lines. Developed for use on closed-course competition circuits, this track-oriented system has a deep racing sound and requires no remapping due to its simple plug-and-play installation. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Scooter	Italjet	Dragster 125 / 200	2021	2024	€	823,87
S-IT3SO1-HRTBL	3831126432584	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval, ECE Type Approval	﻿Beautifully designed fully EC/ECE type-approved exhaust with a titanium muffler outer sleeve that is painted black and finished with an engraved Akrapovič logo. A stainless-steel link pipe and a handmade carbon-fibre end cap complete the construction to provide a sporty look in keeping with the futuristic lines of this 'urban superbike'. Impeccable throttle response and a 29.7% (1.5 kg) weight savings over the stock system add to the performance of the exhaust. It delivers a power gain of +0.5 kW (0.7 hp) at 7500 rpm and a torque increase of +0.8 Nm at 7500 rpm when measured on the Akrapovič dyno against a Dragster 300 with a standard stock exhaust system. This is an exhaust that performs as good as it looks and sounds. It is easy to install, and there is no need for any remapping. An optional carbon-fibre heatshield is also available to add the finishing touch. The catalytic converter is included in the product and the EC/ECE type-approval is valid only when the catalytic converter is installed.	Scooter	Italjet	Dragster 300	2024	2024	€	1 029,83

S-Y125SO6-HRSS	3831126422059	Slip-On Line (SS)	SO - Slip-On	EC Type Approval, ECE Type Approval	A high-grade stainless-steel link pipe and muffler with a sandblasted outer sleeve, finished with a handmade carbon-fibre end cap and monochrome sticker, give this exhaust a striking appearance. This Euro 5-approved product has a catalytic converter included in the package. Race-proven materials reduce the weight by 19.7% (1.0 kg), and its sound has a deep and vivid tone. This ECE type-approved exhaust requires the stock exhaust system to be cut for installation, keeping the stock catalytic converter located in the header to satisfy type approval. Due to this requirement, an optional Reassembly Set (SS) has been developed to allow customers to remove the Slip-On Line (SS) exhaust and re-install the stock system onto the cut header at a later date if required. Plug-and-play installation means no remapping is required. The system also fits the Yamaha XMAX 125 Tech MAX version.	Scooter	Yamaha	XMAX 125	2021	2024	€	1 070,55

S-Y5R2-RT	3831095095025	Racing Line (Titanium)	RC - Racing		A complete high-quality stainless steel exhaust system with a titanium muffler outer sleeve is made with precision handcrafting and real attention to detail. It's simply the finest exhaust system available for scooters. The design enables the maximum output for each specific model of scooter while reducing overall weight for enhanced and useable performance in everyday riding. These products deliver that unmistakable deep resonant Akrapovič sound. Each Racing exhaust system features Akrapovič's finest carbon fibre end caps. THIS PRODUCT DOES NOT MEET OR HIGHWAY COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Scooter	Yamaha	TMAX	2008	2016	€ 1 100,92
S-Y5R3-HZEMT/1	3831113556569	Racing Line (Titanium)	RC - Racing	EC Type Approval, ECE Type Approval	Developed from a concept that was first aired at EICMA 2015, the Racing Line (Titanium) fits perfectly within the sporty lines of the Yamaha TMAX. This ultimate sports maxi scooter already has a presence on the road, and the addition of this stunningly designed Akrapovič exhaust system will take it to new aesthetic heights as it perfectly enhances the TMAX's design. The unique shape of the muffler, with its embossed Akrapovič logo imprints that run all the way along the exhaust and blend in seamlessly with the hand-crafted carbon fibre endcap, takes design to new levels and demonstrates that the Slovenian exhaust specialists are constantly looking towards the future with their innovative and high-tech exhaust technology. To compliment the stunning looks, the Racing Line exhaust system also delivers more power than the stock system, and the use of high-grade lightweight material means it also has a significant weight saving, which aids handling. The impressive visual appearances and improved performance are further boosted by an exclusive Akrapovič sound that is perfectly tuned to provide ideal aural dynamics. With simple plug-and-play installation and	Scooter	Yamaha	TMAX	2017	2019	€ 1 269,45
S-Y5R9-HILT	3831126441371	Racing Line (Titanium)	RC - Racing	EC Type Approval, ECE Type Approval	This latest version of the Euro5 + ECE type-approved Racing Line (Titanium) exhaust system is composed of a high-grade titanium muffler outer sleeve – which is sandblasted for a perfect finish – and a stainless-steel link-pipe and headers. It is finished with a carbon-fibre end-cap – a distinctive design with the Akrapovič logo embossed on it. Meeting Euro 5 approval, this complete exhaust system with a new muffler design also comes with a carbon-fibre heat shield, as well as a catalytic converter. Weighing in at 1.9 kg (21.9%) lighter than the standard stock system, the Racing Line (Titanium) offers optimum throttle response and serves up a deep and vivid Akrapovič sound, all from a simple plug-and-play installation with no remapping required. Exhaust system fits on Yamaha TMAX Tech MAX version.	Scooter	Yamaha	TMAX	2020	2025	€ 1 889,08
