Very versatile attach and resistant to all sorts of weather conditions.Dimensions: 140 x 52 cm	Promotional Material	Accessories & Promotion	POS MC	Default	27	EUR

				Add a stainless steel Slip-On exhaust system and make the Abarth (1.4 16V T Jet) even faster, even more responsive, and give it an even more striking look and that unmistakable sporty Akrapović sound. The biggest difference compared to stock is most noticeable when the optional Akrapovic sound kit for adjustable sound is used. When the exhaust valve is open, the sound becomes significantly deeper and tastefully louder, but still entirely without droning. Performance facts apply to the performance exhaust with the Akrapovic sound kit and open valves. The system without the Akrapovic sound kit has a point-welded block in the link pipe that prevents bypassing the muffler. Please note: when the bypass is unblocked, the EC type approval is not valid. Complete the look with a set of exquisite 115 mm tailpipes in either titanium or carbon fibre.Warning: This product will not fit on US spec Abarth.

				Featuring a muffler and collector with a resonator made from lightweight titanium and link pipes made of high-grade stainless steel, the Evolution Line (Titanium) exhaust system fits directly onto the Giulia Quadrifoglio's stock downpipes. The system includes parts cast in the company's in-house foundry, such as the valve housing and X-part in the muffler, which is perfectly formed to allow exhaust gases to mix at a precisely defined mixing ratio.Developed to deliver both power and torque gains throughout the range and significantly reduce back pressure, it is finished with handcrafted carbon-fibre and titanium tailpipes to enhance the visual enjoyment of the exhaust.In-depth engineering has produced a deep and sporty sound with no unwanted drone, perfectly suitable for everyday use. It is distinctly different from the stock system, especially during partial load, when shifting, and at higher rpms, where it delivers a pure racing sound.The system is a simple plug-and-play operation to fit, and it has been designed to meet ECE type approval. The optional downpipe set and Akrapović Sound Kit are also available.Because of packaging requirements, the EVO system has been split into two codes. Please be aware that both part numbers (S-AR/TI/1H and E-AR/TI/1) must be ordered.EC type-approval is valid for engine type 670050436.								
S-AR/TI/1H	Evolution Line (Titanium)	EV - Evolution	ECE Type Approval	Sports Coupe	Car	Alfa Romeo	Giulia Quadrifoglio	2016	2020	4720,05	EUR	
				Downpipe Set w/o Cat (SS) was tested and developed together with Slip-On Line (Titanium) system or Evolution Line (Titanium) for the ultimate in weight reduction, tuning potential, and racing sound. Akrapović offers stainless steel, cat-less downpipes to make the Giulia Quadrifoglio an even more powerful machine. This setup is intended for dedicated track-day cars and enthusiasts, and it will also add to the overall experience of what's already a stunning performance car for any discerning driver. Delivering great sound, without creating unwanted cabin noise, these beautifully-crafted downpipes offer an upgrade to Akrapović's Evolution exhaust system.When installing Akrapović aftermarket optional down pipes, which are developed for use on closed tracks only, remapping the ECU is mandatory, in order to prevent potential «check engine light» warning signals.Fitment notice: Optional downpipes only fit to vehicles with engine number ≥5074. For vehicles with lower engine numbers, additional adapter P-X227 is needed. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.

S-AUR8S03-T	Slip-On Line (Titanium)	SO - Slip-On		The Slip-On Line exhaust system is constructed from an ultra-lightweight high-grade titanium alloy, boosting the R8's power-to-weight ratio and handling characteristics. The Slip-On Line (Titanium) has been precision engineered to improve throttle response and increase both the power and torque outputs. The performance exhaust system is designed to reduce back-pressure to almost half of the stock levels through a combination of specialized muffler shapes, secondary resonators, and titanium dual-mode exhaust valves. It is finished with two exquisitely hand-crafted carbon-fibre and titanium tailpipes that fit perfectly into the R8's stock diffuser. It is tuned to enhance the sporty note from the V10 engine while still ensuring maximum comfort and enjoyment in the car's cockpit. The tone moves from a pleasant growl at low revs to the unique Akrapović race-like sound as the revs rise and the excitement grows. The sound can be further adjusted with the addition of the optional Akrapović Sound Kit. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. S-AU/TI/24H	Evolution Line (Titanium)	EV - Evolution	ECE Type Approval	This product is constructed with high-grade titanium tubes and a muffler, which are attached to the car's stock downpipes with a high-quality stainless-steel link pipe and finished with handcrafted carbon-fibre tailpipes and a titanium inner sleeve. Weighing in at 36.2% lighter than the standard setup, this system provides power gains of 7.5 kW (10.2 hp) at 5,450 rpm and torque increases of 8.8 Nm at 3,900 rpm (when tested on the Akrapovič dyno against an Audi RS 3 with a standard stock exhaust).The in-house foundry casts the housings for the two exhaust valves, one for each side of the muffler to tailor the sound. The distinctive tones of the five-cylinder engine serve up a relaxed and pleasing purr in comfort mode, with a tasteful reminder of the car's potential when cruising in dynamic mode, and then the full sound experience is delivered while accelerating and reaching for the limit. A high-gloss handmade rear carbon-fibre diffuser is available as an optional extra, as is the optional Akrapovič Sound Kit to offer full control over the exhaust tones."If the Akrapovič Sound Kit is fitted, the Evolution Line (Titanium) ECE type-approval certificate is not valid. The exhaust system is ECE type approved for cars equipped with an Otto/gasoline particulate filter.

S-AU/TI/23H	Evolution Line (Titanium)	EV - Evolution	ECE Type Approval	This product is constructed with high-grade titanium tubes and a muffler, which are attached to the car's stock downpipes with a high-quality stainless-steel link pipe and finished with handcrafted carbon-fibre tailpipes and a titanium inner sleeve. Weighing in at 36.2% lighter than the standard setup, this system provides power gains of 7.5 kW (10.2 hp) at 5,450 rpm and torque increases of 8.8 Nm at 3,900 rpm (when tested on the Akrapovič dyno against an Audi RS 3 with a standard stock exhaust).The in-house foundry casts the housings for the two exhaust valves, one for each side of the muffler to tailor the sound. The distinctive tones of the five-cylinder engine serve up a relaxed and pleasing purr in comfort mode, with a tasteful reminder of the car's potential when cruising in dynamic mode, and then the full sound experience is delivered while accelerating and reaching for the limit. A high-gloss handmade rear carbon-fibre diffuser is available as an optional extra, as is the optional Akrapovič Sound Kit to offer full control over the exhaust tones."If the Akrapovič Sound Kit is fitted, the Evolution Line (Titanium) ECE type-approval certificate is not valid. The exhaust system is ECE type approved for cars equipped with an Otto/gasoline particulate filter.

P-HF1433	Akrapovič Sound Kit	OP - Optional part		The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.

DI-AU/CA/2/G	Rear Carbon Fibre Diffuser - High Gloss	OP - Optional part	ABE Type Approval	This high-gloss handcrafted accessory has been designed to integrate perfectly with the lines of the Audi RS 3. It was created from scratch to offer an impeccable ABE type-approved enhancement to the new tailpipes on the Evolution Line (Titanium) exhaust system. Important notice: The diffuser cannot fit with genuine trailer tow hitch. With Akrapovič diffuser, hands-free trunk lid opening/closing sensor is not working.

S-AU/TI/3H	Evolution Line (Titanium)	EV - Evolution	ECE Type Approval	Audi's high-performance RS models are an ideal match for the expertly styled and beautifully engineered Akrapovič Evolution exhaust systems. The Evolution gives more power, higher torque, decreases the weight, and delivers an unmistakable Akrapovič sound—which has a deep sound at lower revs and a 'popping' sound as things speed up when the throttle is lifted. This titanium exhaust system has cast collectors and three mufflers, with the central one featuring an x-piece inside, which increase power and improve its sound. The valves of the system are designed to open and close in line with the RS' standard electronics, and the whole system has carbon-fibre tailpipes to show off the exquisite finish of the Akrapovič exhaust. Its easy-to-fit instructions are included, and with this cat-back performance exhaust system—which means that the stock catalytic converters remain in place—there's no need to remap the ECU (it's simply a plug-and play system). S-AU/TI/2H	Evolution Line (Titanium)	EV - Evolution	ECE Type Approval	Manufactured using high-grade lightweight titanium, the Evolution Line exhaust system features a specially designed layout with one central and two side mufflers and a collector made from titanium, all leading from stainless steel link pipes with a larger diameter compared to stock and custom-made flex tubes, fully insulated where they attach to the downpipes. A valve on each side muffler controls the flow of gases and aids the fantastic sound produced by the system. Each valve has a housing cast in Akrapovič's in-house foundry, as does the complex active X-connection, which also features a valve for controlling the exhaust pulses from both sides of the engine. The system is finished with unique carbon fibre/titanium tailpipes – one on each side – with an eye-catching design that has never been used before, with the handmade dynamically shaped carbon fibre outer sleeve perfectly aligned with the satin-finished and coated titanium liner, all giving a powerful and sporty conclusion to this stunning exhaust system. Designed to supply a soundtrack that has been acoustically tuned to perfection at every rev point to give an aural delight from the low-down rumble, through a strong mid-range and onto a high frequency top end with distinctive feel of Akrapovič's racing heritage, all added to the increased excitement where every downshift is accompanied a sharp rumble. The system has been tuned to provide the occupants the comfort of driving like an everyday commuter with no unwanted drone or excessive noise. Akrapovič has conducted tests on its in-house dyno with the Evolution Line (Titanium) exhaust system. The Link pipe set (SS) L-AU/SS/6 is a mandatory product to the Evolution Line (Titanium) S-AU/TI/15H. [illegible]

<p>This system is constructed using lightweight race-proven materials, titanium for the muffler and link pipe section, and carbon fibre for two sets of newly designed, hand-crafted tailpipes, delivering a result that is over 41%, lighter in comparison to the standard stock system. The Evolution Line (Titanium) has been produced with a valve - which has a housing cast in Akrapovič's own foundry - fitted outside the muffler. This design feature with perfect gas flow allows the sound to be tailored to deliver an Akrapovič aural effect. This creates a smooth, rich sound not normally associated with a deep sporty tone, while driving the Audi S3 more dynamically. Power is increased by 4 kW (5.4 hp) at 4,350 rpm, with a torque gain of 8.8 Nm at 3,900 rpm. These figures were measured on the Akrapovič dyno when tested against an Audi S3 with a standard stock exhaust. No remapping is required, giving it a plug-and-play capability, and an optional Akrapovič Sound Kit is also available to offer the driver greater control over the superb tones produced by the system. The exhaust system is ECE type approved for cars equipped with an Otto/gasoline particulate filter.</p> <p>The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. Pictures are symbolic.</p> <p>The Audi S range of cars features high-performance V8 engines that are a perfect match for the Akrapovič Evolution exhaust systems. Styled and designed in-house by Akrapovič's engineers, the Audi S range of Evolution exhausts include valves that are steered through electric actuators designed to alter their position depending on the vehicle's driving program and the driver's style. They can also be changed in the car's individual program settings. The addition of an Evolution exhaust will increase power and torque levels, while decreasing weight and adding the unique Akrapovič sound.</p> <p>Evolution exhausts give the car a noticeably different character, with a deep sound at lower revs and a sportier note as the revs rise. With four, superbly styled round carbon-fibre tailpipes, the Evolution system looks as good as it works on Audi S models. This cat-back performance exhaust system leaves the stock catalytic converters in place, so there is no need to remap the ECU. Its easy-to-fit instructions make installation a simple, plug-and-play task.</p> <p>The Audi S range of cars features high-performance V8 engines that are a perfect match for the Akrapovič Evolution exhaust systems. This cat-back performance exhaust system leaves the stock catalytic converters in place, so there is no need to remap the ECU. Its easy-to-fit instructions make installation a simple, plug-and-play task.</p>

				Evolution exhaust systems for the BMW 340i are the result of the perfect integration of expertise, the best technology, and the use of the finest materials. Made of austenitic stainless steel, these systems feature a layout with two central mandatory link pipes replacing the single stock pipe. The system is finished with carbon fibre tailpipes. This sporty elegance makes this Bavarian machine stand out from the rest and offers the taste of a more powerful version, accentuated with the additional power gains and weight losses of the Evolution performance exhaust system. The dual-mode ECU-controlled valve exhaust from Akrapović offers stock-level sound at normal cruising, and a joyful deep sporty note when driving the 340i more dynamically. The Evolution systems replace the stock exhaust from the catalytic converters back. Please be aware that both part numbers: MTP-BM/SS/2H and E-BM/SS/2 have to be ordered! The system is splitted in 2 codes only because of packaging issues. Fitment notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF).	Sports Coupe	Car	BMW	340i (F30, F31)	2016	2019	2599,8	EUR

				The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapović technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapović Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.	Sports Coupe	Car	BMW	340i (F30, F31) - OPF/GPF	2018	2019	468,47	EUR
P-HF1179	Akrapović Sound Kit	OP - Optional part										
				The Slip-On exhaust system for the BMW 340i/440i is the result of the perfect integration of expertise, the best technology, and the use of the finest materials. It is made entirely of titanium and finished with two sets of newly designed handcrafted carbon-fibre tailpipes. This sporty elegance makes this Bavarian machine stand out from the rest and offers the taste of a more powerful vehicle, accentuated with the additional power gains and weight losses of the Slip-On exhaust system. The dual-mode ECU-controlled valve exhaust from Akrapović offers a smooth, rich sound at normal cruising, and a deep, sporty, almost aggressive note when driving the 340i/440i more dynamically. It features developed acoustic reflector before the tail pipe that drivers can manually adjust if they wish to boost the sound in the cabin and enhance the joy of the driving experience. The system is a simple plug-and-play operation to fit, and it has been designed to meet ECE type approval. The optional Akrapović Sound Kit is also available. For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation. Fitment notices: Exhaust fits also on vehicles with X-drive. Slip-on Line (Titanium) can be used with BMW low bar. Slip-on system does not fit on cars equipped with diffuser by M Performance.	Sports Coupe	Car	BMW	340i (F30, F31) - OPF/GPF	2018	2019	2899,98	EUR

<p>The Slip-On exhaust system for the BMW 340i(440i) is the result of the perfect integration of expertise, the best technology, and the use of the finest materials. It is made entirely of titanium and finished with two sets of newly designed handcrafted carbon-fibre tailpipes. This sporty elegance makes this Bavarian machine stand out from the rest and offers the taste of a more powerful vehicle, accentuated with the additional power gains and weight losses of the Slip-On exhaust system. The dual-mode ECU-controlled valve exhaust from Akrapović offers a smooth, rich sound at normal cruising, and a deep, sporty, almost aggressive note when driving the 340i(440i) more dynamically. It features developed acoustic reflector before the tail pipe that drivers can manually adjust if they wish to boost the sound in the cabin and enhance the joy of the driving experience. The system is a simple plug-and-play operation to fit, and it has been designed to meet ECE type approval. The optional Akrapović Sound Kit is also available. For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation.Fitment notices: Exhaust fits also on vehicles with X-drive. Slip-on Line (Titanium) can be used with BMW tow bar. Slip-on system does not fit on cars equipped with diffuser by M Performance.</p> <p>The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapović technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves.With the use of the optional Akrapović Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.</p> <p>Beautifully crafted from high-grade titanium, this lightweight exhaust system is finished with eye-catching carbon-fibre tailpipes and is a full-on sensory delight. The exhaust valve – with its housing cast in the in-house foundry – gives the exhaust a rich sound with an emphasis on high frequencies, especially when shifting through the gears, all allied to a deep tone that enhances the car's engine without any discomfort or drone for the occupants. A specially engineered Y-split reduces the flow noise without any compromise to the pressure pulse distribution, thus offering a strong sound and optimal flow path. The use of lightweight materials and a different configuration reduces the overall weight of the exhaust by 9.4 kg, a saving of 55.6% on the stock version. The design and construction of the exhaust optimize the power and torque levels throughout the rev range, with performance increased by 3.3 kW (4.5 hp) at 5,350 rpm and torque up by 5.9 Nm at 5,300 rpm. This was achieved during in-house tests with back-to-back runs on the Akrapović dyno against a BMW M135i using a standard stock exhaust. For a further upgrade of the Slip-On Line (Titanium) exhaust system, an optional Evolution Link pipe set (SS) is available. The ECE type-approval certificate is valid only for 2020 model year cars equipped with an Otto/gasoline particulate filter. The exhaust system can be fitted on the BMW M135i XDrive model. To install the Slip-On Line (Titanium) exhaust system, the stock exhaust system must be cut; please read the instructions carefully before the start of the installation.</p> <p>The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapović technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves.With the use of the optional Akrapović Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.</p> <p>The Evolution Link pipe set (SS) was tested and developed together with the Slip-On Line (Titanium) exhaust system to provide an ideal upgrade and greater exhaust tuning potential. The use of this configuration is designed for the racetrack and will offer a sporty sound and higher performance. With the elimination of the OPF, the sound levels and frequency content are emphasized, providing an increased sound, leading to an exhilarating tone with crackling and burbling as an enjoyable aural assault on over-run and when downshifting through gears. The change in performance is a noticeable factor compared in back-to-back runs on the Akrapović dyno against a BMW M135i using a standard stock exhaust, there a 5.1 kW (6.9 hp) increase in power at 4,250 rpm and 11.5 Nm of torque is added at 4,250 rpm. When installing the Evolution Link pipe set (SS), which is developed for use on closed tracks only, remapping of the ECU is mandatory to prevent potential "check engine light" warning signals.Fitment notice: This product can only be installed on vehicles with the V-clamp connection between the stock downpipe and link pipe. For further information, please read the installation instructions below.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p> <p>The Evolution Link pipe set (SS) was tested and developed together with the Slip-On Line (Titanium) exhaust system to provide an ideal upgrade and greater exhaust tuning potential. P-HF977	Akrapovič Sound Kit	OP - Optional part	W/O Approval	The sound of the superb Evolution Line (Titanium) exhaust system can be further controlled by adding the optional Akrapovič Sound Kit. This easy-to-install option makes possible louder or quieter settings of the Evolution Line. It has a special program for valve management (n quiet and loud mode) that is different from the stock version and controls the valves according to rpm, gear, and car mode. Pictures are symbolic.	Sports Coupe	Car	BMW	M2 (F87)	2016	2017	544,11	EUR
DP-BM/SS/4/H	Downpipe w Cat (SS)	OP - Optional part		Downpipe w Cat (SS) was tested and developed together with Evolution Line (Titanium) system. Made from high-quality stainless steel and fitted with a sporty catalytic converter, no remapping is needed for this performance upgrade. The high-flow downpipe produces an enhanced sound that delivers a pure racing emotion and fantastic feedback at high revs, without any unwanted drone.	Sports Coupe	Car	BMW	M2 (F87)	2016	2017	2281,87	EUR
DP-BM/SS/4	Downpipe w/o Cat (SS)	OP - Optional part		Downpipe w Cat (SS) was tested and developed together with Evolution Line (Titanium) system. The next step in the exhaust-tuning process is the addition of a stainless-steel downpipe without a catalytic converter. This will provide the best sound optimisation and increase the performance of the car. Designed primarily for track use, the ECU will need to be remapped when this downpipe is fitted to the Evolution Line exhaust system. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	BMW	M2 (F87)	2016	2017	1202,36	EUR

It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M2 a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps.	Sports Coupe	Car	BMW	M2 (F87)	2016	2017	1396,69	EUR
P-HF1177	Akrapovič Sound Kit	OP - Optional part		The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. Akrapovič Sound Kit P-HF1177 is developed for use with Slip-On Line (Titanium) only. If upgrading the slip-on system with evolution link pipe, specially developed Akrapovič Sound Kit is already included within the evolution link pipe set. With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.	Sports Coupe	Car	BMW	M2 Competition (F87N)	2018	2020	679,84	EUR
S-BM/T/3H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	The system was developed on BMW M2 Competition (F87N) equipped with OPF/GPF, however it fits both versions (OPF and non OPF). ECE type approval is only valid for cars equipped with OPF/GPF. The latest addition to the BMW M series is the awe-inspiring M2 Competition, an exquisite high-performance car that can be made even better by adding an Akrapovič Slip-On exhaust system. Made from titanium – with some parts cast in Akrapovič's own foundry – this system will reduce exhaust system's weight by over 45% and deliver extra power and lower backpressure. The sound has also been enhanced by Akrapovič's engineers, delivering a true sporty tone especially in the middle and upper rpm range but without any droning. Carbon-fibre tailpipes give an added look to the rear of the M2 Competition to display its sporting potential. Performance can be further increased with the addition of optional evolution link pipe set. To set off the system to its visual best, optional carbon-fibre diffusers and mirror caps are also available. The system is a simple plug-and-play operation to fit, and it has been designed to meet ECE type approval. The optional Akrapovič Sound Kit (P-HF1177) is also available. If upgrading the slip-on system with evolution link pipe, the optional Akrapovič Sound Kit P-HF1177 is not needed - specially developed Akrapovič Sound Kit is already included within the evolution link pipe set. With the use of optional Akrapovič Sound Kit, the ECE homologation is not valid anymore. For installing the slip-on system, the stock exhaust system has to be modified. Please note that the Evolution Link Pipe Set (Titanium) was tested and developed together with Slip-On Line (Titanium). The system was developed on BMW M2 Competition (F87N) equipped with OPF/GPF, however it fits both versions (OPF and non OPF). The Evolution link pipe set upgrades the Slip-On system to the Evolution system, which consists of a slip-on rear muffler and larger Evolution link pipe tubes with a middle muffler, all designed to make the performance and workmanship of the complete system as perfect as it looks. It is crafted entirely from titanium. The whole system is designed to provide the smoothest flow. The power and torque gains of the M2 Competition with the combination of the Slip-On Line system and Evolution link pipe set are guaranteed. In-depth engineering has produced a unique sound profile, distinctly different from the stock system, yielding a deep and sporty sound with no unwanted overtones or drone and an almost racing sound, as well as a significant change to the sound with the valves in the open or closed positions. The control kit to optimize the balance between sportiness and comfort is included, together with the receiver and Sound Remote controller (or smartphone app) to regulate the valves. When installed in combination with BMW M2 CS Slip-On (S-BM/T/26H), the Slip-On's Control Kit module P-HF1386 must be installed with the Link Pipe Set's receiver and Key Fob. When installing the Akrapovič Evolution link pipe set, remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	BMW	M2 Competition (F87N)	2018	2020	4643,73	EUR

				To further personalise the BMW M2 Coupé, M3 or M4. These stunning mirror caps have been designed especially for the car, and they match the lines beautifully. Constructed from high-grade, lightweight carbon fibre, they are hand-crafted by highly skilled specialists and make a unique addition to the car, while also complementing the tailpipes of the Slip-On Line (Titanium) exhaust, the rear wing, and the other Akrapovič products in the carbon-fibre accessory range. They are available in high-gloss or matte finish. Mirror cap set does not fit on right-hand drive vehicle. The product also fits on M3 and M4 LCI versions.										
WM-BM/CA/4/M	Carbon Fibre Mirror Cap Set - Matte	OP - Optional part		This product is totally constructed from high-grade titanium and features special parts, with two valves, one for each side of the muffler, and two acoustic reflectors. The housing of the valves and the collectors are all cast in the in-house titanium foundry. There is a choice of two tailpipe designs: either the ground-breaking octagonal shape, as first seen on the exhaust for the BMW M3/M4, or the more traditional and classic design. The twin sets of tailpipes have outer sleeves hand crafted from carbon fibre, and the use of lightweight materials has produced an exhaust that is 7.3 kg (32.7%) in comparison to the standard stock exhaust. Power is increased by 3.9 kW (5.3 hp) at 2,800 rpm and a torque gain of 13.5 Nm at 2,800 rpm was registered when tested on the Akrapovič dyno against a BMW M2 Coupé with a standard stock exhaust. The exhaust has been developed to provide a unique driving experience. Together with the most advanced Akrapovič control kit – which has been designed to offer an exceptional sound experience – the system with its exhaust valves and acoustic reflectors tailors the gas flow to a smooth, rich tone at normal cruising and a deep, sporty sound when driving the M2 Coupé more dynamically and enthusiastically. ECU remapping is not needed, and the exhaust meets ECE type-approval conditions for the BMW M2 Coupé (G87) with OPF filters. Optional link pipes and downpipes are available for closed circuit usage, along with the optional Akrapovič Sound Kit. With the installation of these options, ECE type approval of the Slip-On Line (Titanium) is no longer valid. The Slip-On Line (Titanium) exhaust To further personalise the styling, there is a choice of optional hand-crafted chopped carbon-fibre rear diffusers. Produced in-house by highly skilled technicians, this lightweight accessory – with ABE type approval – is designed to show off the tailpipes of the Akrapovič Slip-On Line (Titanium) exhaust at their absolute best.	Sports Coupe	Car	BMW	M2 Coupé (G87)	2023	2025	1075	EUR		
S-BM/T/34H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	Manufactured from lightweight hand-crafted chopped carbon fibre, this product is lacquered to create a high-gloss finish. It is mounted on two brackets with a swan neck design, fabricated from lightweight CNC-machined aluminium to provide the best ratio between weight and performance. The brackets have been optimized to provide the optimum ratio between load-bearing capacity and weight. The bolts used to connect the wing and the brackets are high-grade titanium. WM-BM/CA/4/G	Carbon Fibre Mirror Cap Set - High Gloss	OP - Optional part	W/O Approval	Evolution Link Pipe Set (Titanium) was tested and developed together with Slip-On Line (Titanium). Constructed from high-grade titanium, this noticeably lighter-than-stock link pipe features a resonator in the middle part and removes the secondary set of catalytic converters. Available for all countries (United States excluded), the link pipe delivers a power gain of 13.4 kW (18.2 hp) at 5,850 rpm and torque increases of 21.9 Nm at 5,850 rpm when tested on the Akrapovič dyno against a BMW M2 (OPF/GPF) with a standard stock exhaust. Combined with a Slip-On Line (Titanium) delivering a deep, rich, and sporty sound without drone, it totally embraces the pure turbocharged inline six-cylinder sound. Remapping is mandatory. This product is meant for racetrack use and closed courses only. This product fits on OPF and non-OPF vehicles. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	BMW	M2 Coupé (G87)	2023	2025	1190	EUR		
E-BM/T/12	Evolution Link Pipe set (Titanium) – Long	OP - Optional part		A ground-breaking octagonal shape has been fashioned from lightweight titanium with a carbon-fibre outer sleeve, totally in keeping with lines of the car. For more traditional buyers, there is the classic cylindrical design, also constructed from same materials, but featuring an update to the current range of tailpipes for BMW cars available from Akrapovič.	Sports Coupe	Car	BMW	M2 Coupé (G87)	2023	2025	1956,15	EUR		
TP-CT/69	Tail Pipe Set (Carbon)	SO - Slip-On	ECE Type Approval	A ground-breaking octagonal shape has been fashioned from lightweight titanium with a carbon fibre outer sleeve, totally in keeping with lines of the car. For more traditional buyers, there is the classic cylindrical design, also constructed from same materials, but featuring an update to the current range of tailpipes for BMW cars available from Akrapovič.	Sports Coupe	Car	BMW	M2 Coupé (G87)	2023	2025	1695,33	EUR		
TP-CT/68	Tail Pipe Set (Carbon)	SO - Slip-On	ECE Type Approval	Evolution Link Pipe Set (SS) was tested and developed together with Slip-On Line (Titanium). Constructed from high-grade stainless steel, this noticeably lighter-than-stock link pipe features a resonator in the middle part and removes the secondary set of catalytic converters. Available for all countries (United States excluded), the link pipe delivers a power gain of 13.4 kW (18.2 hp) at 5,850 rpm and torque increases of 21.9 Nm at 5,850 rpm when tested on the Akrapovič dyno against a BMW M2 (OPF/GPF) with a standard stock exhaust. Combined with a Slip-On Line (Titanium) delivering a deep, rich, and sporty sound without drone, it totally embraces the pure turbocharged inline six-cylinder sound. E-BM/SS/9	Evolution Link Pipe set (SS) – Long	OP - Optional part		Evolution Link Pipe Set (SS) was tested and developed together with Slip-On Line (Titanium).Constructed from high-grade stainless steel, this noticeably lighter-than-stock link pipe features a resonator in the middle part and removes the secondary set of catalytic converters. Available for all countries (United States excluded), the link pipe delivers a power gain of 13.4 kW (18.2 hp) at 5,850 rpm and torque increases of 21.9 Nm at 5,850 rpm when tested on the Akrapović dyno against a BMW M2 (OPF/GPF) with a standard stock exhaust. Combined with a Slip-On Line (Titanium) delivering a deep, rich, and sporty sound without drone, it totally embraces the pure turbocharged inline six-cylinder sound. Remapping is mandatory as the stock secondary catalytic converters are removed. This product is meant for racetrack use and closed courses only.This product fits on OPF and non-OPF vehicles. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	BMW	M2 Coupé (G87) - OPF/GPF	2023	2025	1350	EUR

WM-BM/CA/4/G	Carbon Fibre Mirror Cap Set - High Gloss	OP - Optional part	W/O Approval	To further personalise the BMW M2 Coupé, M3 or M4. These stunning mirror caps have been designed especially for the car, and they match the lines beautifully. Constructed from high-grade, lightweight carbon fibre, they are hand-crafted by highly skilled specialists and make a unique addition to the car, while also complementing the tailpipes of the Slip-On Line (Titanium) exhaust, the rear wing, and the other Akrapović products in the carbon-fibre accessory range. They are available in high-gloss or matte finish. The product also fits on M3 and M4 LCI versions.Mirror cap set does not fit on right-hand drive vehicle.	Sports Coupe	Car	BMW	M2 Coupé (G87) - OPF/GPF	2023	2025	1190	EUR
WM-BM/CA/5/CF	Chopped Carbon Fibre Mirror Cap Set - Matte	OP - Optional part	W/O Approval	To further personalise the BMW M2 Coupé, M3 or M4. These stunning mirror caps have been designed especially for the car, and they match the lines beautifully. Constructed from high-grade, lightweight chopped carbon fibre, they are hand-crafted by highly skilled specialists and make a unique addition to the car, while also complementing the tailpipes of the Slip-On Line (Titanium) exhaust, the rear wing, and the other Akrapović products in the carbon-fibre accessory range. They are available in high-gloss or matte finish. The product also fits on M3 and M4 LCI versions.Mirror cap set does not fit on right-hand drive vehicle.	Sports Coupe	Car	BMW	M2 Coupé (G87) - OPF/GPF	2023	2025	1209	EUR

				Manufactured from lightweight hand-crafted chopped carbon fibre, this product is lacquered to create a high-gloss finish. It is mounted on two brackets with a swan neck design, fabricated from lightweight CNC-machined aluminium to provide the best ratio between weight and performance. The brackets have been optimized to provide the optimum ratio between load-bearing capacity and weight. The bolts used to connect the wing and the brackets are high-grade titanium. High-grade titanium reinforcements have been incorporated for better structural stability at pivot points. Designed with echoes from the motorsport world, the derived aerofol of the wing was developed to achieve an extremely competitive ratio between downforce and drag. A small lip is placed at the trailing edge of a wing to achieve maximum performance of the wing by creating even more downforce.Optimized for the aerodynamics of the BMW M2 and M240i, computational fluid dynamics (CFD) has been used to ensure the best functionality, and great attention has been paid to guaranteeing that the overall geometry does not cause additional air turbulence around the rear or generate additional noise on the side of the car.Fully adjustable to three levels, the wing needs to be manually set to the preferred angle before driving. It is ABE approved with AKR-WI KBA 31882 type approval and finished with an understated Akrapovič monochrome logo on each side.									
W-BM/CA/1/CF	Rear Wing (Chopped Carbon)	OP - Optional part	ABE Type Approval		Sports Coupe	Car	BMW	M2 Coupé (G87) - OPF/GPF	2023	2025	3743	EUR	
DI-BM/CA/10/CF	Rear Chopped Carbon Fibre Diffuser - Matte	OP - Optional part	ABE Type Approval	To further personalise the styling, there is a choice of optional hand-crafted chopped carbon-fibre rear diffusers. Produced in-house by highly skilled technicians, this lightweight accessory – with type approval – is designed to show off the tailpipes of the Akrapovič Slip-On Line (Titanium) exhaust at their absolute best. This product is totally constructed from high-grade titanium and features special parts, with two valves, one for each side of the muffler, and two acoustic reflectors. The housing of the valves and the collectors are all cast in the in-house titanium foundry. There is a choice of two tailpipe designs: either the ground-breaking octagonal shape, as first seen on the exhaust for the BMW M3/M4, or the more traditional and classic design. The twin sets of tailpipes have outer sleeves hand crafted from carbon fibre, and the use of lightweight materials has produced an exhaust that is 7.3 kg (32.7%) in comparison to the standard stock exhaust. Power is increased by 3.9 kW (5.3 hp) at 2,800 rpm and a torque gain of 13.5 Nm at 2,800 rpm was registered when tested on the Akrapovič dyno against a BMW M2 Coupé with a standard stock exhaust. The exhaust has been developed to provide a unique driving experience. Together with the most advanced Akrapovič control kit – which has been designed to offer an exceptional sound experience – the system with its exhaust valves and acoustic reflectors tailors the gas flow to a smooth, rich tone at normal cruising and a deep, sporty sound when driving the M2 Coupé more dynamically and enthusiastically.ECU remapping is not needed, and the exhaust meets ECE type-approval conditions for the BMW M2 Coupé (G87) with OPF filters.Optional link pipes and downpipes are available for closed circuit usage, along with the optional Akrapovič Sound Kit. With the installation of these options, ECE type approval of the Slip-On Line (Titanium) is no longer valid. To further personalise the BMW M2 Coupé, M3 or M4. These stunning mirror caps have been designed especially for the car, and they match the lines beautifully. Constructed from high-grade, lightweight carbon fibre, they are hand-crafted by highly skilled specialists and make a unique addition to the car, while also complementing the tailpipes of the Slip-On Line (Titanium) exhaust, the rear wing, and the other Akrapovič products in the carbon-fibre accessory range. They are available in high-gloss or matte finish.Mirror cap set does not fit on right-hand drive vehicle.The product also fits on M3 and M4 LCi versions. DP-BM/SS/8	Downpipe w Cat (SS)	OP - Optional part		Developed to be used in conjunction with the Akrapovič Slip-On Line (Titanium) and the Evolution Link Pipe Set (Titanium/SS), this high-quality stainless steel downpipe set features a pair of sporty catalytic converters (200 cpsi) with heat insulation. The front part of the downpipes is cast in the in-house foundry, providing a perfect fit. Delivering a pure racing sound full of emotion, this provides great feedback at high revs, without drone. Remapping the ECU is mandatory to prevent potential check engine light warning signals. This product is meant for racetrack closed course use only.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves.Akrapovič Sound Kit P-HF1177 is developed for use with Slip-On Line (Titanium) only. If upgrading the slip-on system with evolution link pipe, specially developed Akrapovič Sound Kit is already included within the evolution link pipe set.With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid. The system was developed on BMW M2 Competition (F87N) equipped with OPF/GPF, however it fits both versions (OPF and non OPF). ECE type approval is only valid for cars equipped with OPF/GPF.The latest addition to the BMW M series is the awe-inspiring M2 Competition, an exquisite high-performance car that can be made even better by adding an Akrapovič Slip-On exhaust system. Made from titanium – with some parts cast in Akrapovič's own foundry – this system will reduce exhaust system's weight by over 45% and deliver extra power and lower backpressure. The sound has also been enhanced by Akrapovič's engineers, delivering a true sporty tone especially in the middle and upper rpm range but without any droning. Carbon-fibre tailpipes give an added look to the rear of the M2 Competition, displaying its sporting potential. Performance can be further increased with the addition of optional evolution link pipe set. To set off the system to its visual best, optional carbon-fibre diffusers and mirror caps are also available.The system is a simple plug-and-play operation to fit, and it has been designed to meet ECE type approval. The optional Akrapovič Sound Kit (P-HF1177) is also available. If upgrading the slip-on system with evolution link pipe, the optional Akrapovič Sound Kit P-HF1177 is not needed - specially developed Akrapovič Sound Kit is already included within the evolution link pipe set. With the use of optional Akrapovič Sound Kit, the ECE homologation is not valid anymore.For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start	Sports Coupe	Car	BMW	M2 Coupé (G87) - OPF/GPF	2023	2025	3231,9	EUR

<p>Evolution Link Pipe Set (Titanium) was tested and developed together with Slip-On Line (Titanium). The system was developed on BMW M2 Competition (F87N) equipped with OPF/GPF, however it fits both versions (OPF and non OPF).The Evolution link pipe set upgrades the Slip-On system to the Evolution system, which consists of a slip-on rear muffler and larger Evolution link pipe tubes with a middle muffler, all designed to make the performance and workmanship of the complete system as perfect as it looks. It is crafted entirely from titanium. The whole system is designed to provide the smoothest flow. The power and torque gains of the M2 Competition with the combination of the Slip-On Line system and Evolution link pipe set are guaranteed. In-depth engineering has produced a unique sound profile, distinctly different from the stock system, yielding a deep and sporty sound with no unwanted overtones or drone and an almost racing sound, as well as a significant change to the sound with the valves in the open or closed positions.The control kit to optimize the balance between sportiness and comfort is included, together with the receiver and Sound Remote controller (or smartphone app) to regulate the valves. When installed in combination with BMW M2 CS Slip-On (S-BMT/26H), the Slip-On's Control Kit module P-HF1386 must be installed with the Link Pipe Set's receiver and Key Fob.When installing the Akrapovič Evolution link pipe set, remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>

DI-BM/CA/3/M	Rear Carbon Fibre Diffuser - Matte	OP - Optional part	ABE Type Approval	The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M2 Competition a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps.	Sports Coupe	Car	BMW	M2 CS (F87N) - OPF/GPF	2020	2021	1202,36	EUR
DI-BM/CA/3/G	Rear Carbon Fibre Diffuser - High Gloss	OP - Optional part	ABE Type Approval	The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M2 Competition a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps.	Sports Coupe	Car	BMW	M2 CS (F87N) - OPF/GPF	2020	2021	1396,69	EUR
E-BM/T/5	Evolution Link pipe set (Titanium)	OP - Optional part			Sports Coupe	Car	BMW	M2 CS (F87N) - OPF/GPF	2020	2021	2321,87	EUR

				The system was developed on BMW M2 CS (F87N) equipped with OPFF/GPF, however it fits both versions (OPF and non OPF). ECE type approval is only valid for cars equipped with OPFF/GPF. The latest addition to the BMW M series is the awe-inspiring M2 CS, an exquisite high-performance car that can be made even better by adding an Akrapovič Slip-On exhaust system. Made from titanium – with some parts cast in Akrapovič's own foundry – this system will reduce exhaust systems weight by over 45% and deliver extra power and lower backpressure. The sound has also been enhanced by Akrapovič's engineers, delivering a true sporty tone especially in the middle and upper rpm range but without any droning. Carbon-fibre tailpipes give an added look to the rear of the M2 CS to display its sporting potential. The system is a simple plug-and-play operation to fit, and it has been designed to meet ECE type approval.The optional Akrapovič Sound Kit (P-HF1385) is also available. If upgrading the slip-on system with evolution link pipe, the optional Akrapovič Sound Kit P-HF1385 is not needed. With the use of optional Akrapovič Sound Kit, the ECE homologation is not valid anymore.For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation. The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves.Akrapovič Sound Kit P-HF1385 is developed for use with Slip-On Line (Titanium) only. If upgrading the slip-on system with evolution link pipe, specially developed Akrapovič Sound Kit is already included within the evolution link pipe set.With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid.Pictures are symbolic. E-BM/SS/3	Evolution Link pipe set (SS)	EV - Evolution	EC Type Approval	Made of austenitic stainless steel, these set feature a newly developed layout with two central link pipes replacing the single stock pipe.Please be aware that part numbers for evolution systems MTP-BM/SS/3H (for M140i) or MTP-BM/SS/4H (for M240i) have to be ordered together with E-BM/SS/3. Both systems are splitted in 2 codes only because of packaging issues. The Evolution Line exhaust system will propel the BMW M240i to the next step of performance tuning due to an increase in torque and power. Impeccably designed to fit perfectly within the lines of the car, this austenitic stainless steel system is finished with hand-crafted carbon-fibre tailpipes to increase the visual impact. It has a layout incorporating two central link pipes to replace the stock single version, designed for optimum flow of the exhaust gases. A dual-mode ECJ-controlled valve manages the sound levels, which ultimately delivers a deep and fulfilling sporty note as the revs rise. EC-compliant and easy to install, the Evolution Line system is a perfect accompaniment to an already spectacular car.Please be aware that both part numbers: MTP-BM/SS/4H and E-BM/SS/3 have to be ordered! The system is splitted in 2 codes only because of packaging issues.Fitment notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF).Exhaust fits also on vehicles with X-drive. S-BM/T/8H	Slip-On Line (Titanium)	EV - Evolution	ECE Type Approval	The Slip-On exhaust system for the BMW M240i is the result of the perfect integration of expertise, the best technology, and the use of the finest materials. It is made entirely of titanium and finished with two sets of newly designed handcrafted carbon-fibre tailpipes. This sporty elegance makes this Bavarian machine stand out from the rest and offers the taste of a more powerful vehicle, accentuated with the additional power gains and weight losses of the Slip-On exhaust system. The dual-mode ECJ-controlled valve exhaust from Akrapovič offers a smooth, rich sound at normal cruising, and a deep, sporty, almost aggressive note when driving the M240i more dynamically. It features developed acoustic reflector behind the tail pipe that drivers can manually adjust if they wish to boost the sound in the cabin and enhance the joy of the driving experience. The system is a simple plug-and-play operation to fit, and it has been designed to meet ECE type approval. The optional Akrapovič Sound Kit is also available. For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation.Fitment notices: Exhaust fits also on vehicles with X-drive. Slip-on Line (Titanium) can be used with BMW tow bar. Slip-on system does not fit on cars equipped with diffuser by M Performance. Offering a noticeable weight savings, increased power and torque, and a dramatic soundtrack, this system is constructed from lightweight high-grade titanium and completed with hand-crafted carbon-fibre tailpipes. Power and torque are increased by 7.1 Kw (9.7 hp) at 2,450 rpm and 20.5 Nm at 2,450 rpm when tested on the Akrapovič dyno against a BMW M240i with a standard stock exhaust. An exhilarating soundtrack is delivered through the use of special parts fitted in the system. Two valves – instead of one, as in the stock configuration – are calibrated to tailor the sound, and two acoustic reflectors are fitted on the tailpipes to guide the sound into the car's cabin and change the driving experience, producing a fully immersive sound in the car's cockpit, to supply thrills and enjoyment that can be enjoyed by all occupants. Because the Akrapovič Slip-On Line (Titanium) exhaust system has two valves, one more than the stock configuration, a TNG controller is included in the product to activate the additional exhaust valve. Two resonators, one on each side of the central muffler, perfect the sound experience. The smooth, rich sound at normal cruising rises to a deep and sporty soundtrack when driving more enthusiastically, and the tones can also be controlled from within the cockpit with addition of the optional Akrapovič Sound Kit. Special parts are cast in the Akrapovič in-house foundry to create the intricate and complex items needed for this system. It meets ECE type approval, and no remapping is needed for this configuration.ECE certificate is valid only for cars equipped with OPF. P-HF1452	Akrapovič Sound Kit	OP - Optional part		Manufactured from lightweight hand-crafted carbon fibre, this product is lacquered to create a high-gloss finish. It is mounted on two brackets with a swan neck design fabricated from lightweight CNC-machined aluminium to provide the best ratio between weight and performance. The brackets have been optimized to provide the optimum ratio between load-bearing capacity and weight. The bolts used to connect the wing and the brackets are high-grade titanium. High-grade titanium reinforcements have been incorporated for better structural stability at pivot points. Designed with echoes from the motorsport world, the derived aerofol of the wing was developed to achieve an extremely competitive ratio between downforce and drag. A small lip is placed at the trailing edge of a wing to achieve maximum performance of the wing by creating even more downforce. Optimized for the aerodynamics of the BMW M2 and M240i, computational fluid dynamics (CFD) has been used to ensure the best functionality, and great attention has been paid to guaranteeing that the overall geometry does not cause additional air turbulence around the rear or generate additional noise on the side of the car. Fully adjustable to three levels, the wing needs to be manually set to the preferred angle before driving. It is ABE approved with AKR-WI KBA 31882 type approval and finished with an understated Akrapovič monochrome logo on each side.	Sports Coupe	Car	BMW	M240i (G42)	2022	2024	432.46	EUR

				<p>The Evolution link pipe set upgrades the Slip-On system to the Evolution system, which consists of a single-central muffler with valves and bigger Evolution link pipe tubes with a middle muffler, all designed to make the performance and workmanship of the complete system as perfect as it looks. With no second set of cats (unlike the stock system), the whole system is designed to give the smoothest flow—and the power and torque gains of the BMW with the combination of the Slip-On Line system and Evolution link pipe set are absolutely guaranteed. Crafted entirely from titanium, the complete system has a unique sound to complement its substantial increase over a very wide rpm range. In-depth engineering has produced a sound distinctly different from the stock system, giving a deep and sporty sound with no unwanted overtones or drone, and also a significant change to the sound with the valves in the open or closed positions. The complete system needs no re-programming of the ECU because it doesn't trigger any warning lights. With tailpipes in titanium or carbon, and a handcrafted rear diffuser, all available as optional extras, the BMW with the Slip-On Line and Evolution link pipe set is as beautiful as it is powerful. Exhaust system also fits to M3/M4 CS (Sport Club) and GTS version. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>	Sports Coupe	Car	BMW	M3 (F80)	2014	2018	2058,63	EUR

P-HF1100	Akrapovič Sound Kit	OP - Optional part		<p>The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. In this case, the ECE homologation is not valid anymore. Pictures are symbolic.</p>	Sports Coupe	Car	BMW	M3 (F80)	2014	2018	729,66	EUR
WM-BM/CA/5/CF	Chopped Carbon Fibre Mirror Cap Set - Matte	OP - Optional part	W/O Approval	<p>To further personalise the BMW M2 Coupé, M3 or M4. These stunning mirror caps have been designed especially for the car, and they match the lines beautifully. Constructed from high-grade, lightweight chopped carbon fibre, they are hand-crafted by highly skilled specialists and make a unique addition to the car, while also complementing the tailpipes of the Slip-On Line (Titanium) exhaust, the rear wing, and the other Akrapovič products in the carbon-fibre accessory range. They are available in high-gloss or matte finish. The product also fits on M3 and M4 LCI versions. Mirror cap set does not fit on right-hand drive vehicle.</p>	Sports Coupe	Car	BMW	M3 (G80, G81)	2021	2025	1209	EUR
TP-CT/73/CF	Tail Pipe Set (Chopped Carbon)	SO - Slip-On	ECE Type Approval	<p>A ground-breaking octagonal shape has been fashioned from lightweight titanium with a chopped carbon-fibre outer sleeve, totally in keeping with lines of the car. For more traditional buyers, there is the classic cylindrical design, also constructed from same materials, but featuring an update to the current range of tailpipes for BMW cars available from Akrapovič. The product also fits on M3 and M4 LCI versions.</p>	Sports Coupe	Car	BMW	M3 (G80, G81)	2021	2025	1780	EUR

E-BM/SS/9	Evolution Link Pipe Set (SS) - Long	OP - Optional part		<p>Evolution Link Pipe Set (SS) was tested and developed together with Slip-On Line (Titanium). Constructed from high-grade stainless steel, this noticeably lighter-than-stock link pipe features a resonator in the middle part and removes the secondary set of catalytic converters. Available for all countries (United States excluded), the link pipe delivers a power gain of 13.4 kW (18.2 hp) at 5.850 rpm and torque increases of 21.9 Nm at 5.850 rpm when tested on the Akrapovič dyno against a BMW M2 (JPF/GPF) with a standard stock exhaust. Combined with a Slip-On Line (Titanium) delivering a deep, rich, and sporty sound without drone, it totally embraces the pure turbocharged inline six-cylinder sound. Remapping is mandatory as the stock secondary catalytic converters are removed. This product is meant for racetrack use and closed courses only. This product fits on OPF and non-OPF vehicles. The product also fits on M3 and M4 LCI versions. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>	Sports Coupe	Car	BMW	M3 (G80, G81)	2021	2025	1350	EUR

<p>This high-grade lightweight titanium system, finished with hand-crafted carbon-fibre tailpipes, weighs in at 35% lighter than stock and features a pair of collectors cast in the in-house foundry. The Slip-On Line (Titanium) comes with a specially developed Akrapović control kit for a complete sound experience. The sound character offers a rich tone at normal cruising, rising to a deep sporty sound when the M3/M4 is driven more dynamically. It serves up a perfect sound at all rpms, delivering comfort and sportiness in one exhaust. A ground-breaking octagonal shape has been fashioned from lightweight titanium with a carbon-fibre outer sleeve for the tailpipes, and for more traditional buyers there is the classic cylindrical design. The system delivers power increases of 8.0 kW (10.9 hp) at 6,000 rpm and a torque gain of 13.9 Nm at 5,000 rpm when tested on the Akrapović dyno against a BMW M4 Competition with a standard stock exhaust. Remapping is not needed for this configuration, and it fits all vehicles (OPF and non-OPF), but the ECE certificate is valid only for cars equipped with an OPF filter. Optional link pipes and downpipes are available for customers looking to change the exhaust for closed circuit usage. An optional Akrapović Sound Kit is also available. With the installation of the optional link pipes, downpipes, and Akrapović Sound Kit, ECE type approval of the Slip-On Line (Titanium) is no longer valid. An optional hand-crafted carbon-fibre rear diffuser is also available to add an extra visual impact to the Akrapović tailpipes. The exhaust system also fits on xDrive, CSL, M4 GTD and M4 GTD Competition. Manufactured from lightweight hand-crafted chopped carbon fibre, this product is lacquered to create a high-gloss finish. It is mounted on two brackets with a swan neck design, fabricated from lightweight CNC-machined aluminium to provide the best ratio between weight and performance. The brackets have been optimized to provide the optimum ratio between load-bearing capacity and weight. The bolts used to connect the wing and the brackets are high-grade titanium. High-grade titanium reinforcements have been incorporated for better structural stability at pivot points. Designed with echoes from the motorsport world, the derived aerofol of the wing was developed to achieve an extremely competitive ratio between downforce and drag. A small lip is placed at the trailing edge of a wing to achieve maximum performance of the wing by creating even more downforce. Optimized for the aerodynamics of the BMW M2 and M240i, computational fluid dynamics (CFD) has been used to ensure the best functionality, and great attention has been paid to guaranteeing that the overall geometry does not cause additional air turbulence around the rear or generate additional noise on the side of the car. Fully adjustable to three levels, the wing needs to be manually set to the preferred angle before driving. It is ABE approved with AKR-WI KBA 31882 type approval and finished with an understated Akrapović monochrome logo on each side. The product also fits on M3 and M4 LCI versions.</p>

			This product is crafted from high-quality stainless steel, with the front part of the downpipe cast in Akrapovič's in-house foundry. A sporty 300 cpsi catalytic converter is integrated into the downpipe, with the heat insulation made of stainless steel and a flexible tube incorporated into the middle section. Power gains with an Evolution Line (Titanium) fitted with the Akrapovič downpipe of 18.7 kW (25.4 hp) at 5,600 rpm and torque increases of 34.7 Nm at 2,400 rpm have been recorded when tested on the Akrapovič dyno against a BMW M40i with the standard stock exhaust. It delivers a pure racing sound, full of emotion and adrenaline-inducing enjoyment, and great feedback at high revs, all without unwanted drone. This product is meant for racetrack use only, and remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals. The downpipe is an optional product for the following Evolution Line (Titanium) exhaust systems: BMW M340i (G20) without OFFGPF; Slip-On Line (Titanium) + Evolution Link pipe (SS) - S-BMT/17H + E-BMSS/8 BMW M40i (G22) without OFFGPF; Slip-On Line (Titanium) + Evolution Link pipe (SS) - S-BMT/18H + E-BMSS/8. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.

				Offering a noticeable weight savings, increased power and torque, and a dramatic soundtrack, this system is constructed from lightweight high-grade titanium and completed with hand-crafted carbon-fibre tailpipes. The system offers an 11.89 kg savings over the standard stock system, an incredible difference of 33%. Power and torque are increased by 3.4 Kw (4.6 hp) at 2,650 rpm and 12.4 Nm at 2,650 rpm when tested on the Akrapovič dyno against a BMW M4(0) with a standard stock exhaust. An exhilarating soundtrack is delivered through the use of special parts fitted in the system. Two valves – instead of one, as in the stock configuration – are calibrated to tailor the sound, and two acoustic reflectors are fitted on the tailpipes to guide the sound into the car's cabin and change the driving experience, producing a fully immersive sound in the car's cockpit, to supply thrills and enjoyment that can be enjoyed by all occupants. Because the Akrapović Slip-On Line (Titanium) exhaust system has two valves, one more than the stock configuration, a TNG controller is included in the product to activate the additional exhaust valve. Two resonators, one on each side of the central muffler, perfect the sound experience. The smooth, rich sound at normal cruising rises to a deep and sporty soundtrack when driving more enthusiastically, and the tones can also be controlled from within the cockpit with addition of the optional Akrapović Sound Kit. Special parts are cast in the Akrapovič in-house foundry to create the intricate and complex items needed for this system. It meets ECE type approval and no remaining is needed for the homologation process.	Sports Coupe	Car	BMW	M340i (G20, G21) - OPFF/GPFF	2020	2024	5350	EUR
S-BMW730H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. P-HF135I	Akrapović Sound Kit	OP - Optional part		Filmet notice:Mandatory fitting kit, used for mounting the Rear Wing (Carbon) to BMW M3 (G80) and M340i (G20). This product also fits on M3 LCI versions. Manufactured from lightweight hand-crafted carbon fibre, this product is lacquered to create a high-gloss finish. It is mounted on two brackets with a swan neck design, fabricated from lightweight CNC-machined aluminium to provide the best ratio between weight and performance. The brackets have been optimized to provide the optimum ratio between load-bearing capacity and weight. The bolts used to connect the wing and the brackets are high-grade titanium. High-grade titanium reinforcements have been incorporated for better structural stability at pivot points. Designed with echoes from the motorsport world, the derived aerofol of the wing was developed to achieve an extremely competitive ratio between downforce and drag. A small lip is placed at the trailing edge of a wing to achieve maximum performance of the wing by creating even more downforce.Optimized for the aerodynamics of the BMW M3 and M4, computational fluid dynamics (CFD) has been used to ensure the best functionality, and great attention has been paid to guaranteeing that the overall geometry does not cause additional air turbulence around the rear or generate additional noise on the side of the car.Fully adjustable to three levels, the wing needs to be manually set to the preferred angle before driving. It is ABE approved with AKR-MW KBA 31882 type approval and finished with an understated Akrapović monochrome logo on each side.The product also fits on M3 LCI version. This product does not fit on the BMW M3 Touring (G81) model.This product does not fit on the BMW M340i Touring (G21) model.	Sports Coupe	Car	BMW	M340i (G20, G21) - OPFF/GPFF	2020	2025	385	EUR

TP-CT/26	Tail pipe set (Carbon)	OP - Optional part	ECE Type Approval	As the most visible part of an exhaust system, we pay the utmost attention to the tailpipes. Akrapovič has created hand-crafted carbon-fibre tailpipes to enrich the visual enjoyment of the Slip-On or Evolution exhaust systems. Sporting the unique Akrapovič round design, the carbon- version has sandblasted titanium inner parts with a bigger diameter than stock tailpipes to make them stand out from the crowd even more. The new model was unveiled with distinctive Akrapovič design elements, and these beautifully crafted additions are designed to fit perfectly with the carbon- diffuser.	Sports Coupe	Car	BMW	M4 (F82, F83)	2014	2020	1469,02	EUR
TP-T/5/8	Tail pipe set (Titanium)	OP - Optional part	ECE Type Approval	As the most visible part of an exhaust system, we pay the utmost attention to the tailpipes. Akrapovič has created special titanium tailpipes to enrich the visual enjoyment of the Slip-On or Evolution exhaust systems. Sporting the unique Akrapovič round design, the titanium version combines polished and sandblasted titanium and a bigger diameter than stock tailpipes to make them stand out from the crowd even more. The new model was unveiled with distinctive Akrapovič design elements, and these beautifully crafted additions are designed to fit perfectly with the carbon- diffuser.	Sports Coupe	Car	BMW	M4 (F82, F83)	2014	2020	1469,02	EUR
E-BM/T3	Evolution Link pipe set (Titanium)	OP - Optional part		The Evolution link pipe set upgrades the Slip-On system to the Evolution system, which consists of a single-central muffler with valves and bigger Evolution link pipe tubes with a middle muffler, all designed to make the performance and workmanship of the complete system as perfect as it looks. With no second set of cats (unlike the stock system), the whole system is designed to give the smoothest flow—and the power and torque gains of the BMW with the combination of the Slip-On Line system and Evolution link pipe set are absolutely guaranteed. Crafted entirely from titanium, the complete system has a unique sound to complement its substantial increase over a very wide rpm range. In-depth engineering has produced a sound distinctly different from the stock system, giving a deep and sporty sound with no unwanted overtones or drone, and also a significant change to the sound with the valves in the open or closed positions. The complete system needs no re-programming of the ECU because it doesn't trigger any warning lights. With tailpipes in titanium or carbon, and a handcrafted rear diffuser, all available as optional extras, the BMW with the Slip-On Line and Evolution link pipe set is as beautiful as it is powerful.Exhaust system also fits to M3/M4 CS (Sport Club) and GTS version.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	BMW	M4 (F82, F83)	2014	2020	2058,63	EUR
DI-BM/CA/1	Rear Carbon Fibre Diffuser	OP - Optional part	ABE Type Approval	The Akrapovič Evolution and Slip-On line exhaust systems can be further enhanced with an optional hand-crafted carbon fibre rear diffuser. Developed by Akrapovič's Design Department, this stunning diffuser, crafted from materials developed through Akrapovič's racing involvement, is designed to perfectly fit the lines of the unique tailpipes of the Slip-On or Evolution systems, as well as complement the sleek and sporty shape of the BMW. When mounting Akrapovic rear carbon fiber diffuser BMW comfort access system will not work.	Sports Coupe	Car	BMW	M4 (F82, F83)	2014	2020	1018,05	EUR
M-BM/T/8H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	The latest addition to the BMW M series is the awe-inspiring M3/M4, an exquisite high-performance car that can be made even better by adding an Akrapovič Slip-On exhaust system. Made from titanium—with some parts cast in Akrapovič's own foundry—it has bigger pipes than the stock exhaust, yielding lower back pressure and more power, especially at lower RPMs. This system is a completely new design, and it will reduce overall vehicle weight and deliver extra power and a sporty sound, which has been tailored to highlight lower frequencies and increase the listening experience. Increases in both power and torque add to the sensory experience, combined with improved agility. The look of the Slip-On system can also be further enhanced by adding titanium or carbon- tailpipes and the stunning carbon- rear diffuser.An optional Akrapovič Sound Kit is available to control the different sound settings.Fittment notice:This system does not fit on vehicles equipped with Otto particulate filter (OPF).Exhaust system also fits to M3/M4 CS (Sport Club) and GTS version (ECE type approval is not valid for GTS model).	Sports Coupe	Car	BMW	M4 (F82, F83)	2014	2020	3274,92	EUR

				The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. Akrapovič Sound Kit P-HF1194 is developed for use with Slip-On Line (Titanium) only. If upgrading the slip-on system with evolution link pipe, specially developed Akrapovič Sound Kit is already included within the evolution link pipe set. With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.								
P-HF1194	Akrapovič Sound Kit	OP - Optional part										
				For extra visual impact, there is the option to add a hand-crafted chopped carbon fibre diffuser. Produced in-house, this lightweight accessory – with ABE type approval – is designed to show off the tailpipes of the Akrapovič exhaust at their absolute best. This product fits on xDrive, CSL, LCI and M4 (G83) Competition models.	Sports Coupe	Car	BMW	M4 (G82, G83)	2021	2025	1680	EUR
DI-BM/CA/9/CF	Rear Chopped Carbon Fibre Diffuser - Matte	OP - Optional part	ABE Type Approval									
				Manufactured from lightweight hand-crafted chopped carbon fibre, this product is lacquered to create a high-gloss finish. It is mounted on two brackets with a swan neck design, fabricated from lightweight CNC machined aluminium to provide the best ratio between weight and performance. The brackets have been optimized to provide the optimum ratio between load-bearing capacity and weight. The bolts used to connect the wing and the brackets are high-grade titanium. High-grade titanium reinforcements have been incorporated for better structural stability at pivot points. Designed with echoes from the motorsport world, the derived aerodol of the wing was developed to achieve an extremely competitive ratio between downforce and drag. A small lip is placed at the trailing edge of a wing to achieve maximum performance of the wing by creating even more downforce. Optimized for the aerodynamics of the BMW M2 and M240i, computational fluid dynamics (CFD) has been used to ensure the best functionality, and great attention has been paid to guaranteeing that the overall geometry does not cause additional air turbulence around the rear or generate additional noise on the side of the car. Fully adjustable to three levels, the wing needs to be manually set to the preferred angle before driving. It is ABE approved with AKR-WI KBA 31882 type approval and finished with an understated Akrapovič monochrome logo on each side. The product also fits on M3 and M4 LCI versions.								
WI-BM/CA/1/CF	Rear Wing (Chopped Carbon)	OP - Optional part	ABE Type Approval									
				To further personalise the BMW M2 Coupé, M3 or M4. These stunning mirror caps have been designed especially for the car, and they match the lines beautifully. Constructed from high-grade, lightweight chopped carbon fibre, they are hand-crafted by highly skilled specialists and make a unique addition to the car, while also complementing the tailpipes of the Slip-On Line (Titanium) exhaust, the rear wing, and the other Akrapovič products in the carbon-fibre accessory range. They are available in high-gloss or matte finish. The product also fits on M3 and M4 LCI versions. Mirror cap set does not fit on right-hand drive vehicle.	Sports Coupe	Car	BMW	M4 (G82, G83)	2021	2025	1209	EUR
WM-BM/CA/5/CF	Chopped Carbon Fibre Mirror Cap Set - Matte	OP - Optional part	WO Approval									
				A ground-breaking octagonal shape has been fashioned from lightweight titanium with a chopped carbon-fibre outer sleeve, totally in keeping with lines of the car. For more traditional buyers, there is the classic cylindrical design, also constructed from same materials, but featuring an update to the current range of tailpipes for BMW cars available from Akrapovič. The product also fits on M3 and M4 LCI versions.								
TP-CT/73/CF	Tail Pipe Set (Chopped Carbon)	SO - Slip-On	ECE Type Approval									
				To further personalise the BMW M2 Coupé, M3 or M4. These stunning mirror caps have been designed especially for the car, and they match the lines beautifully. Constructed from high-grade, lightweight carbon fibre, they are hand-crafted by highly skilled specialists and make a unique addition to the car, while also complementing the tailpipes of the Slip-On Line (Titanium) exhaust, the rear wing, and the other Akrapovič products in the carbon-fibre accessory range. Sports Coupe	Car	BMW	M4 (G82, G83)	2021	2025	1190	EUR
WM-BM/CA/4/G	Carbon Fibre Mirror Cap Set - High Gloss	OP - Optional part	WO Approval									
				Evolution Link Pipe Set (SS) was tested and developed together with Slip-On Line (Titanium). Constructed from high-grade stainless steel, this noticeably lighter-than-stock link pipe features a resonator in the middle part and removes the secondary set of catalytic converters. Available for all countries (United States excluded), the link pipe delivers a power gain of 13.4 kW (18.2 hp) at 5.850 rpm and torque increases of 21.9 Nm at 5.850 rpm when tested on the Akrapovič dyno against a BMW M2 (OPF/GPF) with a standard stock exhaust. Combined with a Slip-On Line (Titanium) delivering a deep, rich, and sporty sound without drone, it totally embraces the pure turbocharged nine six-cylinder sound. Remapping is mandatory as the stock secondary catalytic converters are removed. This product is meant for racetrack use and closed courses only. This product fits on OPF and non-OPF vehicles. The product also fits on M3 and M4 LCI versions. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.								
E-BM/SS/9	Evolution Link Pipe set (SS) – Long	OP - Optional part										
				Fitment notice: Mandatory fitting kit, used for mounting the Rear Wing (Carbon) to BMW M4 (G82) and M440i (G22). The product also fits on M4 LCI versions.	Sports Coupe	Car	BMW	M4 (G82, G83)	2021	2025	385	EUR

WM-BM/CA/4/M	Carbon Fibre Mirror Cap Set - Matte	OP - Optional part										

			This high-grade lightweight titanium system, treated with hand-crafted carbon-fibre talpipes, weighs in at 35% lighter than stock and features a pair of collectors cast in the in-house foundry. The Slip-On Line (Titanium) comes with a specially developed Akrapović control kit for a complete sound experience. The sound character offers a rich tone at normal cruising, rising to a deep sporty sound when the M3/M4 is driven more dynamically. It serves up a perfect sound at all rpm, delivering comfort and sportiness in one exhaust. A ground-breaking octagonal shape has been fashioned from lightweight titanium with a carbon-fibre outer sleeve for the talpipes, and for more traditional buyers there is the classic cylindrical design. The system delivers power increases of 8.0 kW (10.9 hp) at 6,000 rpm and a torque gain of 13.9 Nm at 5,000 rpm when tested on the Akrapovič-dyno against a BMW M4 Competition with a standard stock exhaust. Remapping is not needed for this configuration, and it fits all vehicles (OPF and non-OPF), but the ECE certificate is valid only for cars equipped with an OPF filter.Optional link pipes and downpipes are available for customers looking to change the exhaust for closed circuit usage. An optional Akrapović Sound Kit is also available. With the installation of the optional link pipes, downpipes, and Akrapović Sound Kits, ECE type approval of the Slip-On Line (Titanium) is no longer valid. An optional hand-crafted carbon-fibre rear diffuser is also available to add an extra visual impact to the Akrapović talpipes.The exhaust system also fits on xDrive, CSL, M3 Touring (#281), M4 (#383) Competition and Convertible. Manufactured from lightweight hand-crafted carbon fibre, this product is lacquered to create a high-gloss finish. It is mounted on two brackets with a swan neck design, fabricated from lightweight CNC-machined aluminium to provide the best ratio between weight and performance. The brackets have been optimized to provide the optimum ratio between load-bearing capacity and weight. The bolts used to connect the wing and the brackets are high-grade titanium. High-grade titanium reinforcements have been incorporated for better structural stability at pivot points. Designed with echoes from the motorsport world, the derived aerofol of the wing was developed to achieve an extremely competitive ratio between downforce and drag. A small lip is placed at the trailing edge of a wing to achieve maximum performance of the wing by creating even more downforce.Optimized for the aerodynamics of the BMW M3 and M4, computational fluid dynamics (CFD) has been used to ensure the best functionality, and great attention has been paid to guaranteeing that the overall geometry does not cause additional air turbulence around the rear or generate additional noise on the side of the car.Fully adjustable to three levels, the wing needs to be manually set to the preferred angle before driving. It is ABE approved with AKR-W KBA 31682 type approval and finished with an undated Akrapović monochrome logo on each side.The product also fits on M4 LCI version.This product does not fit on the BMW M440i Cabrio (G23) model. S-BM/TI/33H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	Evolution Link Pipe Set (Titanium) was tested and developed together with Slip-On Line (Titanium).Constructed from high-grade titanium, this noticeably lighter-than-stock link pipe features a resonator in the middle part. Available for all countries (United States excluded), the link pipe delivers a power gain of 17.7 kW (24.1 hp) at 6,650 rpm and torque increases of 25.4 Nm at 6,650 rpm when tested on the Akrapović dyno against a BMW M4 Competition (OPPF/GPF) with a standard stock exhaust. Combined with a Slip-On Line (Titanium) delivering a deep, rich, and sporty sound without drone, it totally embraces the pure turbocharged nine six-cylinder sound. Remapping is mandatory. This product is meant for racetrack use and closed courses only.This product fits on OPF and non-OPF vehicles. The Evolution Link Pipe set (Titanium) – Long also fits on xDrive, CSL, LCI, M3 Touring (G81), M4 (G83) Competition and Convertible models.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	BMW	M4 (G82, G83)	2021	2025	1956.15	EUR
Wl-BMCA/I/G	Rear Wing (Carbon)	OP - Optional part	ABE Type Approval	A ground-breaking octagonal shape has been fashioned from lightweight titanium with a carbon-fibre outer sleeve, totally keeping with lines of the car. For more traditional buyers, there is the classic cylindrical design, also constructed from same materials, but featuring an update to the current range of talpipes for BMW cars available from Akrapović.This product fits on xDrive, CSL, LCI, M3 Touring (G81), M4 (G83) Competition and Convertible models. WI-BM/CA/1/CF	Rear Wing (Chopped Carbon)	OP - Optional part	ABE Type Approval	<p>For extra visual impact, there is the option to add a hand-crafted chopped carbon fibre diffuser. Produced in-house, this lightweight accessory – with ABE type approval – is designed to show off the tailpipes of the Akrapovič exhaust at their absolute best.This product fits on xDrive, CSL, LCI and M4 (G83) Competition models. This is a high-grade lightweight titanium system, finished with hand-crafted carbon-fibre tailpipes and a high-grade austenitic stainless-steel link pipe set. The valves in each side are calculated to tailor the sound, and two acoustic reflectors are fitted on the tailpipes to guide the sound into the car's cabin. Because the Akrapovič Evolution Line (Titanium) exhaust system has two valves, one more than the stock configuration, a TNG controller is included in the product to activate the additional exhaust valve. To make the sound experience even more unique, there are two tuned resonators – developed especially for this new engine – producing a deep, rich, and sporty sound with no unwanted drone or streaming, perfectly aligned with the straight six-cylinder engine. It weighs 21.7 kg, which is 23% lighter than stock. Power gains of 8.7 kW (11.8 hp) at 5,600 rpm and torque increases of 17.1 Nm at 4,100 rpm were recorded when tested on the Akrapovič dyno against a BMW M440i with a standard stock exhaust. Special parts are cast in the Akrapovič in-house foundry to create the intricate and complex items needed for this system. Meant for track use only and for non-OPF vehicles, remapping is recommended with this product.Please note that both product codes, S-BMT/18H and E-BM/SS/8, have been split due to packaging reasons. Both codes must be ordered.Fitment notice: The Evolution Line (Titanium) only fits on non-OPF vehicles. For non-OPF vehicles, the ECE type approval certificate is not valid. This product also fits on the BMW M440i xDrive Cabriolet (G23) model.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>	Sports Coupe	Car	BMW	M4 (G82, G83) - OPF/GPF	2021	2025	3743	EUR
DI-BM/CA/9/CF	Rear Chopped Carbon Fibre Diffuser - Matte	OP - Optional part	ABE Type Approval	<p>For extra visual impact, there is the option to add a hand-crafted chopped carbon fibre diffuser. Produced in-house, this lightweight accessory – with ABE type approval – is designed to show off the tailpipes of the Akrapovič exhaust at their absolute best.This product fits on xDrive, CSL, LCI and M4 (G83) Competition models. This is a high-grade lightweight titanium system, finished with hand-crafted carbon-fibre tailpipes and a high-grade austenitic stainless-steel link pipe set. The valves in each side are calculated to tailor the sound, and two acoustic reflectors are fitted on the tailpipes to guide the sound into the car's cabin. Because the Akrapovič Evolution Line (Titanium) exhaust system has two valves, one more than the stock configuration, a TNG controller is included in the product to activate the additional exhaust valve. To make the sound experience even more unique, there are two tuned resonators – developed especially for this new engine – producing a deep, rich, and sporty sound with no unwanted drone or streaming, perfectly aligned with the straight six-cylinder engine. It weighs 21.7 kg, which is 23% lighter than stock. Power gains of 8.7 kW (11.8 hp) at 5,600 rpm and torque increases of 17.1 Nm at 4,100 rpm were recorded when tested on the Akrapovič dyno against a BMW M440i with a standard stock exhaust. Special parts are cast in the Akrapovič in-house foundry to create the intricate and complex items needed for this system. Meant for track use only and for non-OPF vehicles, remapping is recommended with this product.Please note that both product codes, S-BMT/18H and E-BM/SS/8, have been split due to packaging reasons. E-BM/SS/8	Link Pipe Set (SS)	OP - Optional part		<p>This product is crafted from high-quality stainless steel, with the front part of the downpipe cast in Akrapovič's in-house foundry. A sporty 300 cpsi catalytic converter is integrated into the downpipe, with the heat insulation made of stainless steel and a flexible tube incorporated into the middle section. Power gains with an Evolution Line (Titanium) fitted with the Akrapovič downpipe of 18.7 kW (25.4 hp) at 5,600 rpm and torque increases of 34.7 Nm at 2,400 rpm have been recorded when tested on the Akrapovič dyno against a BMW M440i with the standard stock exhaust. It delivers a pure racing sound, full of emotion and adrenalin-inducing enjoyment, and great feedback at high revs, all without unwanted drone. This product is meant for racetrack use only, and remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals. The downpipe is an optional product for the following Evolution Line (Titanium) exhaust systems:BMW M340i (G20) without OPF/GPF; Slip-On Line (Titanium) + Evolution Link pipe (SS) - S-BMT/17H + E-BM/SS/8;BMW M440i (G22) without OPF/GPF; Slip-On Line (Titanium) + Evolution Link pipe (SS) - S-BMT/18H + E-BM/SS/8. Both codes must be ordered. Fitment notice: The Evolution Line (Titanium) only fits on non-OPF vehicles. For non-OPF vehicles, the ECE type approval certificate is not valid. An extra stock valve actuator (part nr. 18 30 8 686 640) is needed when installing the Slip-On exhaust system on BMW M440i. Manufactured from lightweight hand-crafted chopped carbon fibre, this product is lacquered to create a high-gloss finish. It is mounted on two brackets with a swan neck design, fabricated from lightweight CNC-machined aluminium to provide the best ratio between weight and performance. The brackets have been optimized to provide the optimum ratio between load-bearing capacity and weight. The bolts used to connect the wing and the brackets are high-grade titanium. High-grade titanium reinforcements have been incorporated for better structural stability at pivot points. Designed with echoes from the motorsport world, the derived aerofol of the wing was developed to achieve an extremely competitive ratio between downforce and drag. A small lip is placed at the trailing edge of a wing to achieve maximum performance of the wing by creating even more downforce. Optimized for the aerodynamics of the BMW M2 and M240i, computational fluid dynamics (CFD) has been used to ensure the best functionality, and great attention has been paid to guaranteeing that the overall geometry does not cause additional air turbulence around the rear or generate additional noise on the side of the car. Fully adjustable to three levels, the wing needs to be manually set to the preferred angle before driving. It is ABE approved with AKR-WI KBA 31882 type approval and finished with an understated Akrapović monochrome logo on each side. The product also fits on M3 and M4 LCI versions. Special parts are cast in the Akrapović in-house foundry to create the intricate and complex items needed for this system. It meets ECE tune approval and no remapping is needed for this.</p> <p>After adding a full titanium Evolution system, you'll never want to stop driving. The exhaust system is made of our proprietary titanium and consists of dual-outlet mufflers with exhaust valves, flow-optimized pipes, and a unique cast X-shaped part with resonators. The Evolution lowers the back pressure and gives the M5 more power without removing the catalytic converters. It increases responsiveness and offers a big difference in weight. Sound is improved too, with a deep sporty sound that grows to an aggressive roar when driven hard but still has no droning. It works well with the M5's ANC system - just like the valve system, which is regulated through the M5's settings. Complete the look with a set of four exquisite tailpipes in titanium or carbon fibre.</p> <p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapović. In order to satisfy the most discriminating tastes, we've created special titanium-alloy tailpipes. To make our tailpipes stand out from the rest even more, in addition to selecting the finest materials, we also made them larger.</p> <p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapović. In order to satisfy the most discriminating tastes, we've created handcrafted carbon fibre tailpipes. To make our tailpipes stand out from the rest even more, in addition to selecting the finest materials, we also made them larger.</p> <p>Built from high-grade lightweight titanium to reduce weight, with valve housings cast in the in-house foundry, the Evolution Line (Titanium) exhaust system fits directly onto the BMW M5's stock downpipes. Developed to deliver both power and torque gains throughout the range and significantly reduce the back pressure, it is finished with hand-crafted carbon-fibre tailpipes to enrich the visual enjoyment of the exhaust. The tailpipes have been perfectly crafted and designed to fit beautifully within the optional carbon-fibre diffuser. Optional carbon-fibre mirror caps are also available to further enhance the car's appearance. The system is a simple plug-and-play operation to fit, and has been designed to meet ECE type approval. The optional Akrapović Sound Kit is also available. Fitment notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF). This product fits also on BMW M5 CS NON-OPF vehicles.</p> <p>The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M5 a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps. This Rear Carbon Fibre Diffuser - Matt, comes with red/white Akrapović logo. Fitment notice: The diffuser cannot fit with genuine trailer tow hitch. With Akrapović diffuser, hands-free trunk-lid opening/closing sensor is not working.</p> <p>The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M5 a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps. This Rear Carbon Fibre Diffuser - High Glossy, comes with red/white Akrapović logo. Fitment notice: The diffuser cannot fit with genuine trailer tow hitch. With Akrapović diffuser, hands-free trunk-lid opening/closing sensor is not working.</p> <p>As the most visible part of an exhaust system, we pay the utmost attention to the tailpipes. Akrapović has created hand-crafted carbon-fibre tailpipes to enrich the visual enjoyment of the Slip-On or Evolution exhaust systems. Sporting the unique Akrapović round design, the carbon- version has sandblasted titanium inner parts with a bigger diameter than stock tailpipes to make them stand out from the crowd even more. The new model was unveiled with distinctive Akrapović design elements, and these beautifully crafted additions are designed to fit perfectly with the carbon-diffuser. This Carbon Tail pipe set, comes with red/white Akrapović logo.</p> <p>The eye-catching hand-made carbon fibre mirror caps add a visual improvement to the stylish lines of the car. Beautifully designed and finished in either a high-gloss or matte finish, these mirror caps will enhance the car's appearance and add a perfect match for the Akrapović carbon fibre diffuser. Mirror cap set does not fit on right-hand drive vehicles.</p> <p>The eye-catching hand-made carbon fibre mirror caps add a visual improvement to the stylish lines of the car. P-HF1132	Akrapović Sound Kit	OP - Optional part	<p>The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapović technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapović Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.</p> <p>Built from high-grade lightweight titanium – with some parts cast in Akrapović's own foundry – this system will reduce exhaust system's weight. Developed to deliver both power and torque gains throughout the range with most gain in lower rpm will improve responsiveness and drivability. The system delivers distinctly different sound from the stock system, most noticeable at shifting, backfiring and accelerating. The carbon-fibre tailpipes have been perfectly crafted and designed to fit beautifully within the optional carbon-fibre diffuser. Optional carbon-fibre mirror caps are also available to further enhance the car's appearance. The system is a simple plug-and-play operation to fit, and has been designed to meet ECE type approval. The optional Akrapović Sound Kit is also available. For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation.</p>	Sports Coupe	Car	BMW	M5 / M5 Competition (F90)	2018	2023	537.94	EUR

S-BM/T/23	Evolution Line (Titanium)	EV - Evolution		Constructed from high-grade lightweight titanium alloys, the Evolution Line (Titanium) exhaust system has been perfectly tuned to deliver the very best aural experience in all driving modes. Through extensive testing and development, the Akrapovič sound engineers have coaxed a deep, sporty, higher-frequency V8 sound from the car's turbo engine, more akin to that of a muscle car, while keeping it smooth and eliminating any drone that might hamper the enjoyment. The full titanium exhaust system is finished with two sets of carbon-fibre / titanium tailpipes coming from a central muffler layout featuring two valves, one located on either side of the muffler. The housings are cast in-house in the Akrapovič foundry, and there is a cast collector on the link pipe, where gases from both sides of the engine mix, all designed to create a perfect sound. This plug-and-play exhaust system can be further regulated with the addition of the Akrapovič Sound Kit to control the valves in the exhaust and switch between the sound modes. Further visual enhancements can be achieved with the addition of the optional hand-made carbon-fibre diffuser and mirror caps, available in matte and glossy finishes to provide an eye-catching accompaniment to match the Evolution Line (Titanium). Fitment notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF). THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	BMW	M6 / M8 Competition (F91, F92)	2020	2025	8311,66	EUR
				The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M8 a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps. Fitment notice: With Akrapovič diffuser, hands-free trunk-ld opening/closing sensor is not working.								
				The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. DI-BM/CA/7/G	Rear Carbon Fibre Diffuser - High Gloss	OP - Optional part	ABE Type Approval	The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M8 a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps. Fitment notice: With Akrapovič diffuser, hands-free trunk-ld opening/closing sensor is not working.	Sports Coupe	Car	BMW	M6 / M8 Competition (F91, F92)	2020	2025	1655,08	EUR
P-HF1263	Akrapovič Sound Kit	OP - Optional part		Evolution Link Pipe Set (Titanium) was tested and developed together with Slip-On Line (Titanium). This full titanium accessory features complex parts cast in Akrapovič's in-house foundry and is constructed from lightweight high-grade alloys to reduce weight. Combining the Evolution Link pipe set (Titanium) with the Slip-On Line (Titanium) exhaust creates a system that is perfectly in tune to deliver the very best aural experience in all driving modes. Akrapovič's sound engineers have worked hard to produce a sporty V8 sound with an unmistakable Akrapovič character, while keeping it smooth and eliminating any drone, all designed for maximum everyday comfort. The sound is closer to that of a muscle car and delivers an exhilarating soundtrack. With a cast collector on the link pipe, where the gases from both sides of the engine mix, the link pipe provides a smooth flow for the gas and aids in providing the perfect sound as an ideal upgrade for the Slip-On Line (Titanium). With the installation of this optional accessory, ECE type approval for the Slip-On Line (Titanium) exhaust system is not valid, and remapping the ECU is mandatory when it is fitted. When installing the Akrapovič Evolution link pipe set, remapping the ECU is mandatory in order to prevent potential 'check engine light' warning signals. Fitment notice: This optional link pipe does not fit on OPF equipped vehicles with emission product code S1DFA. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	BMW	M6 / M8 Competition (F91, F92)	2020	2025	853,5	EUR
DI-BM/CA/7/M	Rear Carbon Fibre Diffuser - Matte	OP - Optional part	ABE Type Approval	With a distinctive sound as you shift through the gears, coupled with enhanced power and torque, all encapsulated in a full titanium system, the Slip-On Line (Titanium) offers the Akrapovič experience while meeting ECE type approval. Constructed from lightweight high-grade titanium alloys and finished with two sets of carbon-fibre / titanium tailpipes, the system features complex parts crafted at the in-house titanium foundry, including the housing of the valves and collectors from the central muffler to the tailpipes. Two valves – one on each side of the muffler – tailor the gas flow to help produce that unmistakable Akrapovič sound, which is distinctly different from the M8 with a stock system. The exhaust tone is most noticeable as you move through the gears and accelerate, and this can be further controlled through the addition of the optional Akrapovič Sound Kit to provide increased aural pleasure. Akrapovič has achieved power gains of 14.3 hp at 5,200 rpm and torque increases of 19.4 Nm at 5,200 rpm when tested on the Akrapovič dyno against a BMW M8 Competition with a stock M Sport exhaust system for comparison. There is also the opportunity for further exhaust tuning through the addition of the optional Evolution Link pipe set (Titanium); using the link pipe set will change the gas flow and deliver the best sound possible from the Slip-On Line (Titanium). As a further enhancement, Akrapovič has created optional parts to change the visual appeal of the car and accompany the beautiful finish of the system's tailpipes. With a handmade carbon-fibre diffuser and mirror caps in matt and gloss finishes, an added The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M8 a more aggressive and sporty feel. S-BM/722H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	<p>With a distinctive sound as you shift through the gears, coupled with enhanced power and torque, all encapsulated in a full titanium system, the Slip-On Line (Titanium) offers the Akrapović experience while meeting ECE type approval. Constructed from lightweight high-grade titanium alloys and finished with two sets of carbon-fibre / titanium tailpipes, the system features complex parts crafted at the in-house titanium foundry, including the housing of the valves and collectors from the central muffler to the tailpipes. Two valves – one on each side of the muffler – tailor the gas flow to help produce that unmistakable Akrapović sound, which is distinctly different from the M8 with a stock system. The exhaust tone is most noticeable as you move through the gears and accelerate, and this can be further controlled through the addition of the optional Akrapović Sound Kit to provide increased aural pleasure. Akrapović has achieved power gains of 14.3 hp at 5,200 rpm and torque increases of 19.4 Nm at 5,200 rpm when tested on the Akrapović dyno against a BMW M8 Competition with a stock M Sport exhaust system for comparison.</p> <p>There is also the opportunity for further exhaust tuning through the addition of the optional Evolution Link pipe set (Titanium); using the link pipe set will change the gas flow and deliver the best sound possible from the Slip-On Line (Titanium). As a further enhancement, Akrapović has created optional parts to change the visual appeal of the car and accompany the beautiful finish of the system's tailpipes. With a handmade carbon-fibre diffuser and mirror caps in matt and gloss finishes, an added</p> <p>Constructed from high-grade lightweight titanium alloys, the Evolution Line (Titanium) exhaust system has been perfectly tuned to deliver the very best aural experience in all driving modes. Through extensive testing and development, the Akrapović sound engineers have coated a deep, sporty, higher-frequency V8 sound from the car's turbo engine, more akin to that of a muscle car, while keeping it smooth and eliminating any drone that might hamper the enjoyment. The full titanium exhaust system is finished with two sets of carbon-fibre / titanium tailpipes coming from a central muffler layout featuring two valves, one located on either side of the muffler. The housings are cast in-house in the Akrapović foundry, and there is a cast collector on the link pipe, where gases from both sides of the engine mix, all designed to create a perfect sound. The plug-and-play exhaust system can be further regulated with the addition of the Akrapović Sound Kit to control the valves in the exhaust and switch between the sound modes. Further visual enhancements can be achieved with the addition of the optional hand-made carbon-fibre diffuser and mirror caps, available in matt and glossy finishes to provide an eye-catching accompaniment to match the Evolution Line (Titanium). Fitment notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF). THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>	Sports Coupe	Car	BMW	M8 / M8 Competition (F91, F92) - OPF/GPF	2021	2025	5848,49	EUR
S-BM/72S	Evolution Line (Titanium)	EV - Evolution		<p>The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M8 a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps. Fitment notice: With Akrapović diffuser, hands-free trunk-ld opening/closing sensor is not working.</p> <p>The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapović technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapović Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.</p> <p>The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. E-8M/7/10	Evolution Link pipe set (Titanium)	OP - Optional part	Evolution Link Pipe Set (Titanium) was tested and developed together with Slip-On Line (Titanium). This full titanium accessory features complex parts cast in Akrapovič's in-house foundry and is constructed from lightweight high-grade alloys to reduce weight. Combining the Evolution Link pipe set (Titanium) with the Slip-On Line (Titanium) exhaust creates a system that is perfectly in tune to deliver the very best aural experience in all driving modes. Akrapovič's sound engineers have worked hard to produce a sporty V8 sound with an unmistakable Akrapovič character, while keeping it smooth and eliminating any drone, all designed for maximum everyday comfort. The sound is closer to that of a muscle car and delivers an exhilarating soundtrack. With a cast collector on the link pipe, where the gases from both sides of the engine mix, the link pipe provides a smooth flow for the gas and aids in providing the perfect sound as an ideal upgrade for the Slip-On Line (Titanium). With the installation of this optional accessory, ECE type approval for the Slip-On Line (Titanium) exhaust system is not valid, and remapping the ECU is mandatory when it is fitted. When installing the Akrapovič Evolution link pipe set, remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals. Ftment notice: This optional link pipe does not fit on OFF equipped vehicles with emission product code S1DFA. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. With a distinctive sound as you shift through the gears, coupled with enhanced power and torque, all encapsulated in a full titanium system, the Slip-On Line (Titanium) offers the Akrapovič experience while meeting ECE type approval. Constructed from lightweight high-grade titanium alloys and finished with two sets of carbon-fibre / titanium tailpipes, the system features complex parts crafted at the in-house titanium foundry, including the housing of the valves and collectors from the central muffler to the tailpipes. Two valves – one on each side of the muffler – tailor the gas flow to help produce that unmistakable Akrapovič sound, which is distinctly different from the M8 with a stock system. The exhaust tone is most noticeable as you move through the gears and accelerate, and this can be further controlled through the addition of the optional Akrapovič Sound Kit to provide increased aural pleasure. Akrapovič has achieved power gains of 14.3 hp at 5,200 rpm and torque increases of 19.4 Nm at 5,200 rpm when tested on the Akrapovič dyno against a BMW M8 Competition with a stock M Sport exhaust system for comparison. There is also the opportunity for further exhaust tuning through the addition of the optional Evolution Link pipe set (Titanium); using the link pipe set will change the gas flow and deliver the best sound possible from the Slip-On Line (Titanium). As a further enhancement, Akrapovič has created optional parts to change the visual appeal of the car and accompany the beautiful finish of the system's tailpipes. With a handmade carbon-fibre diffuser and mirror caps in matte and gloss finishes, an added The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the M8 a more aggressive and sporty feel. It shows off the tailpipes to their full extent and is a perfect accompaniment to the side mirror caps. Ftment notice: With Akrapovič diffuser, hands-free trunk-lid opening/closing sensor is not working. The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic. S-BM/T15H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	Beautifully crafted from high-grade titanium, this lightweight exhaust system is finished with eye-catching carbon-fibre tailpipes and is a full-on sensory delight. The exhaust valve – with its housing cast in the in-house foundry – gives the exhaust a rich sound with an emphasis on high frequencies, especially when shifting through the gears, all allied to a deep tone that enhances the car's engine without any discomfort or drone for the occupants. A specially engineered Y-split reduces the flow noise without any compromise to the pressure pulse distribution, thus offering a strong sound and optimal flow path. The use of lightweight materials and a different configuration reduces the overall weight of the exhaust by 9.4 kg, a saving of 55.6% on the stock version. The design and construction of the exhaust optimize the power and torque levels throughout the rev range, with performance increased by 3.3 kW (4.5 hp) at 5,350 rpm and torque up by 5.9 Nm at 5,300 rpm. This was achieved during in-house tests with back-to-back runs on the Akrapovič dyno against a BMW M135i using a standard stock exhaust. For a further upgrade of the Slip-On Line (Titanium) exhaust system, an optional Evolution Link pipe set (SS) is available. The exhaust system is ECE type approved for cars equipped with an Otto/gasoline particulate filter. To install the Slip-On Line (Titanium) exhaust system, the stock exhaust system must be cut; please read the instructions carefully before the start of the installation. The sound has been tuned to ideally suit the in-line six-cylinder turbo engine, delivering an increase in the volume sensation, which provides exciting acoustic feedback when shifting through the gears. Any unwanted drone is eliminated. Fully ECE-compliant, the Slip-On Line (Titanium) provides power and torque increases over the BMW SUV with the stock M Sport exhaust system throughout the entire rev range, as measured by Akrapovič's skilled engineers. The use of state-of-the-art materials reduces the weight by 10.7 kg compared to the M Sport exhaust. The optional Evolution Link pipe set (Titanium) and an Akrapovič Sound Kit can be added to upgrade the package. When fitted with the optional Evolution Link pipe set (Titanium) and Akrapovič Sound Kit, ECE type approval is no longer valid. Tail pipe set (Carbon) has to be ordered separately as a mandatory part. Please choose TP-CT/59 for X3 M / Competition model. For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation. P-H/F1310	Akrapovič Sound Kit	OP - Optional part		With a distinctive sound as you shift through the gears, coupled with enhanced power and torque, all encapsulated in a full titanium system, the Slip-On Line (Titanium) offers the Akrapovič experience while meeting ECE type approval. Constructed from lightweight high-grade titanium alloys and finished with two sets of carbon-fibre / titanium tailpipes, the system features complex parts crafted at the in-house titanium foundry, including the housing of the valves and collectors from the central muffler to the tailpipes. Two valves – one on each side of the muffler – tailor the gas flow to help produce that unmistakable Akrapovič sound, which is distinctly different from the XSM with a stock system. The exhaust tone is most noticeable as you move through the gears and accelerate, and this can be further controlled through the addition of the optional Akrapovič Sound Kit to provide increased aural pleasure. Akrapovič has achieved power gains of 12.1 hp at 2,400 rpm and torque increases of 35.4 Nm at 2,400 rpm when tested on the Akrapovič dyno against a BMW XSM ith a stock M Sport exhaust system for comparison. There is also the opportunity for further exhaust tuning through the addition of the optional Evolution Link pipe set (Titanium), using the link pipe set will change the gas flow and deliver the best sound possible from the Slip-On Line (Titanium). As a further enhancement, Akrapovič has created optional parts to change the visual appeal of the car and accompany the beautiful finish of the system's tailpipes. With a handmade carbon-fibre diffuser, an ardent sensual touch can be made to the car. The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the car a more aggressive and sporty feel. It shows off the tailpipes to their full extent and integrates the parking sensor mounts. The diffuser allows the use of BMW's tow hook. With Akrapovič diffuser, hands-free trunk-id opening/closing sensor is not working.	Suv	Car	BMW	X5 M / X5 M Competition (F95)	2020	2023	420.55	EUR

Developed to deliver both power and torque gains throughout the range, it is finished with integrated hand-crafted carbon-fibre tailpipes to enrich the visual enjoyment of the exhaust, styled with a distinctive round design with titanium inner parts to enhance the rear of the BMW X6 M. The tailpipes have been perfectly crafted and designed to fit beautifully within the optional carbon-fibre diffuser. The system is a simple plug-and-play operation to fit, and has been designed to meet ECE type approval. The optional Akrapovič Sound Kit is also available.	Suv	Car	BMW	X6 M (F86)	2015	2018	690.9	EUR
DI-BM/CA/2	Rear Carbon Fibre Diffuser	OP - Optional part	ABE Type Approval		Suv	Car	BMW	X6 M (F86)	2015	2018	6798.33	EUR
P-HF947	Akrapovič Sound Kit	OP - Optional part	W/O Approval		Suv	Car	BMW	X6 M (F86)	2015	2018	690.9	EUR

			The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapović technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapović Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic. With a distinctive sound as you shift through the gears, coupled with enhanced power and torque, all encapsulated in a full titanium system, the Slip-On Line (Titanium) offers the Akrapović experience while meeting ECE type approval. Constructed from lightweight high-grade titanium alloys and finished with two sets of carbon-fibre / titanium tailpipes, the system features complex parts crafted at the in-house titanium foundry, including the housing of the valves and collectors from the central muffler to the tailpipes. Two valves – one on each side of the muffler – tailor the gas flow to help produce that unmistakable Akrapović sound, which is distinctly different from the X5M with a stock system. The exhaust tone is most noticeable as you move through the gears and accelerate, and this can be further controlled through the addition of the optional Akrapović Sound Kit to provide increased aural pleasure. Akrapović has achieved power gains of 12.1 hp at 2,400 rpm and torque increases of 35.4 Nm at 2,400 rpm when tested on the Akrapović dyno against a BMW X5M ith a stock M Sport exhaust system for comparison. There is also the opportunity for further exhaust tuning through the addition of the optional Evolution Link pipe set (Titanium); using the link pipe set will change the gas flow and deliver the best sound possible from the Slip-On Line (Titanium). As a further enhancement, Akrapović has created optional parts to change the visual appeal of the car and accompany the beautiful finish of the system's tailpipes. With a handmade carbon-fibre diffuser, an add-on aural touch can be made in this. The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the car a more aggressive and sporty feel. It shows off the tailpipes to their full extent and integrates the parking sensor mounts. The diffuser allows the use of BMW's tow hook. With Akrapović diffuser, hands-free trunk-id opening/closing sensor is not working. The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. 				Downpipe w Cat (SS) was tested and developed together with Evolution Line (Titanium) system.The high-flow downpipe is constructed using high-quality stainless steel and, once fitted to the Evolution Line exhaust, it creates a complete system from the manifold to the tailpipes that will further enhance the performance figures: both the torque and power outputs. It incorporates a sporty catalytic converter. This optional downpipe produces an enhanced sound that delivers a pure racing emotion and fantastic feedback at high revs, without unwanted drone, making it suitable for everyday use.When installing the Akrapovič downpipe, remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals.Downpipe is optional product to the following evolution systems:Toyota Supra (A90) without OPF: Slip-On Line (Titanium) + Evolution Link pipe (SS) - S-TY/T/H + E-TY/SS/1BMW Z4 M40i (G29) without OPF: Slip-On Line (Titanium) + Evolution Link pipe (SS) - S-BM/T/9H + E-TY/SS/1THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.																
DP-TY/SS/1	Downpipe w Cat (SS)	OP - Optional part		Super Sport	Car	BMW	Z4 M40i (G29)	2019	2025	2162.8	EUR									
				Manufactured to exacting specifications from high-grade titanium – with parts cast in Akrapovič's in-house foundry – this system utilises lightweight materials to reduce overall vehicle weight and optimize power and torque through the entire rev range. Meeting ECE type approval, the design of the system fully adapts to the lines of the car, and the single-muffler layout with four superb hand-crafted carbon-fibre round tailpipes give a distinctive look to the rear of the car. Various sound modes add to the experience, with a sporty and animated roar from the six-cylinder engine when the revs rise, and a more pleasing experience in comfort mode, ideal for cruising with the roof down.An optional Akrapovič Sound Kit is available to control the various sound settings, and optional tuning opportunities exist through the addition of the stainless-steel Evolution Link Pipe set. As with the Sound Kit, fitting the Link Pipe will negate the ECE type approval.Fitment and EC type-approval are valid for engine type B58B30C. ECE type approval is only valid for cars equipped with otto/gasoline particulate filter.For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation.

				Constructed from high-grade austenitic stainless steel, each link pipe contains a 200 cpsi catalytic converter and the set weighs over 43% less than the stock equivalent. A tuned resonator – specially developed for the engine – provides a unique deep, rich, and sporty sound with no drone. Designed for use with the Akrapovič Slip-On Line (Titanium) exhaust system and for use on racetrack and closed courses only, remapping is mandatory when installing this product.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.																
L-CO/SS/1	Link Pipe Set w Cat (SS)	OP - Optional part		Super Sport	Car	Chevrolet	Corvette Stingray (C8)	2020	2025	3164.99	EUR									
				Taking Akrapovič Slip-On Line (Titanium) exhaust tuning to the next stage, this link pipe set has no catalytic converters and delivers an impressive increase in performance. Power is raised by 8.0 kW (10.9 hp), with a torque increase of 15.6 Nm, both at 4,900 rpm, when installed with an Akrapovič Slip-On Line (Titanium) and tested on the Akrapovič dyno against a Corvette Stingray with a stock sport exhaust system. Built using high-quality austenitic stainless steel and featuring a tuned resonator, this link pipe set conveys pure racing emotion and great feedback at high revs, without any drone from the engine, and it weighs in over 43% lighter than the standard stock version. Intended for racetrack and closed course use only, this product requires mandatory remapping to prevent potential engine check light warning signals.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.																
L-CO/SS/2	Link Pipe Set w/o Cat (SS)	OP - Optional part		Super Sport	Car	Chevrolet	Corvette Stingray (C8)	2020	2025	1860.89	EUR									

<p>This exhaust has been designed to deliver performance, exhilarating sound, and driving enjoyment, with no compromise on comfort. Constructed from high-grade, lightweight titanium, the Slip-On Line (Titanium) is more than 47% lighter than the stock sport exhaust. Two beautifully finished sets of square titanium tailpipes, with a black interior, are coated for better durability and scratch resistance and relay the sound from the lightweight system. The exhaust is tailored to control the gas flow from the engine and provide a perfect sound: a V8 throb at low revs, which gradually evolves into a rich roar as the revs rise, creating an aural delight. The two tubes that connect the left and right sides of the system have different diameters to provide increased stiffness to the system and enhance the overall sound experience. The tubes are fully insulated to prevent any excess heat from affecting other parts of the car. With a perfect throttle response and providing a power increase of 3.4 kW (4.6 hp) at 5,250 rpm and a torque gain of 8.2 Nm at 3,100 rpm – when tested on the Akrapovič dyno against a Corvette Stingray with a stock sport exhaust system. The ECU needs to be remapped and the system is intended for use on racetracks and closed courses only. Optional link pipe sets – with or without catalytic converters – are available to further upgrade the Slip-On Line (Titanium) system. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>

L-CO/SS/1	Link Pipe Set w Cat (SS)	OP - Optional part		Super Sport	Car	Chevrolet	Corvette Stingray (C8) - OPF/GPF	2020	2025	3164.99	EUR
<p>The Akrapovič Evolution Line system takes exhaust tuning to the next level. Featuring mufflers and link-pipes made from high-grade titanium to dramatically reduce the overall weight, the system provides more power, lowers back pressure, enhances throttle response, and increases torque. With four valves, the first pair operates in four-cylinder mode and the second set comes into action following the driver's specifications. With an electronic device developed by Akrapovič engineers for the five standard GM modes—Weather, Eco, Tour, Sport, and Track—the system is perfectly matched to operate with the car's drive mode selector. This produces an even greater range of options for the driver to fully experience the amazing sound of the car. The Evolution Line system, with a new X-pipe, provides even greater performance compared to the Slip-On Line system, and provides a pure race-note soundtrack for this stunning engine, with the enhanced sound characteristics of the V8 configuration and without any drone—just pure enjoyment. Four large-diameter carbon fibre tailpipes with titanium inners complete the appearance of the Evolution Line perfectly, making it stand out as something special. If the Akrapovič Evolution Line system replaces the GM NPP exhaust system, the Evolution Line maintains the valve regulation of the NPP system. If the Corvette C7 is not equipped with a GM Performance exhaust (NPP exhaust), then the Control Kit (P-HF886) and Valve Actuator Kit (P-HF886) are mandatory. For Corvette C7s with a Performance exhaust (NPP exhaust), neither the Control Kit (P-HF886) nor the Valve Actuator Kit (P-HF886) are mandatory. For Corvette C7s without a Performance exhaust (NPP exhaust), the Valve Actuator Kit is only mandatory for Corvette C7s equipped with a GM Performance exhaust (NPP exhaust). It consists of two genuine GM electrical actuators, which operate the NPP valves in the tailpipes.</p>											
S-CO/11/1	Evolution Line (Titanium)	EV - Evolution		Sports Coupe	Car	Chevrolet	Corvette Stingray/Grand Sport (C7)	2014	2019	6127.57	EUR
P-HF886	Valve Actuator Kit	OP - Optional part	W/O Approval	Sports Coupe	Car	Chevrolet	Corvette Stingray/Grand Sport (C7)	2014	2019	1038.29	EUR
<p>The Control Kit gives the driver the option to control the Akrapovič rear exhaust valves through the Corvette C7 drive mode selector. Once a simple installation process is completed, the electronic platform will automatically drive the exhaust's rear valves based on the engine speed, gear, and selected drive mode. The Control Kit is only mandatory for Corvette C7s without the Performance exhaust (NPP exhaust). Corvette C7s equipped with a GM Performance exhaust (NPP exhaust) do not need the Control Kit (P-HF886).</p>											
P-HF886	Control Kit	OP - Optional part	W/O Approval	Sports Coupe	Car	Chevrolet	Corvette Stingray/Grand Sport (C7)	2014	2019	567.36	EUR
<p>The Akrapovič Slip-On Line system is the first step in exhaust tuning. Crafted from high-grade titanium, which considerably reduces the weight in comparison to the stock system, it has been perfectly designed to fit directly onto the existing link pipes. The system increases power, provides better throttle response, and improves torque, and also conjures up an amazing sound from the naturally-aspirated V8 engine. The Slip-On Line system has two valves. The system maintains the valve regulation of the NPP (Performance exhaust) system and is developed to be compatible with the car's drive mode selector, and Akrapovič engineers have developed an electronic device to drive the exhaust valves for each mode—Weather, Eco, Tour, Sport, and Track—giving the driver an even greater opportunity to enjoy the sound of the Akrapovič Slip-On Line across the whole spectrum of the car's performance. It's topped off by four large-diameter carbon fibre tailpipes with titanium inners, to make the Slip-On clearly recognizable as an exhaust that means business. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>											
MTP-CO/11/2	Slip-On Line (Titanium)	SO - Slip-On		Super Sport	Car	Chevrolet	Corvette Z06 (C7)	2014	2019	4841.39	EUR

S-CO/TI/2	Evolution Line (Titanium)	EV - Evolution	<p>The Akrapović Evolution Line system takes exhaust tuning to the next level. TP-NIR35C	Tail pipe set (Carbon,dia 125 mm) Corvette	OP - Optional part	<p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapović. In order to satisfy the most discriminating tastes, we've created handcrafted carbon fibre tailpipes. To make our tailpipes stand out from the rest even more, in addition to selecting the finest materials, we also made them larger. The tailpipes can only be mounted together with Akrapović slip-on or evolution system.</p>							
			Super Sport	Car	Chevrolet	Corvette Z06/ZR1 (C6)	2006	2011	1476,11	EUR
TP-CT/1	Tail pipe set (Carbon,dia 115 mm)	OP - Optional part	<p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapović. In order to satisfy the most discriminating tastes, we've created handcrafted carbon fibre tailpipes. The tailpipes can only be mounted together with Akrapović slip-on or evolution system.</p>							
			Super Sport	Car	Chevrolet	Corvette Z06/ZR1 (C6)	2006	2011	1504,52	EUR
P-HF1479	Akrapović Sound Kit	OP - Optional part	<p>The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapović technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapović Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic. Constructed with race-proven materials, the nano-coated carbon-fibre tailpipes with titanium inner shells, sandblasted high-grade titanium muffler, and high-grade stainless-steel link pipe give the exhaust an incredible 49.6% weight saving compared to the standard stock system. Each side of the muffler contains an exhaust valve – with housings made in the Akrapović in-house foundry – designed to tailor the sound. These valves deliver a sharp, distinctive, and well-defined tone to the powerplant and provide a difference between the car's driving modes. When the Comfort is chosen, the exhaust serves up a relaxing note, ideal for long journeys. The tone changes in the Sport mode to offer a strong suggestion of the engine's potential, and in the Cupra mode it rises to a rewarding sporty roar when pushed to the limit. The system also comes with a specially developed control kit, offering the passengers the full sound experience of an Akrapović Evolution Line (Titanium) exhaust. A power gain of 7.8 kW (10.6 hp) at 2,800 rpm and a torque increase of 27.3 Nm at 2,750 rpm have been recorded when tested on the Akrapović dyno against a Cupra Formentor VZ5 with a standard stock exhaust. No remapping is needed for the configuration, and ECE type approval is valid for cars equipped with an OPF (Otto Particulate Filter). An optional Akrapović Sound Kit is also available. When this part is installed, the ECE type approval of the Evolution Line (Titanium) becomes invalid. ECE type approval is valid for cars equipped with an OPF (Otto Particulate Filter).</p>							
			Suv	Car	Cupra	Formentor VZ5	2022	2024	405	EUR
S-CU/TI/1H	Evolution Line (Titanium)	SO - Slip-On	<p>Race-proven materials are used to create this track-oriented full titanium exhaust system, providing a weight saving of 3.6% (-0.4 kg) over the standard stock version. Two 200 cpsi sport catalytic converters replace two petrol particulate filters for more direct gas flow and two valves – with housing cast in the in-house foundry – have been tailored to provide a deep, resonant rumble at start-up and a racing tone as the revs of the 120" V6 engine rise. The tailpipes are 3D printed for geometrical optimization for performance and visual effect, with the outer sleeve finished with hand-laid carbon fibre, designed to be bumper mounted, with a strikingly different appearance from the standard stock version. Tests conducted by Akrapović engineers in comparison with vehicles with a standard stock exhaust and an Akrapović Slip-On Race Line (Titanium) exhaust produced lower back pressure from the Akrapović Slip-On Race Line (Titanium), offering a performance upgrade potential with mandatory ECU remapping. This lightweight exhaust has been developed for use on closed-course competition circuits only, and it is insulated to prevent heat transfer to the engine compartment. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>							
			Suv	Car	Cupra	Formentor VZ5	2022	2024	5510	EUR
S-FE/TI/2	Slip-On Race Line (Titanium)	SO - Slip-On	<p>Link pipe set (SS) was tested and developed together with Slip-On Race Line (Titanium) system. Constructed from high-grade stainless steel, this is a performance upgrade for the Slip-On Race Line (Titanium) to a complete Akrapović exhaust system, developed for use on closed-course competition circuits only. Featuring flexible tubes in the front section, this Link Pipe Set (SS) eliminates the catalytic converters of the standard stock exhaust, allowing more direct gas flow compared to a Ferrari 296 GTB equipped with a standard stock system. Tests conducted by Akrapović engineers in comparison with vehicles with a standard stock exhaust and an Akrapović Slip-On Race Line (Titanium) exhaust with the Link Pipe Set (SS) produced lower back pressure from the Akrapović setup, offering a performance upgrade potential with mandatory ECU remapping. Weighing 38.4% (-3.6 kg) less than the standard stock part, this Link Pipe Set (SS) combined with the Slip-On Race Line (Titanium) gives the entire system an exhilarating sound experience with a raw and powerful growl in the lower rev range that develops into a thrilling high-frequency racing sound. Please note that the product shown in the second picture presents the Slip-On Race Line (Titanium) in combination with the Link Pipe Set (SS). THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>							
			Super Sport	Car	Ferrari	296 GTB	2023	2025	8850	EUR
L-FE/SS/4	Link Pipe Set (SS)	OP - Optional part	<p>The Ferrari 458 Italia is one of the most impressive road-going cars ever designed. With its lightweight construction, technical innovations, and 570 hp 4.5-liter engine, it's a memorable driving experience. Add our titanium Slip-On performance exhaust system for even more power, reduced weight, and an enhanced sporty sound. Our Slip-On features dual-mode exhaust valves and a triple exit system that delivers crisp but subdued sound at low rpm, but at higher rpm it fully unleashes an incredible deep sporty sound from the F1-inspired, high-revving V8. Complete the look with a set of three exquisite carbon fibre tailpipes. Further tuning opportunities and even more aggressive sound are available with our titanium link pipe set with high-flow catalytic converters. When installing Akrapović aftermarket optional down pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing Akrapović aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential »check engine lights« warning signals.</p>

			Super Sport	Car	Ferrari	458 Italia/458 Spider	2010	2015	7523	EUR

L-FE/T1	Link pipe set (Titanium)	OP - Optional part		We offer optional, lightweight, high-flow 200 cpsi catalyt link pipes. Used in conjunction with the muffler system the sound is even more aggressive, similar to the 458 Challenge Car. When installing Akrapovič aftermarket optional down pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing Akrapovič aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential check engine light warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Super Sport	Car	Ferrari	458 Italia/458 Spider	2010	2015	3585,52	EUR
MTP-FE488H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	Constructed using high-grade, ultra-lightweight special titanium alloys – with parts cast in Akrapovič's in-house foundry – providing a weight reduction of 35.2% over the stock exhaust. Larger-diameter tubes assist airflow and a different system configuration lowers backpressure to increase performance and power outputs. It is ECE type-approved and comes with easy-to-install instructions. It is finished with a carbon-fibre outer sleeve on the tailpipes. Especially when combining the Slip-On system with the optional stainless-steel link pipe sets with or without catalytic converters, it emphasizes the character of the Ferrari V8 (flat-crank engine) sound with the unique Akrapovič note. An optional Akrapovič Sound Kit is available to control the different sound settings. When installing Akrapovič optional link pipe set with or without catalytic converters, remapping the ECU is mandatory.	Super Sport	Car	Ferrari	488 GTB/488 Spider	2016	2019	6728,59	EUR
L-FE/SS1	Link Pipe Set w Cat (SS)	OP - Optional part		Link pipe set w/o Cat (SS) was tested and developed together with Slip-On Line (Titanium) system. Featuring 200 CPSI high-flow high-quality metal cats and larger insulated tubes. The set increases performance due to less restricted flow through the cats and lowered backpressure, resulting in increased power. Sound levels will also be enhanced, with an increase of 10 dB in external sound performance, emphasizing the character of the engine to provide more of the traditional V8 flat crank feel. When fitting the optional link pipe set with catalytic converters, remapping the car's ECU is necessary. This product has been developed in combination with our Slip-On Line MTP-FE488H. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Super Sport	Car	Ferrari	488 GTB/488 Spider	2016	2019	4214,37	EUR
L-FE/SS12	Link Pipe Set w/o Cat (SS)	OP - Optional part		Link pipe set w/o Cat (SS) was tested and developed together with Slip-On Line (Titanium) system MTP-FE488H. Designed to offer the ultimate in sound performance and sportiness. The sound is close to that of the 458 Italia and delivers a tone similar to a normally aspirated V8 engine from a turbo power plant. It is constructed with larger-diameter straight tubes, designed to reduce backpressure to a minimum and ensure that the highest engine tuning potentializing the optimal power increase is achieved. When fitting the optional link pipe set without catalytic converters, remapping the car's ECU is necessary. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. In this case, the ECE homologation is not valid anymore. Pictures are symbolic.	Super Sport	Car	Ferrari	488 GTB/488 Spider	2016	2019	2319,72	EUR
P-HF1082	Akrapovič Sound Kit	XX - Other		The main parts of this system with a central muffler are constructed from high-grade lightweight titanium. The link pipes are made from high-grade stainless steel, and complex parts such as the titanium housing of the exhaust valves and the titanium tailpipe's outer shell are cast in Akrapovič's in-house foundry. The heat insulation is made from stainless steel, and each link pipe contains a 300 cpsi catalytic converter. An Evolution Line (Titanium) exhaust also has to perform. Performance power is increased by an extra 13.2 kW (17.9 hp) at 5,650 rpm, with a torque gain of 33.6 Nm at 2,400 rpm. These figures were obtained in back-to-back runs on the Akrapovič dyno against a Ferrari F8 Tributo using a standard stock exhaust. It also produces a stunning sound via the application of two valves – one on each side of the muffler – which tailor the gas flow to produce a deep racing tone fully defining the car's V8 turbocharged 3.9-litre engine. This system is also equipped with an Akrapovič Sound Kit, which makes it possible to control the sound from the cockpit. This allows the occupants of the car to easily switch between quiet mode and a sportier tone using the Sound Remote Controller, which opens and closes the exhaust valves, providing a fuller and more involved experience. Due to the nature of the exhaust system, remapping is recommended, and it is designed for use on closed course competition circuits and venues. For cars with petrol particulate filters: When installing the Evolution Line (Titanium) exhaust system, remapping the ECU is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. Pictures are symbolic.	Super Sport	Car	Ferrari	488 GTB/488 Spider	2016	2019	453,39	EUR
S-FE/T1	Evolution Line (Titanium)	EV - Evolution		The tail pipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapovič. In order to satisfy the most discriminating tastes, we've created handcrafted carbon-fiber tail pipes.	Super Sport	Car	Ferrari	F8 Tributo / Spider	2020	2023	11790	EUR
P-HF80	Akrapovič Sound Kit	OP - Optional part	W/O Approval	The precision-engineered titanium alloy Slip-On performance exhaust system reduces the weight of this supercar and improves handling. We've extracted additional power through improved gas-flow dynamics and a drop in back pressure. To complement our muffler design, we've added our well-known cast titanium dual-mode exhaust valves to create a virtual symphony from the large displacement V10. If no optional Akrapovič sound kit for adjustable sound is used, at lower engine speeds and during cruise operation the valves are closed and produce a deeper and sharper exhaust note. At wide-open throttle the valves open, releasing the full fury of the engine. The driver can control the sound with the Akrapovič sound kit. Complete the look with a set of four exquisite tailpipes in carbon fibre. When installing Akrapovič aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential check engine light warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Super Sport	Car	Lamborghini	Gallardo LP 550-2 Coupé	2009	2014	537,94	EUR
TP-CT17	Tail pipe set (Carbon) 550/560	OP - Optional part		The precision-engineered titanium alloy Slip-On performance exhaust system reduces the weight of this supercar and improves handling. We've extracted additional power through improved gas-flow dynamics and a drop in back pressure. To complement our muffler design, we've added our well-known cast titanium dual-mode exhaust valves to create a virtual symphony from the large displacement V10. MTP-LA/T/2	Slip-On Line (Titanium)	SO - Slip-On		Following the success and experience gained from the Slip-On Line exhaust system that Akrapovič developed for the Lamborghini Gallardo, the new system for the Lamborghini Huracán takes this stunning car to new levels. Precision engineered from a high-grade titanium alloy, which is designed to significantly reduce weight and improve handling, the Slip-On Line has bigger main pipes than the standard system and a specially designed X-part (for cross-flow) in the muffler to reduce back-pressure, increasing power and torque levels right across the rev range. The unique growl from the naturally aspirated V10 engine is improved as the performance grows, delivering a distinctive note that thrills the senses, without any unwanted cabin noise. At lower revs and during cruise operation the valves are closed, producing a deeper and sharper exhaust note, but when the revs rise and the valves open, the full passionate soundtrack of the engine is released to show that the Huracán means business. This exquisite system is perfectly finished with four carbon fibre tailpipes, ensuring that this exhaust looks as good as it sounds and performs. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Super Sport	Car	Lamborghini	Huracán LP 580-2 Coupé/Spyder	2016	2016	9909.49	EUR

S-MC/T/3	Slip-On Line (Titanium)	SO - Slip-On		An exquisite car deserves an exquisite exhaust, and the Slip-On Line (Titanium) for the McLaren is certainly that. It is made of special, lightweight, durable, and heat-resistant titanium alloys, all perfectly formed and shaped to fit the car. Bigger tubes deliver optimised gas flow, and the use of ultra-lightweight materials will significantly reduce the vehicle's weight and enhance its handling. A distinctive coating offers an enhanced appearance, and the parts most exposed to heat feature special insulation for protection. With two flawlessly styled and finished handmade carbon-fibre tailpipes, which beautifully complement the titanium pipes, this exhaust is a work of art. It comes complete with a soundtrack that perfectly matches the car's performance, ideally tuned to produce a unique sound colour and the celebrated Akrapovič signature sound. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Super Sport	Car	McLaren	540C	2016	2020	6633.79	EUR

S-MC/T/2	Slip-On Line (Titanium)	SO - Slip-On		The performance exhaust for the McLaren 650S is a high-tech system crafted from a special durable and heat-resistant titanium alloy with bigger tubes and unique solutions to improve torque and power at all rpms, especially in the most-used middle range. Our uncompromising approach uses the best materials and design. Light systems save weight and lower the center of gravity, leading to better handling as well. A special coating guarantees a state-of-the-art look. The 650S with the Akrapovič Slip-On exhaust system sounds deeper in the low rpms and serves up a delicious racing sound as the revs get higher. Slip-On systems contain special sound solutions to tune the sound frequencies: every element of the system was designed for maximum sound output, and offers everything needed for pleasant cabin comfort and to make the V8 sing out for true car enthusiasts at all rpms in all gears. On top of all this, the carbon fibre tailpipes create the striking visual impression that this is no ordinary McLaren. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Super Sport	Car	McLaren	650S / 650S SPIDER	2014	2019	5879.23	EUR

E-ME/SS/I	Evolution Link Pipe Set (SS)	OP - Optional part	Evolution Link Pipe Set (SS) was tested and developed together with the Slip-On Line (Titanium) system. Offering an ideal upgrade to further the tuning potential of the car, the link pipe set is primarily designed for track use and will release the sporty sound that the engine has to offer. With the elimination of the OPF, the sound levels are increased and the frequency content is improved, providing increased sound, leading to an exhilarating tone, with cracking and burbling being an enjoyable aural assault on over-run. The change in performance is a noticeable factor when compared to the stock exhaust system configuration, and the difference is perceptible from the driver's and passenger's point of view. When installing the Akrapovič Evolution Link pipe set, which is developed for use on closed tracks only, remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals.		Hot Hatch	Car	Mercedes-AMG	A 35 (V177)	2019	2025	940.66	EUR	
			Providing a stunning sensory experience, this lightweight exhaust is beautifully crafted from high-grade titanium and finished with an eye-catching design of two pairs of titanium and carbon-fibre tailpipes. The exhaust valve – with its housing cast in the in-house foundry – gives the sound from the exhaust a richer and higher frequency than stock, especially when shifting through the gears, all allied to a smooth sound that enhances the car's engine tones without any discomfort or drone for the occupants. A specially designed perforated manifold tube on the valve side eliminates streaming without any compromise to the pressure pulse distribution, thus offering a stronger sound. Lighter than stock due to the use of titanium and a different configuration, the design and construction of the exhaust leads to optimization in the power and torque levels throughout the entire rev range. The optimized flow path of exhaust gases provides greater tuning potential, something that can be realized further with the addition of the optional Evolution Link pipe set (SS). When installing the optional Evolution Link pipe set (SS), the ECE type approval for the Slip-On Line (Titanium) exhaust system is no longer valid. The ECE type-approval certificate is valid until 2023 (including model year 2023, pre-facelift vehicles), equipped with an Otto/gasoline particulate filter. For installing the Slip-On system, the stock exhaust system must be cut. Please read the instructions carefully before starting installation.

E-ME/SS/1	Evolution Link Pipe Set (SS)	OP - Optional part		<p>Evolution Link Pipe Set (SS) was tested and developed together with the Slip-On Line (Titanium) system. Offering an ideal upgrade to further the tuning potential of the car, the link pipe set is primarily designed for track use and will release the sporty sound that the engine has to offer. With the elimination of the OPF, the sound levels are increased and the frequency content is improved, providing increased sound, leading to an exhilarating tone, with cracking and burbling being an enjoyable aural assault on over-run. The change in performance is a noticeable factor when compared to the stock exhaust system configuration, and the difference is perceptible from the driver's and passenger's point of view. When installing the Akrapovič Evolution Link pipe set, which is developed for use on closed tracks only, remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals.</p>	Hot Hatch	Car	Mercedes-AMG	A 35 (W177) - OPF/GPF	2019	2025	940.66	EUR
E-ME/SS/1	Evolution Link Pipe Set (SS)	OP - Optional part		<p>Evolution Link Pipe Set (SS) was tested and developed together with the Slip-On Line (Titanium) system. S-ME/TI/11	Slip-On Line (Titanium)	SO - Slip-On		<p>Providing a stunning sensory experience, this lightweight exhaust is beautifully crafted from high-grade titanium and finished with an eye-catching design of two pairs of titanium and carbon-fibre tailpipes. The exhaust valve – with its housing cast in the in-house foundry – gives the sound from the exhaust a richer and higher frequency than stock, especially when shifting through the gears, all allied to a smooth sound that enhances the car's engine tones without any discomfort or drone for the occupants. A specially designed perforated manifold tube on the valve side eliminates streaming without any compromise to the pressure pulse distribution, thus offering a stronger sound. Lighter than stock due to the use of titanium and a different configuration, the design and construction of the exhaust leads to optimization in the power and torque levels throughout the entire rev range. The optimized flow path of exhaust gases provides greater tuning potential, something that can be realized further with the addition of the optional Evolution Link pipe set (SS). For installing the Slip-On system, the stock exhaust system must be cut. Please read the instructions carefully before starting installation.</p>	Sports Coupe	Car	Mercedes-AMG	A 35 L (Z177)	2019	2023	3870.69	EUR
DP-ME/SS/3	Downpipe w Cat (SS)	OP - Optional part	W/O Approval	<p>The Downpipe with Cat (SS) was tested and developed together with the Evolution Line (Titanium) exhaust system and offers an ideal upgrade to the Evolution Line (Titanium) system for further tuning. This addition is primarily designed for track use and will create a pure racing sound for the engine. Equipped with a high-flow 200 CPSI sport catalytic converter, the downpipe eliminates the OPF for a completely different sensory experience the moment the driver's foot comes down! The sound level is noticeably increased and accompanied by a deep and powerful tone in the low and mid rev ranges, developing into a pure race-derived acoustic delight in high revs, which the occupants simply won't get enough of! Every gear shift is full of crackling sounds, and the exhilarating tone is accompanied by an addictive burbling on every over-run in the sportiest settings. Despite being a track-oriented system, it retains all the comfort when you want it in Comfort mode, with no unwanted sounds or drone in the cabin. When installing the Akrapovič Downpipe with Cat, remapping the ECU is mandatory to prevent potential "check engine light" warning signals. FITMENT NOTICE: This product does not fit 2021 vehicles equipped with an Otto/gasoline particulate filter. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>	Sports Coupe	Car	Mercedes-AMG	A 45 / A 45 S (W177)	2020	2023	2226.61	EUR
P-HF1298	Control Kit for vehicles before facelift	EV - Evolution		<p>This is a mandatory product for all vehicles produced before the facelift. Perfectly designed for a stunning sensory experience, this beautifully crafted lightweight exhaust system is constructed from high-grade lightweight titanium and is finished with an eye-catching design featuring two pairs of titanium and carbon-fibre tailpipes for a stunning visual impact. A specially designed exhaust valve – with its housing cast in the in-house foundry – regulates the character of the sound and is adjusted through the use of Control Kit electronics developed in-house, allowing the driver to select the level of sportiness with AMG Dynamic Select. The system is an aural delight for all, with settings ranging from the comfortable everyday car mode, with a smooth sound that enhances the car's engine tones without any discomfort or drone, to a sporty acoustic experience with deep midrange tones and a rich high-frequency sound at the top of the rev range to elevate the gear-shifting experience, providing amazing crackles at over-run. A different design, build, and configuration from the stock system means the exhaust saves weight and optimizes the engine's power and torque levels, increasing both throughout the entire rev range, with increases of 6.4 kW at 6,400 rpm and 9.1 Nm at 6,700 rpm as measured in back-to-back runs on the Akrapovič dyno against a Mercedes-AMG A 45 using a standard stock exhaust. The flow path of the exhaust gases provides tuning potential, which can be further enhanced with the addition of the optional Downpipe (SS). The system is ECE type approved for cars equipped with an Otto/gasoline particulate filter, but, when installing the Akrapovič Downpipe (SS), the ECE type approval is no longer valid. Pictures are symbolic.</p>	Sports Coupe	Car	Mercedes-AMG	A 45 / A 45 S (W177)	2020	2023	494.56	EUR

				The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that either open the valves or setting them in a regulated mode at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid. Pictures are symbolic.	Sports Coupe	Car	Mercedes-AMG	C 43 4MATIC (W206, S206)	2023	2025	470.33	EUR
P-HF1564	Akrapovič Sound Kit	OP - Optional part	W/O Approval									
				The optimal Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. P-HF1564	Akrapovič Sound Kit	OP - Optional part	W/O Approval									
				This product is designed as a further enhancement for the Akrapovič Slip-On Line (Titanium) exhaust. This option has been developed for use on closed-course competition circuits. Constructed from high-grade stainless steel, its dual tube design minimizes gas flow resistance, and a special resonator eliminates unwanted drone. When combined with the Akrapovič Slip-On Line (Titanium) exhaust, power is increased by 7.3 kW (10.0 hp) at 8,900 rpm, with a torque rise of 12.6 Nm at 3,300 rpm when tested on the Akrapovič dyno against a Mercedes-AMG C 43 4MATIC with a standard stock exhaust, and weight is reduced by 25.1 % (3.4 kg) against the standard stock set-up. Installation is plug and play, with no remapping needed. The sound is comfortable tone at cruising speeds, rising to a sharper and dynamic sound at higher revs, with precision pops and bangs coming from the tailpipes through gear changes during acceleration. With the installation of the Evolution Link Pipe Set (SS), ECE type approval of the Slip-On Line (Titanium) is no longer valid. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. If the Evolution Link Pipe Set (SS) system is combined with the Slip-On Line (Titanium), the Link Pipe Set L-ME/T12 is not needed. Precision engineering and design have produced an exhaust that delivers a unique sound from its full high-grade titanium construction. Special collectors inside both mufflers eliminate streaming noise, and inner cones act as acoustic reflectors and partially direct sound from the bumper-mounted tailpipes forward toward the cabin. Sound is linearized through the rev range and engine load, providing a smooth tone at cruising speeds, and as the revs rise the sound becomes more dramatic and sportier. Sound is controlled with two exhaust valves and by a control kit, which monitor driving parameters and precisely control the opening and closing of the valves to create a distinctive and finely tuned sound. The exhaust is finished with a pair of twin tailpipes constructed from hand-crafted carbon-fibre outer sleeves and high-grade titanium inner sleeves, and the use of lightweight aerospace materials has reduced the weight by 26.5 % (3.6 kg) over the standard stock system. Performance has been enhanced with a power increase of 6.3 kW (8.6 hp) at 6,650 rpm and a torque gain of 13.5 Nm at 2,650 rpm when tested on the Akrapovič dyno against a Mercedes-AMG C 43 4MATIC with a standard stock exhaust. This product is ECE type approved. The plug-and-play installation means no remapping is required. An optional Akrapovič Sound Kit is also available, as well as an optional Evolution Link Pipe Set (SS) for owners looking for an enhanced acoustic experience and greater performance from the Akrapovič Slip-On Line (Titanium) exhaust. The Slip-On Line (Titanium) exhaust system is ECF tune approved for cars equipped with a catalytic converter. The Link Pipe Set (Titanium) L-ME/T12 is a mandatory product to the Slip-On Line (Titanium) S-MEI/T4H. If the Slip-On Line (Titanium) S-MEI/T4H is combined with optional Evolution Link Pipe Set (SS) E-ME/SIS/2, the Link Pipe Set (Titanium) L-ME/T12 is not needed. P-HF985	Valve Actuator Kit	OP - Optional part	W/O Approval	Evolution Line system, the Valve Actuator Kit (P-HF985) is a mandatory upgrade. If the Evolution Line system replaces the Mercedes-AMG performance exhaust system, the Valve Actuator Kit (P-HF985) is not required. Perfectly formed using specially developed ultra-lightweight titanium alloys and finished with hand-crafted matte carbon-fibre tailpipes. The system replaces both the base and performance exhausts fitted to the Mercedes-AMG C 63 and C 63 S. This stunning system includes parts cast in the company's in-house foundry, featuring an active X connection and an additional pair of exhaust valves behind the rear mufflers, designed to provide optimal control of the exhaust sound for the best aural enjoyment. With two defined sound characteristics and three different driving sound settings, the system has been perfectly tuned to deliver the very best sound in all modes. The optional Akrapovič Sound Kit controller allows the user to choose the exhaust tone regardless of the chosen mode of the vehicle and is a recommended upgrade when replacing the base exhaust system. An increase in performance and torque and a huge weight savings in excess of 45% makes this a very serious performance upgrade. Because it is ECE type approved with no need to remap the ECU or add any other parts, it is just a simple plug-and-play installation. The exquisite Akrapovič Evolution Line (Titanium) exhaust system adds performance and style, along with an amazing soundtrack. Because of packaging requirements, the EVO system has been split into two codes. Please be aware that both part numbers (MTP-ME/T23H and E-ME/T73) must be ordered. If the Akrapovič Evolution Line system replaces the Mercedes-AMG performance exhaust system, the Valve Actuator Kit (P-HF985) is not needed. The valves on the exhaust can be controlled. The Akrapovič Sound Kit allows the driver to easily adjust the sound of the exhaust from inside the car's cockpit. Using the latest innovative technology and working with the car's own electronics, the Akrapovič Sound Kit provides different sound characteristics through the control of the active X-connection built into this superb Evolution Line (Titanium) system. For a car equipped with the base Mercedes-AMG exhaust system – with no exhaust system button inside the cabin – the Akrapovič Sound Kit (P-HF949) is a highly recommended upgrade to take complete control over the exhaust sounds. If the car is already equipped with exhaust valve button inside the cabin, sound kit is not needed. Pictures are symbolic.	Sports Coupe	Car	Mercedes-AMG	C 63 Coupé (C205)	2016	2018	710.5	EUR

Sound is linearized according to engine load and rpms. Smooth and refined at cruising speeds, it becomes sportier and more dramatic when driving dynamically. Sound is controlled with two exhaust valves and by a control kit, which monitor driving parameters and precisely control the opening and closing of the valves to create a distinctive and finely tuned sound. Power is increased by 7.1 kW (9.6 hp) at 2,000 rpm, and a torque gain of 33.7 Nm at 2,000 rpm was achieved when tested on the Akrapovič dyno against a Mercedes-AMG C 63 S E PERFORMANCE with a standard stock exhaust. Weight is reduced by 26.9 % (3.7 kg) against over the standard stock exhaust.This product is ECE type approved. The plug-and-play installation means no remapping is required. An optional Akrapovič Sound Kit is also available, as well as an optional Evolution Link Pipe Set (Titanium), for owners looking for an enhanced acoustic experience and greater performance from the Slip-On Line (Titanium) exhaust.The Slip-On Line (Titanium) exhaust system is ECE type approved for cars equipped with a gasoline particulate filter.With the Slip-On please choose one of additional mandatory products: Link Pipe set L-ME/T/10 or Evolution Link Pipe Set E-ME/T/7. With the optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that either open the valves or setting them in a regulated mode at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves.With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid.Pictures are symbolic.	Sports Coupe	Car	Mercedes-AMG	C 63 S E PERFORMANCE (W206, S206)	2023	2025	242	EUR
E-ME/T/7	Evolution Link Pipe Set (Titanium)	OP - Optional part		This full high-grade titanium construction exhaust is finished with a twin pair of bumper-mounted tailpipes with hand-crafted carbon-fibre outer sleeves and titanium inner sleeves. Special collectors inside both mufflers eliminate streaming noise, and inner cones act as acoustic reflectors to partially direct sound from the tailpipes to the cabin. Sound is linearized according to engine load and rpms. Smooth and refined at cruising speeds, it becomes sportier and more dramatic when driving dynamically. Sound is controlled with two exhaust valves and by a control kit, which monitor driving parameters and precisely control the opening and closing of the valves to create a distinctive and finely tuned sound. <p>This full high-grade titanium construction exhaust is finished with a twin pair of bumper-mounted tailpipes with hand-crafted carbon-fibre outer sleeves and titanium inner sleeves. Special collectors inside both mufflers eliminate streaming noise, and inner cones act as acoustic reflectors to partially direct sound from the tailpipes to the cabin. Sound is linearized according to engine load and rpm. Smooth and refined at cruising speeds, it becomes sportier and more dramatic when driving dynamically. Sound is controlled with two exhaust valves and by a control kit, which monitor driving parameters and precisely control the opening and closing of the valves to create a distinctive and finely tuned sound. Power is increased by 7.1 kW (9.6 hp) at 2,000 rpm, and a torque gain of 33.7 Nm at 2,000 rpm was achieved when tested on the Akrapovič dyno against a Mercedes-AMG C 63 S E PERFORMANCE with a standard stock exhaust. Weight is reduced by 26.6 % (3.7 kg) against over the standard stock exhaust. This product is ECE type approved. The plug-and-play installation means no remapping is required. An optional Akrapovič Sound Kit is also available, as well as an optional Evolution Link Pipe Set (Titanium) for owners looking for an enhanced acoustic experience and greater performance from the Slip-On Line (Titanium) exhaust. The Slip-On Line (Titanium) exhaust system is ECE type approved for cars equipped with a gasoline particulate filter. With the Slip-On please choose one of additional mandatory products: Link Pipe set L-ME/T10 or Evolution Line Set S-ME/T2H1 or S-ME/T3H. This product is constructed from high-grade titanium for the rear part of the link pipe set, combined with high-grade austenitic stainless steel in the front. Designed as a further enhancement for the Akrapovič Slip-On Line (Titanium) exhaust, its dual tube design minimizes gas flow resistance, and a special resonator eliminates unwanted drone. When combined with the Akrapovič Slip-On Line (Titanium) exhaust, power is increased by 14.3 kW (19.5 hp) at 4,650 rpm, with a torque rise of 29.4 Nm at 4,600 rpm when tested on the Akrapovič dyno against a Mercedes-AMG C 63 S E PERFORMANCE with a standard stock exhaust, and weight is reduced by 6.6 % (0.7 kg) against the standard stock set-up. The sound is a comfortable tone at cruising speeds, rising to a sharper and dynamic sound at higher revs, with precision pops and bangs coming from the tailpipes through gear changes during acceleration. Installation is plug and play, with no remapping needed and intended for use on closed-course competition circuits. With the installation of the Evolution Link Pipe Set (Titanium), ECE type approval of the Slip-On Line (Titanium) is no longer valid. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. If the Evolution Link Pipe Set (Titanium) system is combined with the Slip-On Line (Titanium), the link pipe set L-ME/T10 is not needed.</p> <p>The Link Pipe Set (Titanium) L-ME/T10 is a mandatory product to the Slip-On Line (Titanium) S-ME/T4H. If the Slip-On Line (Titanium) S-ME/T4H is combined with optional Evolution Link Pipe Set (Titan) E-ME/T77, the Link Pipe Set (Titanium) L-ME/T10 is not needed.</p> <p>For vehicles with the base Mercedes-AMG exhaust system, which is then replaced by the Akrapovič Evolution Line system, the Valve Actuator Kit (P-HF985) is a mandatory upgrade. If the Evolution Line system replaces the Mercedes-AMG performance exhaust system, the Valve Actuator Kit (P-HF985) is not required. Perfectly formed using specially developed ultra-lightweight titanium alloys and finished with hand-crafted matte carbon-fibre tailpipes. The system replaces both the base and performance exhausts fitted to the Mercedes-AMG C 63 and C 63 S. This stunning system includes parts cast in the company's in-house foundry, featuring an active X connection and an additional pair of exhaust valves behind the rear mufflers, designed to provide optimal control of the exhaust sound for the best aural enjoyment. With two defined sound characteristics and three different driving sound settings, the system has been perfectly tuned to deliver the very best sound in all modes. The optional Akrapovič Sound Kit controller allows the user to choose the exhaust tone regardless of the chosen mode of the vehicle and is a recommended upgrade when replacing the base exhaust system. An increase in performance and torque and a huge weight savings in excess of 45% makes this a very serious performance upgrade. Because it is ECE type approved with no need to remap the ECU or add any other parts, it is just a simple plug-and-play installation. The exquisite Akrapovič Evolution Line (Titanium) exhaust system adds performance and style, along with an amazing soundtrack. Because of packaging requirements, the EVO system has been split into two codes. Please be aware that both part numbers (MTP-ME/T2H1 and E-ME/T3) must be ordered if the Akrapovič Evolution Line system replaces the Mercedes-AMG performance exhaust system, the Valve Actuator Kit (P-HF985) is not needed. The valves on the exhaust can be controlled. The Akrapovič Sound Kit allows the driver to easily adjust the sound of the exhaust from inside the car's cockpit. Using the latest innovative technology and working with the car's own electronics, the Akrapovič Sound Kit provides different sound characteristics through the control of the active X-connection built into this superb Evolution Line (Titanium) system. For a car equipped with the base Mercedes-AMG exhaust system – with no exhaust system button inside the cabin – the Akrapovič Sound Kit (P-HF949) is a highly recommended upgrade to take complete control over the exhaust sounds. If the car is already equipped with exhaust valve button inside the cabin, sound kit is not needed. Pictures are symbolic.</p> <p>Because of packaging requirements, the EVO system has been split into two codes. Please be aware that both part numbers (MTP-ME/T2H1 or MTP-ME/T3H and E-ME/T3) must be ordered if the Akrapovič Evolution Line system replaces the Mercedes-AMG performance exhaust system, the Valve Actuator Kit (P-HF985) is not needed. The valves on the exhaust can be controlled from the car cabin. The Akrapovič Sound Kit (P-HF949) can be purchased as an optional part. If the car is not equipped with a performance exhaust but with the basic Mercedes-AMG exhaust system, then the Valve Actuator Kit (P-HF985) is mandatory. The Akrapovič Sound Kit (P-HF949) is also highly recommended for complete control over exhaust sound regulation.</p> <p>Evolution Link Pipe Set (SS) was tested and developed together with the Slip-On Line (Titanium) system. Offering an ideal upgrade to further the tuning potential of the car, the link pipe set is primarily designed for track use and will release the sporty sound that the engine has to offer. With the elimination of the OPF, the sound levels are increased and the frequency content is improved, providing increased sound, leading to an exhilarating tone, with crackling and burbling being an enjoyable aural assault on over-run. The change in performance is a noticeable factor when compared to the stock exhaust system configuration, and the difference is perceptible from the driver's and passenger's point of view. When installing the Akrapovič Evolution Link pipe set, which is developed for use on closed tracks only, remapping the ECU is mandatory in order to prevent potential 'check engine light' warning signals.</p>

S-ME/TU/10H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	Providing a stunning sensory experience, this lightweight exhaust is beautifully crafted from high-grade titanium and finished with an eye-catching design of two pairs of titanium and carbon-fibre tailpipes. The exhaust valve – with its housing cast in the in-house foundry – gives the sound from the exhaust a richer and higher frequency than stock, especially when shifting through the gears, all allied to a smooth sound that enhances the car's engine tones without any discomfort or drone for the occupants. A specially designed perforated manifold tube on the valve side eliminates streaming without any compromise to the pressure pulse distribution, thus offering a stronger sound. Lighter than stock due to the use of titanium and a different configuration, the design and construction of the exhaust leads to optimization in the power and torque levels throughout the entire rev range. The optimized flow path of exhaust gases provides greater tuning potential, something that can be realized further with the addition of the optional Evolution Link pipe set (SS). When installing the optional Evolution Link pipe set (SS), the ECE type approval for the Slip-On Line (Titanium) exhaust system is no longer valid. The ECE type-approval certificate is valid until 2023 (including model year 2023, pre-facelift vehicles), equipped with an Otto/gasoline particulate filter. For installing the Slip-On system, the stock exhaust system must be cut. Please read the instructions carefully before starting installation.Fitment notice: This product can be fitted on CLA 35 S Shooting Brake models.	Sports Coupe	Car	Mercedes-AMG	CLA 35 (C118/X118)	2019	2025	4025,7	EUR

S-ME/TU/12H	Evolution Line (Titanium)	EV - Evolution	ECE Type Approval	Perfectly designed for a stunning sensory experience, the beautifully crafted lightweight exhaust system is constructed from high-grade lightweight titanium and is finished with an eye-catching design featuring two pairs of titanium and carbon-fibre tailpipes for a stunning visual impact. A specially designed exhaust valve – with its housing cast in the in-house foundry – regulates the character of the sound and is adjusted through the use of Control Kit electronics developed in-house, allowing the driver to select the level of sportiness with AMG Dynamic Select. The system is an aural delight for all, with settings ranging from the comfortable everyday car mode, with a smooth sound that enhances the car's engine tones without any discomfort or drone, to a sporty acoustic experience with deep midrange tones and a rich high-frequency sound at the top of the rev range to elevate the gear-shifting experience, providing amazing crackles at over-run. A different design, build, and configuration from the stock system means the exhaust saves weight and optimizes the engine's power and torque levels, increasing both throughout the entire rev range, with increases of 6.4 kW at 4,400 rpm and 9.1 Nm at 6,700 rpm as measured in back-to-back runs on the Akrapovič dyno against a Mercedes-AMG A 45 using a standard stock exhaust. The flow path of the exhaust gases provides tuning potential, which can be further enhanced with the addition of the optional Downpipe (SS).The system is ECE type approved for cars equipped with an Otto/gasoline particulate filter, but, when installing the optional Downpipe (SS), the ECE type-approval certificate is no longer valid. The Downpipe with Cat (SS) was tested and developed together with the Evolution Line (Titanium) exhaust system and offers an ideal upgrade to the Evolution Line (Titanium) system for further tuning. This addition is primarily designed for track use and will create a pure racing sound for the engine. Equipped with a high-flow 200 CPSI sport catalytic converter, the downpipe eliminates the OPF for a completely different sensory experience the moment the driver's foot comes down! The sound level is noticeably increased and accompanied by a deep and powerful tone in the low and mid rev ranges, developing into a pure race-derived acoustic delight in high revs, which the occupants simply won't get enough of! Every gear shift is full of crackling sounds, and the exhilarating tone is accompanied by an addictive burbling on every over-run in the sportiest settings. Despite being a track-oriented system, it retains all the comfort when you want it in Comfort mode, with no unwanted sounds or drone in the cabin.When installing the Akrapovič Downpipe with Cat, remapping the ECU is mandatory to prevent potential "check engine light" warning signals.FITMENT NOTICE: This product does not fit 2021 vehicles equipped with an Otto/gasoline particulate filter.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. [illegible]

The Evolution Line (Titanium) takes these cars to heightened levels of auditory excitement, enhanced performance, and stunning good looks, all with a perfectly sculpted exhaust made from ultra-lightweight titanium alloys that reduce the weight from the stock exhaust by over 46%. Finished with hand-crafted carbon-fibre tailpipes, this exhaust has a stunning soundtrack and that unique Akrapovič signature. The sound is controlled by a complex X-connection, cast in the in-house titanium foundry, with a precisely machined valve flap to alter the tones, which can be controlled with a console button inside the cabin or by the Sound Remote Controller of the optional Akrapovič Sound Kit. When the X-connection valve is open, the exhaust system delivers a more continuous, smooth, and harmonic sound for a more comfortable ride, and in closed mode the acoustics have been maximised to give the cars a pure sporty and intense muscle-car V8 roar. Power and torque levels are increased throughout the entire rev range. It is ECE approved, so no re-map or other parts are needed and it is a simple plug-and-play installation.Fitting information for GT/ GT Roadster models: the Evolution system only fits cars equipped with the AMG Performance exhaust.Fitment notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF).

Because of packaging requirements, the EVO system has been split into two codes. Please be aware that both part numbers (MTP-ME/TI/SH and E-ME/TI/5) must be ordered. The mandatory tail pipe set needs to be ordered separately.Perfectly formed using specially developed ultra-lightweight titanium alloys, this Akrapovič Evolution Line (Titanium) exhaust is designed to replace the performance exhaust fitted to the Mercedes-AMG E 63 and E 63 S. It is finished with hand-crafted carbon-fibre tailpipes in matte or high gloss finish, visually split with a newly designed cast titanium part. This stunning system also includes other parts cast at the in-house foundry, featuring an active X connection and an additional pair of exhaust valves behind the rear mufflers, designed to provide optimal control of the exhaust sound for the best listening enjoyment. The system retains the signature AMG sound, while making it even throatier and richer, and it provides great acoustic feedback both inside and outside the cabin. An increase in performance and torque through a broad rpm range and a significant weight savings of over 45% makes this a very serious performance upgrade. With optimized gas flow and reduced back pressure, it allows limitless tuning options. Because it is ECE type-approved with no need to remap the ECU or add any other parts, it has a simple plug-and-play installation.Fitment notice: The evolution system is designed to replace the AMG Performance Exhaust System. This system does not fit on vehicles equipped with Otto particulate filter (OPF).

PT-CT/46/G	Tail pipe set (Carbon) - High Gloss	OP - Optional part	ECE Type Approval		Sports Coupe	Car	Mercedes-AMG	E 63/E 63 S Sedan/Estate (W213/S213)	2017	2020	1322,59	EUR
P-HF1129	Fitting kit (for mounting on G500)	OP - Optional part			Suv	Car	Mercedes-AMG	G 500 (W463)	2012	2017	586,77	EUR
The Evolution Line (Titanium) exhaust system for the Mercedes G 500 is Akrapovič's first venture into the high-performance off-road market. It is constructed with high-grade durable lightweight titanium to reduce weight. This system is beautifully finished with specially-designed tailpipes exiting on either side of the vehicle, perfectly routed to fit within limited space. It delivers a unique sound for a sporty edge, specially programmed by the Akrapovič Sound Engineers, with a pair of exhaust valves behind the rear mufflers to provide optimal control of the exhaust tones while increasing power and torque levels. This system is ECE type approved.An optional Akrapovič Sound Kit is available to control the different sound settings. Fitment notice: Mandatory fitting kit P-HF1129 is needed for mounting the S-ME/TI/2H evolution system to Mercedes G500 model. Optional dumpdies do not fit to G500. This system does not fit on vehicles equipped with Otto particulate filter (OPF).												
S-ME/TI/2H	Evolution Line (Titanium)	EV - Evolution	ECE Type Approval		Suv	Car	Mercedes-AMG	G 500 (W463)	2012	2017	9243,69	EUR
The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. With the use of optional Akrapovič Sound Kit, the ECE homologation is not valid anymore. Pictures are symbolic.												
P-HF841/2	Akrapovič Sound Kit	OP - Optional part			Suv	Car	Mercedes-AMG	G 500 (W463)	2012	2017	150,13	EUR
Fitment notice: Mandatory needed fitting kit, used for mounting the S-ME/TI/5 evolution system to Mercedes G500 / G550.												
P-HF1225	Fitting kit (for mounting on G500 / G550)	OP - Optional part			Suv	Car	Mercedes-AMG	G 500 / G 550 (W463A)	2019	2024	48,29	EUR
The Evolution Line (Titanium) for the Mercedes-AMG G 500 has been created with durability in mind as well as performance using high-grade durable lightweight titanium, making the system 45% lighter than the stock system. It is finished with specially-designed tailpipes – fashioned in the Akrapovič foundry – exiting on either side of the vehicle, complementing the car's robust look, perfectly routed to fit within limited space. This system – with a pair of exhaust valves behind the rear mufflers to provide optimal control of the exhaust tones – delivers a unique sound that is distinctly deeper and sportier, especially during acceleration and shifting. Power and torque levels are increased through the entire rpm range.Akrapovič Sound Kit is already included in the system. Fitment notice: For mounting Akrapovič exhaust S-ME/TI/5/1 on Mercedes G500/G550 the car has to be equipped with Mercedes stainless steel package (code PA3) or step boards on the left and right sides (code T84 or T86 or T87). Additional original Mercedes parts have to be bought: - A 901 492 00 44 ->gt; 4 pieces - A 463 490 05 02 ->gt; 1 piece - A 463 490 06 02 ->gt; 1 pieceTHIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.

Akrapović Sound Kit is already included in the system. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>											
S-ME/T1/2	Evolution Line (Titanium) - for OPF/GPF	EV - Evolution		Suv	Car	Mercedes-AMG	G 63 4x4 Squared (W463A) - OPF/GPF	2022	2024	8590	EUR
P-HF1298	Control Kit for vehicles before facelift	EV - Evolution		Sports Coupe	Car	Mercedes-AMG	GLA 45 / GLA 45 S (H247)	2021	2023	494.56	EUR
<p>This is a mandatory product for all vehicles produced before the facelift.</p> <p>The Downpipe with Cat (SS) was tested and developed together with the Evolution Line (Titanium) exhaust system and offers an ideal upgrade to the Evolution Line (Titanium) system for further tuning. This addition is primarily designed for track use and will create a pure racing sound for the engine. Equipped with a high-flow 200 CPSI sport catalytic converter, the downpipe eliminates the OPF for a completely different sensory experience the moment the driver's foot comes down!</p> <p>The sound level is noticeably increased and accompanied by a deep and powerful tone in the low and mid rev ranges, developing into a pure race-derived acoustic delight in high revs, which the occupants simply won't get enough of! Every gear shift is full of crackling sounds, and the exhilarating tone is accompanied by an addictive burbling on every over-run in the sportiest settings. Despite being a track-oriented system, it retains all the comfort when you want it in Comfort mode, with no unwanted sounds or drone in the cabin. When installing the Akrapović Downpipe with Cat, remapping the ECU is mandatory to prevent potential "check engine light" warning signals. FITMENT NOTICE: This product does not fit 2021 vehicles equipped with an Otto/gasoline particulate filter. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>											
DP-ME/SS/3	Downpipe w Cat (SS)	OP - Optional part	W/O Approval	Sports Coupe	Car	Mercedes-AMG	GLA 45 / GLA 45 S (H247)	2021	2023	2226.61	EUR
<p>The optional Akrapović Sound Kit enables owners of selected Akrapović car exhausts to control the sound of the system from the cockpit of their machine. P-HF1296	Akrapović Sound Kit	OP - Optional part		Sports Coupe	Car	Mercedes-AMG	GLA 45 / GLA 45 S (H247)	2021	2025	420.55	EUR
L-ME/SS/3	Evolution Link pipe set (SS)	EV - Evolution	ECE Type Approval	Hot Hatch	Car	Mercedes-AMG	GLA 45 / GLA 45 S (H247)	2021	2025	678.7	EUR
<p>Please be aware that both part numbers: S-ME/T1/13H and L-ME/SS/3 have to be ordered! The system is split in 2 codes only because of packaging reasons. Perfectly designed for a stunning sensory experience, this beautifully crafted lightweight exhaust system is constructed from high-grade lightweight titanium and is finished with an eye-catching design featuring two pairs of titanium and carbon-fibre tailpipes for a stunning visual impact. A specially designed exhaust valve – with its housing cast in the in-house foundry – regulates the character of the sound and is adjusted through the use of Control Kit electronics developed in-house, allowing the driver to select the level of sportiness with AMG Dynamic Select. The system is an aural delight for all, with settings ranging from the comfortable everyday car mode, with a smooth sound that enhances the car's engine tones without any discomfort or drone, to a sporty acoustic experience with deep midrange tones and a rich high-frequency sound at the top of the rev range to elevate the gear-shifting experience, providing amazing crackles at over-run. A different design, build, and configuration from the stock system means the exhaust saves weight and optimizes the engine's power and torque levels, increasing both throughout the entire rev range, with increases of 6.4 kW at 6,400 rpm and 9.1 Nm at 6,700 rpm as measured in back-to-back runs on the Akrapović dyno against a Mercedes-AMG A 45 using a standard stock exhaust. The flow path of the exhaust gases provides tuning potential, which can be further enhanced with the addition of the optional Downpipe (SS). The system is ECE type approved for cars equipped with an Otto/gasoline particulate filter, but, when installing the optional Downpipe (SS), the FCF here. This is a mandatory product for all vehicles produced after the facelift.</p>											
S-ME/T1/1H	Evolution Line (Titanium)	EV - Evolution	ECE Type Approval	Hot Hatch	Car	Mercedes-AMG	GLA 45 / GLA 45 S (H247)	2021	2025	3901.22	EUR

[illegible]

				<p>This product is made from high-grade lightweight titanium for a weight saving of 34.2% over the AMG Performance exhaust system. The fully sandblasted exterior is completed with a new tailpipe design constructed from hand-crafted carbon fibre with a titanium inner sleeve. Power gains of 6.3 kW (8.6 hp) and torque increases of 21.3 Nm, both at 2,800 rpm, have been achieved when tested on the Akrapovič dyno against the Mercedes-AMG GLE 63 S Coupé with an AMG Performance exhaust system. There are three exhaust valves, operated by a specially developed control kit: one on either side of the muffler and one in the active X-connection in the link pipe to create a perfect sound experience. The housings for the valves, the X-connection, and the reinforcement – or central pillar – of the tailpipes are all cast in the in-house foundry. This produces a pure and deep distinctive tone, with a full-bodied sound at idle, and a well-defined and strong burble as the revs rise, leading to a high-frequency sound full of sporty character at higher rpms. No remapping is needed on installation. An optional Akrapovič Sound Kit is also available to provide full control over the spectrum of sound emitted from the exhaust. The Evolution Line (Titanium) is ECE type approved for cars with an Otto Particulate Filter (OPF). ECE type approval certificate of the Evolution Line (Titanium) is not valid if the Akrapovič Sound Kit is installed.</p> <p>This product is made from high-grade lightweight titanium for a weight saving of 34.2% over the AMG Performance exhaust system. ECE type approval certificate of the Evolution Line (Titanium) is not valid if the Akrapovič Sound Kit is installed.</p> <p>The Akrapovič Sound Kit allows the driver to easily adjust the sound of the exhaust from inside the car's cockpit. Using the latest innovative technology and working with the car's own electronics, the Akrapovič Sound Kit provides different sound characteristics through the control of the active X-connection built into this superb Evolution Line (Titanium) system. If the car is already equipped with exhaust valve button inside the cabin, sound kit is not needed. Pictures are symbolic.</p> <p>The Evolution Line (Titanium) takes these cars to heightened levels of auditory excitement, enhanced performance, and stunning good looks, all with a perfectly sculpted exhaust made from ultra-lightweight titanium alloys that reduce the weight from the stock exhaust by over 45%. Finished with hand-crafted carbon-fibre tailpipes, this exhaust has a stunning soundtrack and that unique Akrapovič signature. The sound is controlled by a complex X-connection, cast in the in-house titanium foundry, with a precisely machined valve flap to alter the tones, which can be controlled with a console button inside the cabin or by the Sound Remote Controller of the optional Akrapovič Sound Kit. When the X-connection valve is open, the exhaust system delivers a more continuous, smooth, and harmonic sound for a more comfortable ride, and in closed mode the acoustics have been maximised to give the cars a pure sporty and intense muscle-car V8 roar. Power and torque levels are increased throughout the entire rev range. It is ECE approved, so no re-map or other parts are needed and it is a simple plug-and-play installation. Fitting information for GT/GT Roadster models: the Evolution system only fits cars equipped with the AMG Performance exhaust. Fitting notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF).</p> <p>Fitting notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF). Please be aware that both part numbers- MTP-AMT/T1/H and E-ME/T1/2 have to be ordered! The system is splitted in 2 codes only because of packaging issues.</p> <p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapovič. In order to satisfy the most discriminating tastes, we've created handcrafted carbon fibre tailpipes. To make our tailpipes stand out from the rest even more, in addition to selecting the finest materials, we also made them larger.</p> <p>The team behind the MINI is widely acknowledged as having done a great job bringing this iconic car up to date. The Evolution exhaust system made of high-quality stainless steel adds even more to the performance and fun to be had. This system consists of an optimized link pipe with a resonator and rear muffler. It improves performance, adds power and torque, and improves the responsiveness of the four-cylinder engine, especially in the rpm mid-range. The performance exhaust system has a sporty and aggressive tone, without any unwanted droning, that's in keeping with the character of the car it's designed for. Complete the look with a set of two exquisite 95 mm tailpipes in titanium or carbon fibre. Optional down pipe with sports catalytic converter for even greater power. EC type-approval is valid for engine type N18B16A and N14B16A.</p>

DP-MINR56/57	Downpipe (SS)	OP - Optional part		For those of you that demand the maximum in power output and weight reduction, we offer an optional down pipe with a sport catalyst (100cps). When installing Akrapović aftermarket optional down pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing Akrapović aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential «check engine light» warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Hot Hatch	Car	MINI	Cooper S (R56) / Cooper S Cabrio (R57)	2007	2014	1059,73	EUR
DP-MINR56/57	Downpipe (SS)	OP - Optional part		For those of you that demand the maximum in power output and weight reduction, we offer an optional down pipe with a sport catalyst (100cps). When installing Akrapović aftermarket optional down pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. ME-MIN/TI/H	Evolution Line (SS) Cooper S	EV - Evolution	EC Type Approval	The team behind the MINI is widely acknowledged as having done a great job bringing this iconic car up to date. The Evolution exhaust system made of high-quality stainless steel adds even more to the performance and fun to be had. This system consists of an optimized link pipe with a resonator and rear muffler. It improves performance, adds power and torque, and improves the responsiveness of the four-cylinder engine, especially in the rpm mid-range. The performance exhaust system has a sporty and aggressive tone, without any unwanted droning, that's in keeping with the character of the car it's designed for. Complete the look with a set of two exquisite 95 mm tailpipes in titanium or carbon fibre. Optional down pipe with sports catalytic converter for even greater power. EC type-approval is valid for engine type N18B16A and N14B16A.	Hot Hatch	Car	MINI	Cooper S Coupé (R58)	2011	2014	1132,87	EUR
TP-MINR56/57-CA	Tail pipe set (Carbon)	OP - Optional part		The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapović. In order to satisfy the most discriminating tastes, we've created handcrafted carbon fibre tailpipes. To make our tailpipes stand out from the rest even more, in addition to selecting the finest materials, we also made them larger.	Hot Hatch	Car	MINI	Cooper S Coupé (R58)	2011	2014	581,52	EUR

E-BM/SS/6	Evolution Link pipe set (SS)	OP - Optional part		The Evolution Link pipe set (SS) was tested and developed together with the Slip-On Line (Titanium) exhaust system to provide an ideal upgrade and greater exhaust tuning potential. The use of this configuration is designed for the racetrack and will offer a sporty sound and higher performance. With the elimination of the OPE, the sound levels and frequency content are emphasized, providing an increased sound, leading to an exhilarating tone with crackling and burbling as an enjoyable aural assault on over-run and when downshifting through gears. The change in performance is a noticeable factor: compared in back-to-back runs on the Akrapović dyno against a BMW M135i using a standard stock exhaust, there a 5.1 kW (6.9 hp) increase in power at 4.250 rpm and 11.5 Nm of torque is added at 4.250 rpm. When installing the Evolution Link pipe set (SS), which is developed for use on closed tracks only, remapping of the ECU is mandatory to prevent potential "check engine light" warning signals. Fitment notice: This product can only be installed on vehicles with the V-clamp connection between the stock downpipe and link pipe. For further information, please read the installation instructions below. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Sports Coupe	Car	MINI	JCW Clubman ALL4 (F54)	2019	2020	333,68	EUR

				Beautifully crafted from high-grade titanium, this lightweight exhaust system is finished with eye-catching carbon-fibre tailpipes and is a full-on sensory delight. The exhaust valve – with its housing cast in the in-house foundry – gives the exhaust a rich sound with an emphasis on high frequencies, especially when shifting through the gears, all tied to a deep tone that enhances the car's engine without any discomfort or drone for the occupants. A specially engineered Y-split reduces the flow noise without any compromise to the pressure pulse distribution, thus offering a strong sound and optimal flow path. The use of lightweight materials and a different configuration reduces the overall weight of the exhaust by 9.4 kg, a saving of 55.6% on the stock version. The design and construction of the exhaust optimize the power and torque levels throughout the rev range, with performance increased by 3.3 kW (4.5 hp) at 5,350 rpm and torque up by 5.9 Nm at 5,300 rpm. This was achieved during in-house tests with back-to-back runs on the Akrapovič dyno against a BMW M135i using a standard stock exhaust. For a further upgrade of the Slip-On Line (Titanium) exhaust system, an optional Evolution Link pipe set (SS) is available. The exhaust system is ECE type approved for cars equipped with an Otto/gasoline particulate filter.To install the Slip-On Line (Titanium) exhaust system, the stock exhaust system must be cut; please read the instructions carefully before the start of the installation.	Sports Coupe	Car	MINI	JCW Clubman ALL4 (F54)	2019	2024	3581,9	EUR
S-BM7T15H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval	The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver (already included in evolution system) to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves.With the use of the optional Akrapovič Sound Kit, the ECE type approval is no longer valid.Pictures are symbolic. When installing Akrapović aftermarket optional down pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing the optional aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential 'check engine light' warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p> <p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapović. In order to satisfy the most discriminating tastes, we've created handcrafted carbon-fibre tailpipes. To make our tailpipes stand out from the rest even more, in addition to selecting the finest materials, we also made them larger.</p> <p>Please be aware that picture is taken with Titanium Tail Pipes, which are not available anymore. We have available Carbon Tail Pipes. The 370Z from Nissan is a fine sports car in the tradition of Japanese muscle cars but benefits greatly from the Akrapović treatment. Our finely crafted Slip-On axle back exhaust system is made of high-grade stainless steel and fits the original mounting points perfectly. Installation is a snap. There are power gains not just at or near redline, but across the entire rpm range. The Slip-On sport exhaust produces a boost in performance, as well as a weight reduction when compared to stock. The Slip-On system generates a deeper-than-stock tone with the sporty sound you'd expect from the 3.7 liter high-revving engine. Complete the look with a set of two exquisite 125 mm tailpipes in sandblasted and coated titanium or carbon fibre. Exhaust can also be mounted on NISMO model.</p> <p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapović. In order to satisfy the most discriminating tastes, we've created handcrafted carbon-fibre tailpipes.</p> <p>The Evolution performance exhaust, made of our proprietary titanium, is an even better match for the GT-R, complementing its race-inspired looks. Substantial work by the R&D team was required to achieve impressive horsepower and torque output increase over stock, with gains being realized at the redline and throughout the entire rpm range. There are substantial reductions in weight achieved through careful design and the use of light titanium. The power-to-weight ratio improves on both fronts: power increase and weight reduction. The GT-R deserves a great sound and the Akrapović Evolution system delivers it: deep, loud, and aggressive but without droning. Complete the look with a set of four exquisite tailpipes in carbon fibre. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. When replacing the stock exhaust that includes valves, then the ECU remapping is mandatory!</p>

M-NI/T/1H	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval	The Nissan GT-R is one of the fastest cars to race on Germany's famous Nürburgring Nordschleife (North Loop). To enhance this already impressive performance, we offer our Akrapovič Slip-On exhaust system made completely of our proprietary titanium. This beautifully crafted sport exhaust achieves weight reduction and delivers power improvement, most noticeably at the top of the rpm range. The sound is also improved, with a deeper, sportier sound delivered without droning, and this perfectly complements the car. The attention to detail can be seen in every component. Even the exhaust tailpipes were designed to resemble the trademark GT-R tail lights. Complete the look with a set of four exquisite tailpipes in carbon fibre. When replacing the stock exhaust that includes valves, then the ECU remapping is mandatory!	Super Sport	Car	Nissan	GT-R	2008	2025	3436,14	EUR
				This system has been developed to offer Nissan GT-R owners the opportunity to tune their car to its full potential. It is constructed using high-grade lightweight titanium alloys, with individual parts cast in the in-house foundry. The one-piece construction link pipe has an increased diameter, measuring 101.6 mm (4 inches) for optimized exhaust gas flow. It is beautifully completed with larger handmade high-quality carbon-fibre tailpipes (135 mm in diameter) over titanium inners and finished with an Akrapovič chicane design. With the addition of the mandatory Downpipe / Link Pipe Set (SS) or Link Pipe (SS), the Evolution Race Line is converted to a full system. If stock turbos are not replaced or are replaced with turbos with the same connection flanges between turbos and downpipes as on stock turbos, then the Downpipe / Link Pipe Set has to be added to complete the exhaust system. If the turbochargers are changed, then the Link Pipe without Downpipes has to be chosen. In any case, ECU remapping is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.								
S-NI/T/1	Evolution Race Line (Titanium)	EV - Evolution		Constructed from high-quality stainless steel, this front link pipe with downpipe set has been designed to fit perfectly onto stock turbos (or turbos where the connection points between the turbos and downpipes have the same shape as on the stock configuration. The Downpipe / Link Pipe Set was developed using technology directly from the racing world. Two larger 92.8 mm insulated downpipes provide optimal flow, and with flanges cast in-house provide a perfect fit. The front link pipe has a stainless-steel collector with custom-made flex tubes. When combined with the Evolution Race Line exhaust, the full system significantly reduces the back pressure and provides an optimized flow with more than a 40% increase for the exhaust gases, while also offering limitless tuning options. ECU remapping is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Super Sport	Car	Nissan	GT-R	2008	2025	7152,87	EUR
DP-L-NI/SS/1	Downpipe / Link pipe set (SS) for stock turbochargers	OP - Optional part		Constructed using high-grade stainless steel and solutions from direct involvement in the racing world, the link pipe has a collector featuring two custom-made flex tubes. Designed for vehicles that have had replacement turbochargers and downpipes added with stock connection points between the downpipes and front link pipe, it offers opportunities to continue tuning using aftermarket turbos. ECU remapping is mandatory. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.	Super Sport	Car	Nissan	GT-R	2008	2025	3441,13	EUR
L-NI/SS/4	Link pipe (SS) for aftermarket turbochargers	OP - Optional part		sound, design, and performance have combined to create this stunning exhaust. The Akrapovič sound engineers have produced a rich, harmonic, high-frequency tone from the system in the upper rev range, which perfectly combines with the deep sound in the lower range to provide an aural experience in the cabin with no drone and a sound that lingers long after the throttle is released. Constructed from lightweight high-grade titanium, with parts made in the in-house foundry to create a perfect fit within the limited space available, the three mufflers – two side and one central – are configured in a unique way, perfectly engineered by the Akrapovič technicians. There is a choice between two different sets of round titanium tailpipes, sandblasted and coated, and available in a natural titanium finish or black. The inner side of the tailpipes features a dynamic relief surface for increased aesthetic value. An engraved logo type adds to the visual presence. Power gains of +4.8 kW at 3,000 rpm and a torque increase of +15.8 Nm at 2,900 rpm were recorded on the Akrapovič dyno, using a Porsche 718 Cayman GT4 with a stock exhaust system for comparison. This gives the system – which is designed for racing track use only, and is not intended for street use – performance to match its looks and innovative design. Optional extras are available: there is a Link pipe set in titanium for the Slip-On Race Line (Titanium) upgrade, and a carbon-fibre diffuser, in matte or high gloss, can be added to emphasise the design of the Akrapovič exhaust tailpipes. For more control over the exhaust system sound, the optional Akrapovič Sound Kit is available. The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. Pictures are symbolic.	Super Sport	Car	Nissan	GT-R	2008	2025	1369,31	EUR
S-PO/T/18	Slip-On Race Line (Titanium)	SO - Slip-On		The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. It is a completely new design from the one that comes as standard on the car, and it gives the rear of the GT4 a more aggressive and sporty feel.	Super Sport	Car	Porsche	718 Cayman GT4 / Spyder	2020	2020	5563,35	EUR
L-PO/T/13	Link pipe set (Titanium)	OP - Optional part		The stunning carbon fibre diffuser is offered as an option with the choice of a high-gloss or matt finish. <p>Sound, design, and performance have combined to create this stunning exhaust. The Akrapovič sound engineers have produced a rich, harmonic, high-frequency tone from the system in the upper rev range, which perfectly combines with the deep sound in the lower range to provide an aural experience in the cabin with no drone and a sound that lingers long after the throttle is released. Constructed from lightweight high-grade titanium, with parts made in the in-house foundry to create a perfect fit within the limited space available, the three mufflers – two side and one central – are configured in a unique way, perfectly engineered by the Akrapovič technicians. There is a choice between two different sets of round titanium tailpipes, sandblasted and coated, and available in a natural titanium finish or black. The inner side of the tailpipes features a dynamic relief surface for increased aesthetic value. An engraved logotype adds to the visual presence. Power gains of +4.8 kW at 3,000 rpm and a torque increase of +15.8 Nm at 2,900 rpm were recorded on the Akrapovič dyno, using a Porsche 718 Cayman GT4 with a stock exhaust system for comparison. This gives the system – which is designed for racing track use only, and is not intended for street use – performance to match its looks and innovative design. Optional extras are available: there is a Link pipe set in titanium for the Slip-On Race Line (Titanium) upgrade, and a carbon-fibre diffuser, in matte or high gloss, can be added to emphasise the design of the Akrapovič exhaust tailpipes. For more control over the exhaust system's sound, the Link pipe set (SS) was tested and developed together with Slip-On Race Line (Titanium) system. Constructed from high-grade lightweight titanium, with flanges cast in the in-house foundry that perfectly fit the Slip-On Race Line (Titanium) exhaust system, these pipes have been developed to create a full Akrapovič system offering increased performance and a thrilling soundtrack. With the amalgamation of these two state-of-the-art products, the sound has a true racing character with a high-frequency sporty and enjoyable tone, fully in keeping with the performance of the vehicle. The combination of a Slip-On Race Line (Titanium) and the Link pipe set (Titanium) have been tested on the Akrapovič dyno, using a Porsche 718 Cayman GT4 with a stock exhaust system for comparison, and the Akrapovič configuration delivers a power gain of +11.6 kW at 2,600 rpm allied to a torque increase of +43.0 Nm at 2,600 rpm. The full arrangement of the exhaust and link pipes is intended for racing track use only and is not intended for street use. This system fits also on vehicles equipped with Otto particulate filter (OPF). For OPF: When installing the Link pipe set (Titanium), remapping the ECU is mandatory. Fitment notice: A modification of fitting brackets done by Porsche on 718 Cayman GTS 4.0/Boxster GTS 4.0 produced approximately after February 2020 was identified. Please turn to your Area sales manager for detailed explanation on differences in order to choose the appropriate exhaust for your car. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET USE. As the most visible part of an exhaust system, we pay the utmost attention to the tailpipes. There is a choice between two different sets of round titanium tailpipes, sandblasted and coated, and available in a natural titanium finish or black. The inner side of the tailpipes features a dynamic relief surface for increased aesthetic value.</p> <p>The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. Pictures are symbolic.</p> <p>As the most visible part of an exhaust system, we pay the utmost attention to the tailpipes. <p>Taking design to new limits, the Slip-On Race Line (Titanium) is beautifully finished with unique tailpipes to showcase a variety of surfaces, emphasizing the latest in exhaust technology and production. From the outer part, which is sandblasted and coated for increased durability and longevity, and incorporates a laser-engraved Akrapović logo, to the inner tubing, which is polished on the outside and has a black-coated interior, all set within the bumper inserts, this system fully complements the lines of the car. Constructed from lightweight, high-grade titanium alloys, which reduce weight by 60% over the sports stock system, the addition of this system will add power and torque comparable to the sports stock system (measurements are presented in the technical data). To add to the sensory enjoyment, the sound offers aural pleasure from the moment the ignition is turned on, with special care being taken to provide acoustic feedback with a deep and harmonic nature, creating a great sound with absolutely no compromise on comfort. The Slip-On Race system can be optionally combined with Link Pipe Set (Titanium). The addition of link pipes will require remapping the ECU. This system fits also on vehicles equipped with Otto particulate filter (OPF). Important notice: The system is designed to replace the Porsche sport exhaust system. In case you would like to install Akrapović exhaust system on vehicles with non-sport stock exhaust, please check the installation instructions or request more information at official Akrapović dealers. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>

Link pipe set (Titanium) was tested and developed together with Slip-On Race Line (Titanium) system. Adding the link pipe set is the second step in the exhaust tuning process. Combination with Slip-On Race Line retains the original Porsche GT3 exhaust manifold, utilizing the existing integrated catalytic converters. The perfectly balanced titanium slip-on system and superbly fitting link pipes are all set off with a pair of beautiful titanium tailpipes. Developed primarily for track use, the Slip-On Race Line with Link Pipe Set (Titanium) increases power and torque levels and with the huge reduction in weight in the area behind the engine and the rear axle (in comparison to the original system) handling is improved to make the car and exhaust work in perfect harmony. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.											
L-PO997GT3CSET	Link Pipe Set (Titanium)	EV - Evolution		Super Sport	Car	Porsche	911 GT3 / GT3 Touring (991.2)	2018	2019	1130.34	EUR
TP-T/S17	Tail pipe set (Titanium)	OP - Optional part	Top the system off with a pair of eye-catching double round tailpipes, made of high-grade titanium. Designed and constructed exclusively for the Porsche 911 GT3 (991) and GT3 RS (991), the Akrapović dB reducer (Titanium) is aimed at driving enthusiasts who need to keep the noise of the exhaust within approved levels during track-day use. Made from high-grade lightweight titanium, the dB reducer works like an additional muffler to allow extra expansion of the exhaust gases. It is easily fitted by simply removing the Akrapović tailpipe set and then mounting the dB reducer in place. After installation, the Akrapović dB reducer (Titanium) reduces dynamic sound levels* by approximately two or three decibels** while still retaining the unique Akrapović sound and character. It is designed to fit and reduce the measured dynamic sound levels of all Akrapović systems for the Porsche 911 GT3 (991) and GT3 RS: the Slip-On Race Line (Titanium), Evolution Line (Titanium), Sports Cup Line (Titanium), and Evolution Race Line (Titanium). The Akrapović dB reducer (Titanium) is also totally compatible with the optional Akrapović carbon-fibre diffuser, which is available for the Porsche 911 GT3 (991). The Akrapović dB reducer (Titanium) fits also to the stock exhaust system of the 911 GT3 (992) and GT3 RS (992). *Dynamic sound levels apply to a moving vehicle and not the volume from a static vehicle. **Noise reduction value is relative (or may vary) due to various noise-measuring methods used and external conditions at different racetracks.	Super Sport	Car	Porsche	911 GT3 / GT3 Touring (991.2)	2018	2019	1202.61	EUR

Super Sport	Car	Porsche	911 GT3 / GT3 Touring (991.2)	2018	2019	1657.82	EUR
TP-PO991GT3/BOX	Akrapović dB reducer (Titanium)	OP - Optional part	Developed solely for the 911 GT3 (992), this high-grade lightweight titanium system is sandblasted and coated for durability. The completely new design includes twin tailpipes, with the outer shell coated and the inner sleeve featuring six imprints to match the six-cylinder engine, with an engraved Akrapović logo to complete the visual effect. The housing of the exhaust valves – which have been tailored perfectly to the gas flow to produce a smooth, rich tone at normal cruising and a sporty sound experience at higher revs – and the collectors in the muffler are cast in the Akrapović in-house foundry. When combining the Slip-On Race Line (Titanium) with the Slip-On Race Line Adapter (SS), the weight is decreased by 20.7% (3.5 kg) against the standard system and performance sees an increase of 6.5 hp (8.2 hp) in power at 2,900 rpm and a torque rise of 24.1 Nm at 2,400 rpm when tested on the Akrapović dyno against a Porsche 911 GT3 (992) with a standard stock exhaust. This system is intended for use on closed-course competition circuits only because it is a race-track-oriented part. No remapping of the ECU is required. This system fits also on vehicles equipped with Otto particulate filter (OPF). If fitted with the stock headers in place, the system requires the P-CP034 Slip-On Race Line Adapter (SS) as a mandatory part for installation. For clients intending to install the complete exhaust system, the E-PO/T17 Evolution Header Set (Titanium) must be ordered separately. Please notice that you may need to order new original Porsche V-clamps that fix the link pipes onto the headers, in case they are removed during the removal. This hand-crafted high-quality carbon fibre diffuser is available in a matte or high-gloss finish to complete the Akrapović exhaust and harmonize with the rear of the car. Fully emphasizing the twin tailpipes of the Slip-On Race Line (Titanium), the diffuser has titanium plates on both sides, which are laser engraved with the Akrapović logo. Weighing 0.8 kg lighter than the standard stock diffuser, this totally new design is ABE type approved and adds a striking visual finish. This product does not fit on Porsche 911 GT3 RS (992).	Super Sport	Car	Porsche	911 GT3 / GT3 Touring (992)	2021	2024	1657.82	EUR
S-PO/TI/23	Slip-On Race Line (Titanium)	SO - Slip-On	This hand-crafted high-quality carbon fibre diffuser is available in a matte or high-gloss finish to complete the Akrapović exhaust and harmonize with the rear of the car. Fully emphasizing the twin tailpipes of the Slip-On Race Line (Titanium), the diffuser has titanium plates on both sides, which are laser engraved with the Akrapović logo. Weighing 0.8 kg lighter than the standard stock diffuser, this totally new design is ABE type approved and adds a striking visual finish. This product does not fit on Porsche 911 GT3 RS (992). E-PO/T17	Evolution Header Set (Titanium)	EV - Evolution	Evolution Header Set (Titanium) was tested and developed together with Slip-On Race Line (Titanium) system. This product is made using high-grade titanium, with the parts sandblasted and coated for durability. This new header set has a routing that has been designed to perfectly direct the gas flow. Showcasing the special manifold crossover pipes in the headers, cast in the Akrapović in-house titanium foundry, this innovative design comes directly from race-proven exhaust systems, and this is the first time it has featured in an Akrapović aftermarket car exhaust. This masterpiece of engineering is designed solely to optimize the performance of the Slip-On Race Line (Titanium) in the midrange. Many parts in the headers are cast in the in-house foundry, and the complete use of titanium results in a weight saving of 3.8 kg, which is 28% lighter than the stock equivalent. Tuned quarter-length resonators in addition to the catalytic converters ensure the sound quality and the absence of any distortion or unwanted frequencies, creating a unique sound experience. The combination of an Akrapović Slip-On Race Line (Titanium) and Evolution Header Set (Titanium), developed for use on closed-course competition circuits only, provides increases of 16.6 kW (22.6 hp) in power at 4,550 rpm and 35.2 Nm in torque at 4,500 rpm, when tested on the Akrapović dyno against a Porsche 911 GT3 (992) with a standard stock exhaust. When installing the Akrapović Evolution Header Set (Titanium) on vehicles with particulate filters, remapping the ECU is mandatory to prevent potential "black engine light" warning signals. When installing the	Super Sport	Car	Porsche	911 GT3 / GT3 Touring (992)	2021	2024	8435	EUR

<p>This product is designed for mandatory use with the Akrapović Slip-On Race Line (Titanium) if the stock headers are retained. Constructed from high-grade stainless steel, this set utilizes special insulation to prevent any excess heat from affecting other parts. The Slip-On Race Line Adapter's design ensures perfect performance and sound from the Slip-On Race Line (Titanium) exhaust system because the gas flow has been topologically CFD optimized and meticulously tested on the vehicle. For vehicles without particulate filters, plug inserts and plug nuts from the Akrapović installation kit must be used to disable the backpressure sensor. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p> <p>Designed and constructed exclusively for the Porsche 911 GT3 (991) and GT3 RS (991), the Akrapović dB reducer (Titanium) is aimed at driving enthusiasts who need to keep the noise of the exhaust within approved levels during track-day use. ---	--	--	--	--	--	--	--	--	--	--	--	--

Akrapović's Slip-On Line represents the first step in the exhaust system tuning process and the muffler can easily be installed onto the Porsche GT3 RS's original system. Built from hi-grade titanium and finished with two eye-catching double round tailpipes, this entry system makes the GT3 RS more powerful and lighter, and gives the car that unique Akrapović sound, while still meeting ECE specifications. The mandatory tail pipe set TP-TS/19/H needs to be ordered separately. When combining the slip-on system with optional carbon fibre diffuser Di-PO/CA7/G, you must use tail pipe set TP-TS/17/H or TP-TS/17/I. The Slip-On system can be optionally combined with Link Pipe Set (Titanium) that retains stock headers and removes stock side mufflers, or it can be upgraded into a full Akrapović exhaust system, either with combining it with Evolution Race Header Set without valves or Evolution Header Set with side mufflers and valves. If the system is upgraded with link pipe or evolution sets, the ECE type approval is not valid anymore.												
S-PO/TI/10H	Slip-On Line (Titanium)	SO - Slip-On	ECE Type Approval		Super Sport	Car	Porsche	911 GT3 RS (991.2)	2018	2020	4393,69	EUR
TP-TS/19/H	Tail pipe set (Titanium)	OP - Optional part	ECE Type Approval	Top the system off with a pair of eye-catching double round tailpipes, made of high-grade titanium. Made specifically for the GT3 RS (991.2) version. Akrapović's Slip-On Race Line represents the first step in the exhaust system tuning process and it can easily be installed onto the Porsche GT3 RS's original system. Built from hi-grade titanium and finished with two eye-catching double round tailpipes, this entry system makes the GT3 RS more powerful and lighter, and gives the car that unique, sporty Akrapović sound. The mandatory tail pipe set TP-TS/19 needs to be ordered separately. When combining the slip-on system with optional carbon fibre diffuser Di-PO/CA7/G, you must use tail pipe set TP-TS/17/H or TP-TS/17/I. The Slip-On Race system can be optionally combined with Link Pipe Set (Titanium) that retains stock headers and removes stock side mufflers, or it can be upgraded into a full Akrapović exhaust system, either with combining it with Evolution Race Header Set without valves or Evolution Header Set with side mufflers and valves. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. Link pipe set (Titanium) was tested and developed together with Slip-On Race Line (Titanium) system. Adding the link pipe set is the second step in the exhaust tuning process. Combination with Slip-On Race Line retains the original Porsche GT3 RS exhaust manifold, utilizing the existing integrated catalytic converters. The perfectly balanced titanium slip-on system and superbly fitting link pipes are all set off with a pair of beautiful titanium tailpipes. Developed primarily for track use, the Slip-On Race Line with Link Pipe Set (Titanium) increases power and torque levels and with the huge reduction in weight in the area behind the engine and the rear axle (in comparison to the original system) handling is improved to make the car and exhaust work in perfect harmony. When installing Akrapović aftermarket optional link pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing Akrapović aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential »check engine lights« warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. Evolution Race Header Set converts the slip-on system into a full system, built for the track and gives the Porsche GT3 RS the extra performance to match. Handcrafted titanium headers incorporate 100 cpi sports catalytic converters and titanium flanges—cast in Akrapović's own foundry. The system offers a perfect power curve, designed to continually increase performance as the revs rise. Along with improved torque and the maximum weight savings to enhance handling, adding the Evolution Race Header (Set) will have the car performing like a true cup racer—with a deep, loud, and powerful Akrapović racing sound to match its performance. When installing Akrapović aftermarket optional link pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing Akrapović aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential »check engine lights« warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. Evolution Header Set converts the slip-on system into a full system designed to give noticeably increased power at higher revs. Handcrafted titanium headers incorporate 100 cpi sports catalytic converters and side mufflers—all designed to increase power and torque—the Evolution Header Set utilizes integrated catalytic converters and the functionality of the exhaust valves to deliver an out-and-out attack on the senses. With the valves in the open position, it delivers a sportier and hard-hitting sound, but also has the option of a lower sound level when the valves are closed, perfect for use in more everyday locations. Offering an increased weight savings in the area behind the engine and the rear axle, the reduction will enhance the handling and improve performance. When installing Akrapović aftermarket optional link pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing Akrapović aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential »check engine lights« warning signals. <p>Evolution Header Set (Titanium) must be mounted together with Slip-On Line (Titanium) system S-P/O/T15 or Slip-On Race Line (Titanium) system S-P/O/T18. An additional original Porsche stock bracket (Porsche p/n: 99111147391) is required for mounting the Akrapovič exhaust system. Please read the instructions carefully before the start of the installation. Evolution Header Set converts the slip-on system into a full system designed to give noticeably increased power at higher revs. Handcrafted titanium headers incorporate 100 cpsi sports catalytic converters and side mufflers—all designed to increase power and torque—the Evolution Header Set utilizes integrated catalytic converters and the functionality of the exhaust valves to deliver an out-and-out attack on the senses. With the valves in the open position, it delivers a sportier and hard-hitting sound, but also has the option of a lower sound level when the valves are closed, perfect for use in more everyday locations. Offering an increased weight savings in the area behind the engine and the rear axle, the reduction will enhance the handling and improve performance. When installing Akrapovič aftermarket optional link pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing Akrapovič aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential >check engine light< warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p> <p>The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. Pictures are symbolic.</p> <p>The Akrapovič Slip-On Line for the Porsche 911 Turbo / Turbo S (991.2) is the first stage in the exhaust tuning process and gives this already outstanding car a further step in performance. Complete the slip-on system with titanium tailpipes in combination with carbon fiber diffuser in matte or high gloss finish.</p> <p>Link pipe set w Cat (SS) was tested and developed together with Slip-On Line (Titanium) system. Constructed from high-quality stainless steel, this optional addition to the Slip-On Line will enhance the sound of the exhaust, and power will be taken to greater heights. Fitted with sporty catalytic converters, installing this option increases the engine's performance and adds an aural improvement for all to appreciate.</p> <p>Providing improved flow for the exhaust gases, the link pipes take the 911 to greater heights. When installing Akrapovič aftermarket optional down pipes with sports catalytic converters or without catalytic converters, which are developed for use on closed tracks only, remapping the ECU is mandatory. When installing Akrapovič aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to prevent potential >check engine light< warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p> <p>A Porsche Turbo / Turbo S fitted with the Akrapovič exhaust system is further enhanced with the mandatory hand-crafted carbon fiber rear diffuser in matte or high gloss finish, incorporating two sets of side located titanium tailpipes. Designed exclusively for the car, this stunning handcrafted diffuser takes the look of the rear of the vehicle to a whole new level and shows off the Akrapovič Slip-On line system's tailpipes to their full extent.</p> <p>A Porsche Turbo / Turbo S fitted with the Akrapovič exhaust system is further enhanced with the mandatory hand-crafted carbon fiber rear diffuser in matte or high gloss finish, incorporating two sets of side located titanium tailpipes. Designed exclusively for the car, this stunning handcrafted diffuser takes the look of the rear of the vehicle to a whole new level and shows off the Akrapovič Slip-On line system's tailpipes to their full extent.</p> <p>Manufactured in high-grade titanium, this is an optional product that covers the stock heat insulation, visible from the rear of the Porsche 911 Turbo (992). The Titanium Lip follows the lines of the car and complements the overall visual appearance.</p> <p>At of the knowledge and experience gained while working with various engines from the sports car manufacturer from Stuttgart was poured into this outstanding aftermarket exhaust system. Produced from lightweight titanium, the system uses complex parts meticulously crafted using the in-house titanium foundry to offer perfect acoustics. An instant deepness prevails from the moment the engine is started and as the revs rise, and so does the sensory involvement. At low rpm the exhaust emits a deep, iconic flat-six rumble, moving through a powerful mid-range, which then develops into a rich, strong, and high-frequency acoustic sensation at high revs, perfectly tuned to upshifts, providing a thrilling experience as the higher gears are selected and exhilarating, race-inspired burbles through the downshifts. This sound pattern is achieved with a carefully calculated H-link between the main pipes, which is precisely welded at a selected position. The system has been developed for use on closed-course competition circuits, but there is no compromise on comfort because the tuning of the system eliminates any drone or unwanted flow noise. Power and torque increases have been recorded at +16.6 kW (22.5 hp) and +46.8 Nm at 3,400 rpm when tested in back-to-back runs on the Akrapovič dyno against a Porsche 911 Turbo (992) using the Porsche stock sports exhaust system, with the torque curve offering a perfect response from low down engine speed. The system is not EC/EE type approved. Filment notice: The system is designed to replace the Porsche stock exhaust system. If you would like to use the system on public roads, there is a choice between two different sets of round titanium tailpipes for the most visible part of the exhaust system, available in sandblasted and coated, and with a natural titanium finish or in black. The inner side of the tailpipes features a dynamic relief surface for a unique visual impact.</p> <p>There is a choice between two different sets of round titanium tailpipes for the most visible part of the exhaust system, available in sandblasted and coated, and with a natural titanium finish or in black. The inner side of the tailpipes features a dynamic relief surface for a unique visual impact.</p> <p>Developed and tested in combination with the Slip-On Race (Titanium) exhaust, this product was designed to upgrade the Akrapovič system for further tuning. The link pipe set has an instant sharpness and depth that is delivered from the moment the engine is started. Pure sound is achieved with specially developed link pipes incorporating high-flow performance 200 CPSi catalytic converters, eliminating OPFs/OFPFs. Driving at a low RPM fills the senses with a deep and raw iconic flat-six rumble, and the powerful mid-range provides a rich, strong, and high-frequency acoustic sensation at high revs, ideally suited for fast upshifts to experience the thrilling acoustics in the next higher gear, while downshifts are accompanied by sharp, race-inspired burbles. Developed for use on closed-course competition circuits, comfort within the cockpit is retained throughout the rev range, with no drone or unwanted flow noise. Power and torque delivery are greatly increased, with gains of +25.2 kW (34.2 hp) of power and +74.9 Nm torque at 3,200 rpm recorded in back-to-back runs on the Akrapovič dyno against a Porsche 911 Turbo (992) using a Porsche stock sports exhaust system. The increased torque curve offers a perfect response from low down engine speed. This exhaust system is not EC/EE type approved; ECU tuning is mandatory. This system fits also on vehicles equipped with Otto particulate filter (OPF). THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>

S-P0981SO-HT/1	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval	<p>Engineers have spent months developing a Slip-On exhaust system that takes the driving experience to a completely new level. This fully titanium exhaust system with three muffler configurations saves weight at the rear axle, additionally enhancing the handling with more power and torque gained with improved gas-flow dynamics, reduced back pressure, and a more linear power curve. Power gains are especially noticeable in the mid range. All these pluses are rounded off by a thoroughly pleasing sound note. Thanks to the dual-mode exhaust flap system, the "cat-back" Slip-On enhances the unmistakably deep resonant sound of Akrapovič. Either you leave it to the car's ECU to choose the noise level, or you select it yourself by pressing the button of the optional Akrapovic sound kit when it's time to experience the passion. If the stock system does not have integrated exhaust valves, the Akrapovic sound kit is mandatory. If the stock system has integrated exhaust valves (the Porsche sport exhaust), no Akrapovic sound kit is needed.</p> <p>The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. If stock system has exhaust valves integrated (Porsche sport exhaust) no wireless kit is needed. Pictures are symbolic.</p> <p>The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. If the stock system does not have integrated exhaust valves, the Akrapovic sound kit is mandatory. If the stock system has integrated exhaust valves (the Porsche sport exhaust), no Akrapovic sound kit is needed.</p> <p>Top the system off with two pairs of eye-catching handcrafted carbon fibre tailpipes.</p> <p>Top the system off with a two pairs of eye-catching double round tailpipes, made of high-grade titanium, sandblasted and coated for even greater look and durability.</p> <p>Filament notice: This system does not fit on vehicles equipped with an Otto particulate filter (OPF). It does not fit on Cayenne S (V6), Turbo (V8) and Turbo S E-Hybrid (V8). This exhaust is constructed from high-grade lightweight titanium and features a central muffler that expands to produce two sets of tailpipes, with a choice of either a titanium or carbon-fibre finish designed to complement the lines of the car. Two valves on either side of the muffler control the airflow and are contained in valve housings cast in the Akrapovič in-house foundry. The Evolution Line (Titanium) will reduce overall vehicle weight while delivering extra power and torque through the whole rev range. With a specially developed and tuned sound, the system delivers a very high-frequency and sporty tone, especially when the car is in the higher rev range. In the normal mode, the sound is quiet and ideal for town driving and cruising, but it still has the unmistakable Akrapovič feel. An optional Akrapovič Sound Kit is available, which will increase the aural pleasure at lower revs and further supplement the sound as the revs rise, adding a thrill to the launch of the car from a standstill. Installation is plug&play, with no need to remap the ECU. For installing the evolution system, the stock exhaust system must be cut. Please read the instructions carefully before installation.</p> <p>Further control over the sound of the Evolution Line (Titanium) exhaust system can be achieved by installing the optional Akrapovič Sound Kit. This gives the occupants of the car the option to regulate the exhaust tone by switching between the quiet mode and a sportier sound. This is facilitated through the use of a Sound Remote Controller or the smartphone app (for iOS and Android), which regulates the valves to drive the actuators that open or close them through the use of a receiver in the system. When fitted with the optional Akrapovič Sound Kit, ECE type approval is no longer valid.</p> <p>Further control over the sound of the Evolution Line (Titanium) exhaust system can be achieved by installing the optional Akrapovič Sound Kit. <p>Evolution Link Pipe Set (Titanium) was tested and developed together with Slip-On Line (Titanium). The Evolution delivers more power, improves responsiveness, and keeps weight down. The uniquely designed muffler from the Slip-On with an added lightweight and exhaust flow-optimized link pipe set with bigger tubes fully represents the titanium Evolution. This performance exhaust has been created to produce a deep sound that transforms the Turbo into a real machine. This is especially the case after removing the point-welded block in the link pipe that prevents bypassing the muffler. The dual-mode system can be also used with the factory button to regulate the exhaust valves. Complete the look with a set of exquisite tailpipes in carbon fibre. If the car is equipped with performance exhaust with electronic valve actuators than actuator set P-HF1006 is required and the Akrapovic sound kit P-HF1003 can not be used. If the car is not equipped with performance exhaust and you want to use the Akrapovic sound kit than Akrapovic sound kit P-HF1003 together with Actuator set P-HF1006 has to be ordered. Evolution Link Pipe Set only fits in combination with Akrapovic exhaust system. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p>

<p>The stunning system is constructed entirely from lightweight high-grade titanium. Its beautiful and sleek design is finished with a central muffler with two pairs of eye-catching double round tailpipes – available in either handmade carbon fibre or sandblasted and coated titanium for increased durability – and it incorporates exhaust-valve housings cast in the Akrapovič in-house foundry. The sound has been tuned to deliver a fulfilling acoustic statement every time the car fires to life. The Evolution Line (Titanium) produces a deep, strong growl from the V8 turbo engine, giving the driver and passengers a true feeling of the immense torque the engine has to offer. This is achieved through a carefully designed X-crossing element in the link pipes that influences the sound. This allows the exhaust gases to mix from both sides of the engine, placing the resulting combination on par with a finely tuned musical instrument and creating incredible high-frequency overtones as the revs rise, all without any compromise to aural clarity and comfort. Fully ECE-compliant and with a simple plug-and-play installation, with no need to remap the ECU, the Evolution Line (Titanium) also adds increased performance to the stunning visual appeal. Test gains achieved by the Akrapovič technicians in controlled conditions show both power and torque gains over the Porsche sport exhaust system of +8.2 kW at 5,600 rpm and +16.6 Nm at 2,400 rpm, respectively, making the system an impressive addition to the Porsche Cayenne Turbo (536). The sound can be further controlled with the addition of the optional Akrapovič Sound Kit, which offers the system off with two pairs of eye-catching handcrafted carbon fibre tailpipes.</p> <p>Top the system off with two pairs of eye-catching double round tailpipes, made of high-grade titanium, sandblasted and coated for even greater look and durability.</p> <p>Further control over the sound of the Evolution Line (Titanium) exhaust system can be achieved by installing the optional Akrapovič Sound Kit. The sound can be further controlled with the addition of the optional Akrapovič Sound Kit, which offers the Evolution Line (Titanium) exhaust system for the Porsche Cayenne Turbo S E-Hybrid (536) has a stunning soundtrack that makes the most of the car's V8 turbocharged engine, providing an acoustic performance wherever the car might travel. The deep, strong growl offers a true feeling of the immense torque the engine has to offer, and as the revs rise high frequency overtones add to the enjoyment. This has been achieved with intelligent design of the X-crossing element in the link pipes, allowing the exhaust gases to mix from both sides of the engine and influence the overall sound, all without any compromise to aural comfort. Constructed from high-grade titanium and finished with a choice of eye-catching double round tailpipes in either handmade carbon fibre or sandblasted and coated titanium, this system looks as good as it sounds. The performance has been measured by the Akrapovič technicians, showing an increase in power of +11.5 kW at 3,150 rpm and an enhanced torque return of +35.0 Nm at 3,100 rpm. Full ECE compliance and plug-and-play installation, requiring no need to remap the ECU, make the Evolution Line (Titanium) exhaust system for Porsche Cayenne Turbo S E-Hybrid (536) an impressive product. For increased aural enjoyment, an optional Akrapovič Sound Kit can be added to offer the user greater flexibility and control over the system's sound. When fitted with the optional Akrapovič Sound Kit, ECE type approval is no longer valid. ECE type approval is only valid for cars equipped with otto/gasoline particulate filter. FITMENT NOTICE: This Evolution Line (Titanium) fits on Cayenne GTS and Further control over the sound of the Evolution Line (Titanium) exhaust system can be achieved by installing the optional Akrapovič Sound Kit. This gives the occupants of the car the option to regulate the exhaust tone by switching between the quiet mode and a sportier sound. This is facilitated through the use of a Sound Remote Controller or the smartphone app (for iOS and Android), which regulates the valves to drive the actuators that open or close them through the use of a receiver in the system. When fitted with the optional Akrapovič Sound Kit, ECE type approval is no longer valid.</p> <p>Top the system off with two pairs of eye-catching double round tailpipes, made of high-grade titanium, sandblasted and coated for even greater look and durability.</p> <p>Top the system off with two pairs of eye-catching handcrafted carbon fibre tailpipes.</p> <p>The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. S-PO981SO-HT/T1	Slip-On Line (Titanium)	SO - Slip-On	EC Type Approval	Engineers have spent months developing a Slip-On exhaust system that takes the driving experience to a completely new level. This fully titanium exhaust system with three muffler configurations saves weight at the rear axle, additionally enhancing the handling with more power and torque gained with improved gas-flow dynamics, reduced back pressure, and a more linear power curve. Power gains are especially noticeable in the mid range. All these pluses are rounded off by a thoroughly pleasing sound note. Thanks to the dual-mode exhaust flap system, the "cat-back" Slip-On enhances the unmistakably deep resonant sound of Akrapovič. Either you leave it to the car's ECU to choose the sound level, or you select it yourself by pressing the button of the optional Akrapovic sound kit when it's time to experience the passion. If the stock system does not have integrated exhaust valves, the Akrapovic sound kit is mandatory. If the stock system has integrated exhaust valves (the Porsche sport exhaust), no Akrapovic sound kit is needed.	Super Sport	Car	Porsche	Cayman GTS (981)	2015	2015	5682,7	EUR
	Akrapovič Sound Kit	OP - Optional part	W/O Approval	The optional Akrapovič Sound Kit enables owners of selected Akrapovič car exhausts to control the sound of the system from the cockpit of their machine. Using Akrapovič technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. If stock system has exhaust valves integrated (Porsche sport exhaust) no wireless kit is needed. Pictures are symbolic.	Super Sport	Car	Porsche	Cayman GTS (981)	2015	2015	483,26	EUR

<p>This stunning system is made completely from high-grade titanium. It includes parts cast in the company's in-house foundry, featuring an additional pair of exhaust valves behind the rear mufflers, designed to provide optimal control of the exhaust sound for the best aural enjoyment. The system has been perfectly tuned to deliver the very best sound experience in all modes – enormous effort was invested to give it a rich higher-frequency V6 sound with a sporty racing note, while keeping it smooth and eliminating any drone for maximum everyday comfort. By using the optional Akrapovič Sound Kit, the driver can choose between a loud racy sound or a quieter note for long-distance driving, regardless of the mode chosen for the vehicle. The look of the Slip-On system can also be further enhanced by adding four round titanium or carbon-fibre tailpipes. An increase in performance and torque through a broad rpm range and a significant weight savings makes this a very serious performance upgrade. With optimized gas flow and reduced back pressure, it allows limitless tuning options. It is a simple plug-and-play installation with no need for remapping. The exquisite Akrapovič Slip-On Line (Titanium) exhaust system adds performance and style, along with an amazing soundtrack inside and outside cabin. FITMENT notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF). This product will not fit on Executive models.</p> <p>This stunning system is made completely from high-grade titanium. L-RECL3RS/1	Evolution Link pipe set (SS)	XX - Other	Take the performance even further with adding an additional stainless steel link pipe with an integrated resonator to the Slip-On system. The impact on weight loss and performance versus the stock system of the Renault Clio R.S. is even more dramatic. There are real power delivery gains, and the engine, which is already primed for high-rev action, spins even more effectively, which in practical terms means that it's noticeably more responsive. The sound is deeper, sportier, and louder, akin to racing in the Clio Cup, but without drowning. The look of Clio R.S. with the Evolution system is completed with distinctive precision-crafted carbon fibre tailpipes. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. The Clio R.S. is known as a real "hot hatch" among small cars. Akrapovič offers a Slip-On exhaust system in stainless steel with a two-muffler design and exquisitely designed and manufactured tailpipes. The Slip-On gives the Clio R.S. additional power and torque, and reduces the weight. The system also improves the driving characteristics at practically all rpm and gives the 2-liter engine that distinctive Akrapovič sound. In addition to the power gains resulting from weight reduction and a better power-to-weight ratio, leading to increased power, a Clio RS with an Akrapovič exhaust system can be distinguished even from afar thanks to its precision-crafted carbon fibre tailpipes. The Akrapovič Slip-On markedly improves the driving experience.	Hot Hatch	Car	Renault	Clio III RS 200	2009	2012	304,48	EUR
MTP-RECL3RSH	Slip-On Line (SS)	SO - Slip-On	EC Type Approval	Hot Hatch	Car	Renault	Clio III RS 200	2009	2012	1132,87	EUR
S-RE/T/1	Evolution Line (Titanium)	EV - Evolution	The Akrapovič Evolution Line performance exhaust system takes the performance of the Renault Mégane R.S. to even greater heights. The lower weight of the system over stock improves the car's handling, and together with the increase in power and torque makes this impressive hot hatch an even more thrilling experience. Beautifully crafted from titanium and finished with a unique carbon fibre tailpipe, the Evolution Line system will make the Mégane R.S. stand out from the crowd. When the high-revving engine lets out that distinctive deep and sporty Akrapovič sound, the whole package becomes one for all the senses to enjoy. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. The Akrapovič Slip-On Line exhaust system is made from titanium with a distinctive precision-crafted carbon fibre tailpipe to give the Mégane R.S. added appeal before its sporty engine kicks into life. Once the high-revving engine starts to spin, the Slip-On Line gives the Mégane R.S. increased sportiness and responsiveness with additional power and torque, and also reduces the weight to assist with overall handling. The system also gives the engine a deeper Akrapovič sound to further enhance the driver's enjoyment. ECE type approval is only valid for cars equipped with otto/gasoline particulate filter. For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation. Flament notice: This system does not fit on Mégane R.S. Line, Trophy and Trophy-R models.	Hot Hatch	Car	Renault	Mégane III Coupé RS	2010	2016	2316,22	EUR

				Evolution Link pipe set (Titanium) was tested and developed together with Slip-On Line (Titanium) system. The titanium Evolution link pipe set upgrades the Slip-On system to the Evolution system, that takes the performance of the Renault Mégane R.S. to even greater heights. The lower weight of the system over stock improves the car's handling, and together with the increase in power and torque makes this impressive hot hatch an even more thrilling experience. When the high-revving engine lets out that distinctive deep and sporty Akrapovič sound, the whole package becomes one for all the senses to enjoy. For installing the evolution link pipe set, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation. For OPF: When installing the Akrapovič Evolution link pipe set, remapping the ECU is mandatory in order to prevent potential "check engine light" warning signals. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																				
L-RE/TI2	Evolution Link pipe set (Titanium)	OP - Optional part																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																						

<p>This ECE type-approved system is constructed entirely from high-grade titanium and features an exhaust valve with a housing cast in the in-house foundry. The single muffler arrangement has a unique set of titanium tailpipes, utilising a design not previously seen on an aftermarket exhaust. Fully adapted to the lines of the car, the outer side of the tailpipe has been coated for increased durability, while the inner surface has a bluish-purple natural titanium colour achieved by annealing, plus a stylish and sporty imprint design to give the system a very special and exclusive finish. Through the use of lightweight materials, the system will reduce overall vehicle weight, optimising power and torque through the entire rev range. Different sound modes offer a pleasant experience in comfort mode – without any intrusive drone – and, when the diving gets more dynamic and enthusiastic, the exhaust produces a vibrant and deep roar from the six-cylinder engine, which the Supra is well known for, and adds an exciting and exhilarating sensation as the revs rise. Optional tuning opportunities exist through the addition of the stainless-steel Evolution Link Pipe set, although fitting the Link Pipe will negate the ECE type approval. Fitment and ECE type-approval are valid for engine type B58B30C. ECE type approval is only valid for cars equipped with otto/gasoline particulate filter. For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation.</p> <p>Downpipe w Cat (SS) was tested and developed together with Evolution Line (Titanium) system. The high-flow downpipe is constructed using high-quality stainless steel and, once fitted to the Evolution Line exhaust, it creates a complete system from the manifold to the tailpipes that will further enhance the performance figures: both the torque and power outputs. It incorporates a sporty catalytic converter. This optional downpipe produces an enhanced sound that delivers a pure racing emotion and fantastic feedback at high revs, without unwanted drone, making it suitable for everyday use. When installing the Akrapovič downpipe, remapping the ECU is mandatory in order to prevent potential 'check engine light' warning signals. Downpipe is optional product to the following evolution systems: Toyota Supra (A90) without OPF; Slip-On Line (Titanium) + Evolution Link pipe (SS) - S-TY/T/H + E-TY/SS/1BMW Z4 M40i (G29) without OPF; Slip-On Line (Titanium) + Evolution Link pipe (SS) - S-BMT/9H + E-TY/SS/1THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.</p> <p>Evolution Link Pipe Set (Titanium) was tested and developed together with the Slip-On Line (Titanium) system. The Evolution link pipe set upgrades the Slip-On system to the Evolution system. The Evolution link pipe set is constructed from high-quality austenitic stainless steel. It features an arrangement of two central link pipes for the best flow of the exhaust gases from the engine. It is designed to increase power and torque and reduce overall weight, while delivering a deep and sporty sound with no unwanted drone or streaming. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE. This evolution link pipe set does not fit on vehicles equipped with Otto particulate filter (OPF).</p> <p>Evolution Link Pipe Set (Titanium) was tested and developed together with the Slip-On or the Evolution Line (Titanium) system. The single muffler arrangement has a unique set of titanium tailpipes, utilising a design not previously seen on an aftermarket exhaust. Fully adapted to the lines of the car, the outer side of the tailpipe has been coated for increased durability, while the inner surface has a bluish-purple natural titanium colour achieved by annealing, plus a stylish and sporty imprint design to give the system a very special and exclusive finish. Through the use of lightweight materials, the system will reduce overall vehicle weight, optimising power and torque through the entire rev range. Different sound modes offer a pleasant experience in comfort mode – without any intrusive drone – and, when the diving gets more dynamic and enthusiastic, the exhaust produces a vibrant and deep roar from the six-cylinder engine, which the Supra is well known for, and adds an exciting and exhilarating sensation as the revs rise. Optional tuning opportunities exist through the addition of the stainless-steel Evolution Link Pipe set, although fitting the Link Pipe will negate the ECE type approval. Fitment and ECE type-approval are valid for engine type B58B30C. ECE type approval is only valid for cars equipped with otto/gasoline particulate filter. For installing the slip-on system, the stock exhaust system has to be cut. Please read the instructions carefully before the start of the installation.</p> <p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapovič. In order to satisfy the most discriminating tastes, we've created handcrafted carbon fibre tailpipes. To make our tailpipes stand out from the rest even more, in addition to selecting the finest materials, we also made them larger. This gives you car an even more dynamic look, which can be either elegantly sporty. Installing the tailpipes on the stock system is simple.</p> <p>The tailpipes are the most visible part of the exhaust system, and that's why we dedicate particular attention to them at Akrapovič. 											Akrapović revolutionizes the hot hatch segment with full-titanium Slip-On Race exhaust systems for the VW Golf GTI. Sustainable, light, and performance-oriented proprietary titanium alloys, a feature of Akrapović performance exhaust systems for supercars and winners of 24-hour races, offer exclusivity to owners of the new GTI. Akrapović's unique lightweight Slip-On Race Line exhaust system for the Golf GTI delivers a premium touch through that deep sporty Akrapović sound, performance, and exclusive design, emphasized by two exquisite carbon fibre tailpipes. Race-proven materials. The perfectly crafted system provides additional performance gains over the stock system. The Slip-On Race's optimized exhaust flow gives the GTI a great platform for further tuning. Slip-On Race exhaust system was developed for the manual GTI, but can also be used with the DSG version. It's meant for drivers that enjoy sports driving on race tracks. THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.
